Information Platform TEWI **1**
Piotr Lipiński, Konrad Świrski
Summary 1
1 Introduction 2
2 Information Platform TEWI 3
3 Hardware Description of the Platform 3
4 Software 4
4.1 Directing PLM Software (Product Lifecycle Management) 4
4.2 Multi-CAD 5
4.3 CAD Software 6
4.4 Software for Engineering Calculations 7
4.5 Software for Dynamic Documentation and Publication 7
4.6 Visualization Product Software 8
4.7 Management of Products and Data Sources Software 9
4.8 Summary of the Technical Design Assumptions of the Information Platform TEWI 9
5 Conclusions 10
References 10

Introduction to Integration of PLM and CAD Systems within TEWI Platform **11**
Bruno Deszczyński
1 Introduction 11
1.1 Integration of PLM and CAD Systems 12
2 Continuous Changes and Adaptation of Change and Configuration Management on the Universities 13
2.1 Configuration and Change Management in TEWI's Windchill 15
2.2 Distinctness of the Characters – Various Tools and Data Formats in Change and Configuration Management 17
3 "Top-Down" and "Bottom-Up" Methods of Design 18
4 Advantages Resulting from Usage of TEWI Platform 20
References 22

Access Control Management Using Extended RBAC Model 23
Aneta Poniszewska-Maranda
1 Introduction 23
2 Access Control Policies and Models....24
3 Platform for Management of Access Control 27
4 Conclusions 32
References 33

Evaluation of DocBook 5.0 in Documenting Research Applications....35
Kamil Kowalewski, Marek Parfieniuk, Oskar Świda, Marcin Kazberuk
1 Introduction 35
2 General Characterization of the DocBook Technology 36
2.1 DocBook as an XML Application....36
2.2 Origin and Evolution of DocBook 37
3 Documenting Scientific Applications and Research Results Using DocBook 39
3.1 Inserting Equations....39
3.2 Inserting Tables....41
3.3 Inserting Graphics 41
3.4 Support for Non-english Languages and Multilingual Documents....41
3.5 Converting Documents from DocBook to LaTeX 44
3.6 Generating Hypertext for the Web and PDF Files for Printing....46
3.7 Overall Ease of Using DocBook 46
4 Summary....48
References 48

Augmented Reality as a Space for Presenting and Passing the Information about Works of Art and Architectural Monuments 49
Jarosław Andrzejczak, Rafał Szrajber
1 Augmenting the Reality....49
2 Digital Information about the Work of Art or a Monument in an Augmented Reality 50
3 Chosen Applications of Augmented Reality in Connection to Available Technology....51
4 The Disadvantages of Traditional Ways of Presenting Works of Art and Monuments....53
5 Augmented Reality Rich with Information....54
6 The Ways of Presenting Detailed Information about the Object on the Example of Chosen Technologies....55
References 60

3D Scene Exploration with External Controllers....61
Adam Wojciechowski
1 Introduction 61
2 State of Art....62
3 Method....62
4 Implementation....67

5 Tests 69
6 Summary 69
References 70

System for Developing Photon Mapping Algorithms 71
Krzysztof Guzek, Piotr Napieralski
1 Introduction 71
2 The Evolution of Global Illumination Algorithms 72
3 Photon Mapping 74
3.1 Optimizations of Photon Mapping 75
3.2 Reverse Photon Mapping 76
3.3 Progressive Photon Mapping 77
3.4 Rays Mapping 78
4 Rendering System 80
4.1 Description of the Planned Service 80
4.2 Structure of the Renderer 80
5 Summary 81
References 81

A Compiler for a Domain-Specific Language for Rapid Implementation of DSP Transforms and Filter Banks 83
Marek Parfieniuk, Marcin Kazberuk, Kamil Kowalewski
1 Introduction 83
2 TDL: A Domain-Specific Language for Describing Transforms and Filter Banks 84
2.1 Motivation for Developing the Language 84
2.2 Comparison to Existing Tools 87
2.3 Structure of Description Files 88
2.4 Syntax of Matrix Expressions 89
3 The TDL Compiler 91
3.1 Design Requirements and Assumptions 91
3.2 General Flow of Data within the Compiler 93
3.3 ANTLR-Based Parser 94
3.4 Object Model for Transform Descriptions 95
3.5 Dataflow Graph and Coefficient Tree 96
3.6 Code Generation 97
3.7 Integration of the Compiler with the TEWI Platform 98
4 Summary 99
References 99

Singularities Detection System Design for Automatic Analysis of Biomedical Signals and Machine Condition Monitoring and Fault Diagnostics 101
Pawel Tadejko, Waldemar Rakowski
1 Introduction 101
2 Wavelet Transform and Singularity Analysis 102

2.1 Dyadic Wavelet Representation of a Signal 104
2.2 The à trous Algorithm of Dyadic Wavelet Decomposition 105
2.3 Singularity Detection Based on Wavelet Multiscale Analysis 106
2.4 An Adaptive Threshold for Events Detection 107
3 Application of Wavelet Singularity Analysis 108
3.1 Biomedical Signals Analysis 108
3.2 Machine Condition Monitoring and Fault Diagnostics 110
3.3 Areas of Possible Applications of Solution Based on Singularity Detection System 111
4 The Software Architecture of a System Services for Singularity Detection 112
5 Requirements Analysis and Conceptual System Design 113
6 Conclusions 115
References 116

Proposal of New Systolic Architecture for Mathematical Morphology Algorithms 119
Krzysztof Lichy
1 Introduction 119
2 The Author's Universal Array Project 119
3 Introducing the Picture to the Systolic 121
4 Possible Modification of the Systolic Array 123
5 Further Proposals of the Array Modification 124
6 Another Approach to Introducing Data 125
7 Designing of Systolic Implementation of Mathematical Morphology Processing 126
8 Examples of Usage 129
9 Conclusion 131
References 132

Adaptive Wavelet Synthesis for Improving Digital Image Watermarking 133
Jan Stolarek
1 Introduction 133
2 Orthogonal Wavelet Transform 134
3 Digital Image Watermarking in the Wavelet Transform Domain 136
4 Wavelet Adaptation Using the Genetic Algorithm 137
5 Tools for Adaptive Wavelet Synthesis 140
5.1 Wavelet Plotter 140
5.2 Adaptive Wavelet Synthesizer 141
6 Summary 142
References 143

Congestion Avoiding Flow Control Solution Applied to Bounded Area of IP Network **145**
Michał Karbowańczyk
1 Introduction 145
2 Flow Control Solution 147
2.1 Control Algorithm 147
2.2 Feedback Loop 148
3 Experimental Verification 150
4 Summary 155
References 156

Planning of the 802.11/abgn Computer Networks with the Aid of the Specialized Web Service **157**
Daniel Arendt, Michał Morawski, Antoni Zajączkowski
1 Introduction 157
2 Planning Wireless Computer Networks – Computations 158
3 Planning the System of Access Points – Existing Software Support 160
3.1 Air Magnet – The Planner Service 161
3.2 HeatMapper and Site Survey of Ekahau 162
3.3 RingMaster of TrapezeNetworks 164
3.4 WinPlanner 164
3.5 Other Solutions 165
4 Planning the System of Access Points – Web Service 166
4.1 Description of Functionality 166
4.2 Functional Diagram and Information Flow 167
4.3 Life Cycle of the Web Service 168
4.4 Next Version of the Network Planning Web Service 169
5 Conclusions and Further Research 169
References 170

Universal Snapshot File Concept **173**
Mateusz Smoliński
1 Introduction 173
2 Transactional File Modifications 175
3 Related Snapshot and Version Files 177
4 File Data History 178
5 Efficient Storage Use by Universal Snapshot File 180
6 Summary 181
7 Future Research 183
References 183
