Introduction	XIII
The Diversity of Naturally Produced Organohalogenes <i>Gordon W. Gribble</i>	1
The Global Cycles of the Naturally Occurring Monohalomethanes <i>David B. Harper and John T.G. Hamilton</i>	17
The Biogeochemistry of Chlorine in Soil <i>Gunilla Öberg</i>	43
Abiotic Formation of Organohalogenes During Early Diagenetic Processes <i>Heinz F. Schöler and Frank Keppler</i>	63
Marine Sources of Volatile Organohalogenes <i>Robert M. Moore</i>	85
An Update on Organohalogen Metabolites Produced by Basidiomycetes <i>Jim A. Field and Joannes B.P.A. Wijnberg</i>	103
Volcanic Formation of Halogenated Organic Compounds <i>Armin Jordan</i>	121
Fluorinated Natural Products: Occurrence and Biosynthesis <i>David B. Harper, David O'Hagan and Cormac D. Murphy</i>	141
Enzymology and Molecular Genetics of Biological Halogenation <i>Karl-Heinz van Pée and Susanne Zehner</i>	171
Myeloperoxidase and Eosinophil Peroxidase: Phagocyte Enzymes for Halogenation in Humans <i>Jeffrey P. Henderson and Jay W. Heinecke</i>	201
Biotransformation, Toxicology and Pharmacogenomics of Dichloroacetate <i>Chandramohan V. Ammini and Peter W. Stacpoole</i>	215

**The Natural Destruction of Organohalogen Compounds.
Environmental Dehalogenation**

Charles E. Castro 235

Cryptophycin Synthesis

Marcus A. Tius 265

Subject Index 307
