Preface to the second edition — VII

Preface — IX

1 Introduction and fundamental aspects — 1

- 1.1 General concepts of catalysis — **3**
- 1.1.1 Basics of thermodynamics and kinetics for chemical reactions — **3**
- 1.1.2 General principles of heterogeneous catalysis — **9**
- 1.1.3 Mechanisms and kinetics on catalyst surfaces — **11**
- 1.1.4 Characterisation of solid catalysts — **15**
- 1.1.5 Terms and definitions — **19**
- 1.2 Catalyst preparation — **28**
- 1.3 Chemical reactors for catalytic processes — **29**
- 1.4 Outlook — **31**
- References — **33**

2 Heterogeneous hydrogenations — 37

- 2.1 Introduction — **37**
- 2.2 Nickel catalysts — **42**
- 2.2.1 Hydrogenation of nitriles — **43**
- 2.2.2 Hydrogenation of carbonyl groups — **50**
- 2.2.3 Hydrogenation of other functional groups — **51**
- 2.2.4 Reduction of multiple functional groups in the same reaction — **54**
- 2.3 Platinum Group Metal (PGM) based catalysts — **55**
- 2.3.1 Palladium catalysts — **58**
- 2.3.2 Platinum catalysts — **80**
- 2.3.3 Other PGM catalysts — **84**
- 2.4 Other metal catalysts — **86**
- 2.5 Summary — **87**
- References — **88**

3 Homogeneous hydrogenations — 92

- 3.1 Introduction — **92**
- 3.2 Rh-catalysed hydrogenations — **93**
- 3.2.1 (*S*)-3-(3,4-Dihydroxyphenyl)alanine, *L*-DOPA — **93**
- 3.2.2 Menthol (BASF Process) — **100**
- 3.2.3 Methylene succinamic acid — **103**
- 3.2.4 Aliskiren — **104**
- 3.2.5 Pregabalin — **108**
- 3.2.6 (+)-Biotin — **109**

3.2.7	Sitagliptin — 110
3.2.8	Pantolactone — 111
3.3	Ru-catalysed hydrogenations — 113
3.3.1	Hydrogenation of allylic alcohols — 113
3.3.2	Pivotal glutarate intermediate for candoxatril — 114
3.3.3	Artemisinin — 115
3.3.4	Ketone reductions — 116
3.3.5	Dynamic kinetic resolution via asymmetric hydrogenation — 119
3.3.6	Homogeneous ester hydrogenation — 121
3.4	Ir-catalysed hydrogenation — 123
3.4.1	Hydrogenation of imines — 123
3.4.2	Hydrogenation of ketones with iridium catalysts — 126
3.4.3	Hydrogenation of unfunctionalised doubled bonds — 127
3.5	Asymmetric transfer hydrogenation of C=O and C=N — 131
3.5.1	Dorzolamide — 133
3.5.2	Styrene oxide — 133
3.5.3	(<i>R,R</i>)- <i>trans</i> -Actinol for zeaxanthin — 134
3.5.4	Almorexant — 135
	References — 136
4	Oxidations — 145
4.1	Introduction — 145
4.2	Oxidation of alcohols — 146
4.3	Oxidation of phenols and aromatic compounds — 147
4.4	Oxidation of various C–C bonds — 153
4.5	Oxidation for silane production — 166
	References — 167
5	Gas-phase reactions — 172
	References — 182
6	C–C-bond and C–N-bond forming reactions (metal-catalysed) — 185
6.1	Introduction and <i>Mizoroki–Heck</i> reactions — 185
6.2	Other palladium catalysed C–C bond forming reactions — 190
6.2.1	<i>Sonogashira–Hagihara</i> reaction — 190
6.2.2	<i>Suzuki–Miyaura</i> -coupling — 194
6.2.3	<i>Kumada–Corriu</i> coupling — 198
6.3	Carbonylation reactions — 200
6.4	Hydroformylation reactions — 202
6.5	SHOP process — 206
6.6	1,3-Diene functionalisation — 208
6.7	Telomerisation — 209

6.8	Metathesis — 218
6.9	Formation of C–N bonds (<i>Buchwald–Hartwig</i> coupling) — 223
	References — 227
7	Rearrangement reactions — 236
7.1	Introduction — 236
7.2	<i>Wagner–Meerwein</i> rearrangements — 236
7.3	<i>Beckmann</i> rearrangement — 238
7.4	[3,3]-Sigmatropic-type rearrangements — 238
7.5	The <i>Meyer–Schuster</i> , <i>Rupe–Kambli</i> and <i>Pauling</i> rearrangements — 248
7.6	Allylic rearrangements — 251
	References — 256
8	Acid–base-catalysed reactions — 259
8.1	Replacement of <i>Brønsted</i> acids — 259
8.2	Zeolite-based catalysis — 267
8.3	Heteropoly acids (HPAs) — 272
8.4	<i>Lewis</i> acids — 277
8.5	Base catalysis — 286
8.6	Ethynylation — 295
8.7	<i>Mannich</i> reactions — 296
	References — 299
9	Phase transfer catalysis (PTC) — 308
	References — 320
10	Biocatalysis — 323
10.1	Introduction to biocatalysis — 323
10.2	Industrial applications — 334
10.2.1	Sauerkraut and ethanol: Applications with a long history — 334
10.2.2	Sugars and oligosaccharides — 337
10.2.3	Organic acids — 341
10.2.4	Amino acids — 347
10.2.5	Vitamins and carotenoids — 354
10.2.6	Active pharmaceutical ingredients — 365
10.2.7	Flavour compounds — 378
10.2.8	Pesticides — 379
10.2.9	Platform chemicals — 380
	References — 384

11 Electrochemistry — 393

11.1 Introduction — **393**

11.2 Electrochemical oxidations — **397**

11.3 Electrochemical reductions — **406**

11.4 Other electrochemical approaches — **409**

References — **412**

12 New trends — 416

References — **421**

Index — 423
