1 The Normal Pancreas	1
The Duct System of the Pancreas	3
Pancreas Divisum	9
Interpretation of Pancreatograms	9
The Effects of Age in Relation to Pancreatography	10
The Weight of the Normal Pancreas and Pancreatic Fat	11
References	12
2 Normal Microscopic Structure	13
The Islets of Langerhans	15
The Development of the Pancreas	18
Epithelial Metaplasia and Dysplasia in the Pancreas	21
Pancreatic Injury, Repair and Regeneration	24
References	26
3 Congenital Pancreatic Abnormalities	29
Congenital Absence of the Pancreas	29
Congenital Absence of the Islets of Langerhans	29
Congenital Absence of Insulin-Secreting Cells	30
Congenital Short Pancreas	30
Agenesis of the Dorsal Pancreatic Bud	30
Pancreas Divisum	30
Annular Pancreas	31
Pancreatic Fibrosis, Bilateral Renal Dysplasia, Intrahepatic Biliary Dysgenesis and Situs Inversus Totalis	32
Aberrant Pancreatic Ducts	33

Heterotopia of Pancreatic Tissue	33
Pancreatic Tissue in Teratomas	39
Accessory Spleens Within the Pancreas	39
Congenital Cysts of the Pancreas	40
Pancreatic Cysts Associated with Renal Cystic Disease	43
Von Hippel–Lindau Disease	43
Dermoid Cysts	44
Pancreatic Lymphoepithelial Cysts	44
Pancreatic Atrophy	45
Congenital Pancreatic Hypoplasia with Haematological Abnormalities (Shwachman–Diamond Syndrome)	48
Juvenile Nephronophtosis with Calcification of Basal Ganglia and Pancreatic Insufficiency.	50
Refractory Sideroblastic Anaemia with Vacuolisation of Marrow Precursors and Exocrine Pancreatic Dysfunction	50
Beckwith–Wiedman Syndrome	50
References	50

4 Effects upon the Pancreas of Disease in Various Organs and Systems 55

Cystic Fibrosis (Fibrocystic Disease of the Pancreas, Pancreatic Fibrosis, Mucoviscidosis)	56
Haemosiderosis of the Pancreas	64
Other Pancreatic Lesions Associated with Hepatic Disease	67
Chronic Venous Congestion	69
Pancreatic Lesions Associated with Chronic Ulcerative Colitis	69
Pancreatic Lesions Associated with Uraemia and Dehydration	69
The Pancreas in Acute Graft Versus Host Disease	71
Pancreatic Lesions in Toxaemia of Pregnancy	72
Pancreatic Lesions Associated with Death from Lightning Stroke	72
Pancreatic Lesions in Fatal Cases of Burning	72
Amyloidosis	72
Wilson's Disease (Hepatolenticular Degeneration)	74
Systemic Lupus Erythematosus	74
Progressive Systemic Sclerosis	74
Alpha ₁ Antitrypsin Deficiency	74
Nephropathic Cystinosis	74
References	75

5 The Effects of Arterial Disease upon the Pancreas 77

Anatomy of the Arteries of the Pancreas	77
Aneurysms of the Pancreatic Arteries	78
Effects of Arteriosclerosis of the Pancreatic Arteries	81
Arterial Lesions in Relation to Acute Haemorrhagic Pancreatitis	81
Pancreatic Infarction	82
Injury to the Arteries of the Pancreas	86
References	88

6 The Pancreas in Diabetes Mellitus and Haemochromatosis . . . 91

Insulin-Dependent Diabetes Mellitus (Type I Diabetes)	92
Insulin-Independent Diabetes Mellitus (Maturity-Onset, Type II Diabetes)	103
Tropical Diabetes or Nutrition-Related Diabetes Mellitus	108
The Pancreas in Haemochromatosis	109
The Pancreas in Diabetes Mellitus Associated with Other Endocrine Diseases	111
Insulin-Resistant Diabetes Mellitus	112
References	112

7 Pancreatic Transplantation 117

Rejection	117
Recurrence of Diabetes	118
Transplantation of Islets	118
References	119

8 Cystic Pancreatic Neoplasms 121

Incidence	121
Serous Cystadenoma, Microcystic Adenoma (Glycogen-Rich Cystadenoma)	122
Mucinous Cystic Neoplasm with Latent Malignancy, Mucinous Cystadenoma, Large Locular Cystadenoma	125
Cystadenocarcinoma	129
“Ductectatic” Cystadenoma and Cystadenocarcinoma (Intraductal Papillary Neoplasms of the Pancreas)	134
Solid and Papillary, Papillary and Cystic Epithelial Neoplasms of the Pancreas (Frantz’s Tumour)	135
Cavernous Lymphangioma	139
References	140

9 Solid Carcinomas of the Exocrine Pancreas 143

Increasing Incidence	143
Aetiology	144
Causes of Symptoms	147
Abnormal Immunity and Pancreatic Carcinoma	160
Neurofibromatosis and Pancreatic Carcinoma	160
Lipomatous Pseudohypertrophy and Pancreatic Carcinoma	160
Skin Changes	160
Ectopic Hormone Production	161
Hypercalcaemia	161
Macroscopic Features	161
Microscopic Features	165
Carcinoma of the Ampulla of Vater, Common Bile Duct and Duodenum	175
Microscopic Confirmation of a Diagnosis of Carcinoma of the Pancreas	176
Use of Tumour Markers in Diagnosis	179

Spontaneous Carcinoma of the Exocrine Pancreas in Animals	179
References	180

10 Tumours and Hyperplasias of the Endocrine Pancreas 185

General Characteristics of Islet Cell Tumours	186
Insulinomas	188
Gastrinomas	194
Glucagonomas	198
Somatostatinomas	202
Islet Cell Tumours Associated with the Verner–Morrison Syndrome	202
Tumours Producing Pancreatic Polypeptide (PPomas)	204
Carcinoid Tumours of the Pancreas	205
The Malignant Behaviour of Pancreatic Endocrine Carcinomas	207
Cystic Change in Pancreatic Endocrine Tumours	208
Portal Hypertension Due to Islet Cell Tumours	208
Response of Islet Cell Tumours to Chemotherapy	208
Pancreatic Islet Cell Tumours in Multiple Endocrine Adenopathy	208
Nesidioblastosis and Adenomatosis in the Adult	210
Hyperplasia of Pancreatic Islets Associated with Extrapancreatic	
Lymphoma and Sarcoma	212
The Pancreas in Persistent Hyperinsulinaemic Hypoglycaemia in Infancy	212
References	214

11 Secondary Tumours, Lymphomas and Rare Tumours 219

Secondary Tumours	219
Pancreatic Involvement in Lymphoma	221
Rare Tumours	224
Primary Choriocarcinoma of the Pancreas	227
Pancreatic Tumours of Vascular Tissue	227
Lymphangioma of the Pancreas	228
Tumours of the Exocrine Pancreas in Infancy and Childhood	228
Solid and Papillary, Papillary and Cystic Epithelial Neoplasms of the Pancreas	229
Tumour-like Lesions	230
References	232

12 Non-infective Acute Pancreatitis 235

Aetiology and Mechanism	236
Morbid Anatomy	252
Non-pancreatic Lesions Attributable to Acute Pancreatitis	263
Complications and Sequelae	267
References	274

13 Non-infective Chronic Pancreatitis	281
Clinical Effects of Chronic Pancreatitis	281
Classification of Chronic Pancreatitis	282
Idiopathic Chronic Pancreatitis	295
Pancreatic Calculi and Pancreatic Calcification	296
Complications of Chronic Pancreatitis	303
References	314
 14 Bacterial, Granulomatous, Viral and Parasitic Lesions of the Pancreas	 319
Pancreatic Abscess	319
Salmonella Infections	319
Yersiniosis as a Possible Cause of Pancreatitis	320
Acute Pancreatitis Associated with <i>Campylobacter</i> Infection	320
Acute Haemorrhagic Pancreatitis Complicating Legionnaire's Disease	321
Syphilitic Pancreatitis	321
Tuberculosis	322
Sarcoidosis	323
Actinomycosis	324
Fungal Lesions	324
Viral Lesions	325
Pancreatic Lesions Attributable to HIV Infection	329
Pancreatitis in Fulminant Psittacosis	330
Protozoal Infection and Pancreatic Disease	330
Effects of Helminthic Infestation upon the Pancreas	330
References	332
 Subject Index	 335
