Preface	vii
Contributors	xix
1 Introduction	1
<i>P. J. Gramann, T. A. Osswald</i>	
1.1 Historical Background	1
1.2 The Reciprocating Screw Injection Molding Machine	9
1.2.1 The Plasticating and Injection Unit	9
1.2.2 The Clamping Unit	10
1.2.3 The Mold Cavity	11
1.3 The Injection Molding Cycle	13
1.4 Related Injection Molding Processes	17
References	18
2 Injection Molding Materials	19
<i>T. A. Osswald</i>	
2.1 Historical Background	19
2.2 Macromolecular Structure of Polymers	23
2.3 Molecular Weight	27
2.4 Conformation and Configuration of Polymer Molecules	30
2.5 Thermoplastic Polymers	34
2.5.1 Amorphous Thermoplastics	34
2.5.2 Semi-Crystalline Thermoplastics	36
2.5.3 Examples of Common Thermoplastics	43
2.6 Thermosetting Polymers	46
2.6.1 Cross-Linking Reaction	46
2.6.2 Examples of Common Thermosets	48
2.7 Copolymers and Polymer Blends	49
2.8 Elastomers	51
<i>M. DeGreiff</i>	
2.9 Efficient Vulcanizing Systems	52
2.10 Thermoplastic Elastomers	53
<i>G. Holden</i>	
2.10.1 Service Temperatures	54
2.10.2 Examples of Common Thermoplastic Elastomers	55
References	61
3 Processing Fundamentals	63
<i>T. A. Osswald</i>	

3.1	Processing Data	63
3.1.1	Temperature Settings	64
3.1.2	Injection and Pack-Hold Pressure Settings	64
3.1.3	Drying	66
3.1.4	Processing Data for Thermoplastic Elastomers	66
	<i>G. Holden</i>	
3.1.5	Processing Data for Thermosets	71
3.1.6	Processing Data for Elastomers	72
3.2	Rheology of Polymer Melts	72
3.2.1	Shear Thinning Behavior of Polymers	73
3.2.2	Simplified Flows Common in Injection Molding	75
3.2.3	Estimating Injection Pressure and Clamping Force (Stevenson Model)	78
3.2.4	Nonisothermal Flows in Polymer Processing	83
3.2.5	Normal Stresses in Shear Flow	83
3.2.6	Deborah Number	84
3.2.7	Rheology of Curing Thermosets	85
3.2.8	Suspension Rheology	87
3.3	Rheometry	87
3.3.1	The Melt Flow Indexer	88
3.3.2	The Capillary Viscometer	88
3.3.3	Viscosity from the Capillary Viscometer	89
3.4	Anisotropy Development During Processing	91
3.4.1	Orientation in the Final Part	91
3.4.2	Fiber Damage	100
3.5	Solidification and Curing Processes	102
3.5.1	Solidification of Thermoplastics	103
3.5.2	Solidification of Thermosets	112
3.5.3	Residual Stresses, Shrinkage, and Warpage	117
	References	122
4	Plasticating	125
	<i>C. Rauwendaal, P. J. Gramann</i>	
4.1	The Plasticating Unit	125
4.1.1	The Ram Extruder	126
4.1.2	The Reciprocating Screw	127
4.2	Functions of the Plasticating Unit	140
4.2.1	Solids Conveying	140
4.2.2	Melting or Plasticating	144
4.2.3	Melt Conveying	151
4.2.4	Degassing or Devolatilization	157
4.2.5	Mixing	158
4.3	Conclusion	175
	References	176
5	Clamping Unit	177
	<i>R. Farrell</i>	
5.1	Metal Fatigue and Its Importance in Clamp Design	177

5.1.1 Importance in Clamp Design	177
5.1.2 A Brief History of Metal Fatigue	178
5.1.3 The Three Phases of Metal Fatigue	178
5.1.4 Determination of Design Stress for Metal Fatigue	179
5.1.5 Determination of Survival Factor (SF)	187
5.1.6 Conclusion of Discussion of Metal Fatigue	189
5.2 Functions of the Clamping System	189
5.3 The Three Types of Clamping Systems	190
5.3.1 Hydraulic	190
5.3.2 Hydromechanical	191
5.3.3 Mechanical	192
5.3.4 Types of Toggle Systems	193
5.4 Key Elements of a Clamp	196
5.4.1 Platens	196
5.4.2 Tie Rods and Nuts	204
5.4.3 Toggle Pins and Bushings	213
5.4.4 Tie-Rod Bushings	217
5.4.5 Moving Platen Support	218
5.4.6 Shut Height Adjustment	218
5.4.7 Ejector Systems	222
5.5 A Special Discussion of Tie-Rod Design	223
5.5.1 Why This Element Is So Important	223
5.5.2 Thread Load Distribution	223
5.5.3 Thread Bending Stress	226
5.5.4 Thread Axial Stress	228
5.5.5 Combined Stresses	228
5.5.6 Mitigating Factors	229
5.5.7 Ways to Improve the Design	230
5.6 Understanding Clamp Spring Rate (Stiffness)	232
5.6.1 How to Determine Clamp Spring Rate	233
5.6.2 The Importance of Clamp Spring Rate	234
5.7 Math Model for a Toggle Clamp	235
5.8 The Farrell Square Root Rule	239
5.8.1 Relationships That Follow from the Farrell Square Root Rule	240
5.8.2 The Whole Machine Can Follow the Square Root Rule	242
References	242

6 Mold Design 245

J. Beaumont

6.1 Standard Mold Assembly	246
6.2 Cold Runner Molds	248
6.2.1 Two-Plate Cold Runner Mold	248
6.2.2 Three-Plate Cold Runner Mold	250
6.3 Hot Runner Molds	253
6.3.1 Externally Heated Manifold and Drops	255
6.3.2 Externally Heated Manifold with Internally Heated Drops	255
6.3.3 Internally Heated Manifold and Internally Heated Drops	257
6.3.4 Insulated Manifold and Drops	258

6.3.5	Miscellaneous Hot Runner Systems Design	259
6.3.6	Hot Sprues	260
6.3.7	Hot Drops (Nozzles)	261
6.3.8	Special Considerations in the Operation of Hot Runner Molds	264
6.3.9	Stack Molds	267
6.4	Runner Design	267
6.4.1	Cold Runner Design	270
6.4.2	Runner Balancing in Geometrically Balanced Runners (Cold and Hot Runners)	272
6.4.3	Nongeometrically Balanced Runner Layouts	280
6.5	Gate Design	282
6.5.1	Gate Types	282
6.5.2	Positioning Gates	290
6.6	Structural Design of a Mold for Long Life and Rigidity	292
6.6.1	Mold Material Selection	292
6.6.2	Fatigue	293
6.6.3	Deflection of Side Walls	294
6.6.4	Core Deflection	294
6.6.5	Deflection of Support Plates	295
6.7	Mold Cooling	298
6.7.1	Practical Considerations	299
6.7.2	Thermal Expansion	301
6.7.3	Parallel versus Series Cooling Circuits	301
6.7.4	Baffles and Bubblers	303
6.8	Mold Ejection Systems	304
6.8.1	Basic Ejection Problems	304
6.8.2	Means of Ejection	308
6.8.3	Ejection Considerations	310
6.8.4	Ejection Design	312
6.9	Vent Design	315
	References	319
7	Materials Handling and Auxiliary Equipment	321
	<i>R. Lee</i>	
7.1	Drying	321
7.2	Hopper Loading	324
7.3	Clean Rooms	326
7.4	Dosing and Blending	327
7.5	Conveying Systems	330
7.6	Cooling and Chilling	331
8	Statistical Process Control	333
	<i>C. Rauwendaal</i>	
8.1	Statistical Process Control	333
8.1.1	Implementing Statistical Process Control	333
8.1.2	Basic Statistical Concepts	336
8.2	Control Charts	343

8.2.1	Introduction	343
8.2.2	Control Charts for Variables Data	343
8.2.3	Control Charts for Attributes Data	350
8.3	Process Capability and Special SPC Tools for Molding	351
8.3.1	Introduction	351
8.3.2	Capability Indexes	352
8.3.3	Use of Computers	355
8.3.4	Special SPC Techniques for Injection Molding	356
	References	360
9	Special Injection Molding Processes	361
	<i>L.-S. Turng</i>	
9.1	Coinjection (Sandwich) Molding	362
9.1.1	Process Description	364
9.1.2	Process Advantages	366
9.1.3	Process Disadvantages	369
9.1.4	Applicable Materials	369
9.1.5	Typical Applications	369
9.2	Fusible (Lost, Soluble) Core Injection Molding	371
9.2.1	Process Description	371
9.2.2	Process Advantages	374
9.2.3	Process Disadvantages	374
9.2.4	Applicable Materials	374
9.2.5	Typical Applications	375
9.3	Gas-Assisted Injection Molding	375
9.3.1	Process Description	376
9.3.2	Process Advantages	379
9.3.3	Process Disadvantages	381
9.3.4	Applicable Materials	381
9.3.5	Typical Applications	381
9.4	Injection-Compression Molding	384
9.4.1	Process Description	384
9.4.2	Process Advantages	385
9.4.3	Process Disadvantages	386
9.4.4	Applicable Materials	386
9.4.5	Typical Applications	387
9.4.6	Computer Simulation for Injection-Compression Molding	387
9.5	In-Mold Decoration and In-Mold Lamination	388
9.5.1	Process Description	388
9.5.2	Process Advantages	390
9.5.3	Process Disadvantages	390
9.5.4	Mold Design and Processing Considerations	391
9.5.5	Applicable Materials	392
9.5.6	Typical Applications	393
9.6	Insert and Outsert Molding	394
9.6.1	Insert Molding Process Description	395
9.6.2	Outsert Molding Process Description	396
9.7	Lamellar (Microlayer) Injection Molding	398

9.7.1	Process Description	398
9.7.2	Process Advantages	398
9.7.3	Process Disadvantages	401
9.7.4	Applicable Materials	401
9.7.5	Typical Applications	401
9.8	Low-Pressure Injection Molding	401
9.8.1	Process Description	402
9.8.2	Process Advantages	406
9.8.3	Process Disadvantages	406
9.8.4	Applicable Materials	406
9.8.5	Typical Applications	406
9.9	Microinjection Molding	407
9.9.1	Process Description	407
9.9.2	Process Advantages	412
9.9.3	Process Disadvantages	412
9.9.4	Applicable Materials	413
9.9.5	Typical Applications	413
9.10	Microcellular Molding	413
9.10.1	Process Description	413
9.10.2	Process Advantages	416
9.10.3	Process Disadvantages	417
9.10.4	Applicable Materials	417
9.10.5	Typical Applications	417
9.11	Multicomponent Injection Molding (Overmolding)	417
9.11.1	Process Description	418
9.11.2	Process Advantages	419
9.11.3	Process Disadvantages	420
9.11.4	Applicable Materials	420
9.11.5	Typical Applications	421
9.12	Multiple Live-Feed Injection Molding	421
9.12.1	Process Description	421
9.12.2	Process Advantages	424
9.12.3	Process Disadvantages	426
9.12.4	Applicable Materials	427
9.12.5	Typical Applications	427
9.13	Push-Pull Injection Molding	427
9.13.1	Process Description	427
9.13.2	Process Advantages and Disadvantages	428
9.13.3	Applicable Materials	428
9.13.4	Typical Applications	430
9.14	Powder Injection Molding	430
9.14.1	Process Description	431
9.14.2	Process Advantages	433
9.14.3	Process Disadvantages	433
9.14.4	Typical Applications	434
9.15	Reaction Injection Molding	434
9.15.1	Process Description	434
9.15.2	Process Advantages	436
9.15.3	Process Disadvantages	436

9.15.4	Applicable Materials	436
9.15.5	Typical Applications	437
9.16	Resin Transfer Molding and Structural RIM	437
9.16.1	Process Description	437
9.16.2	Process Advantages	439
9.16.3	Process Disadvantages	439
9.16.4	Applicable Materials	439
9.16.5	Typical Applications	439
9.17	Rheomolding	440
9.17.1	Process Description	441
9.17.2	Process Advantages	442
9.17.3	Process Disadvantages	443
9.18	Structural Foam Injection Molding	443
9.18.1	Process Description	443
9.18.2	Process Advantages	446
9.18.3	Process Disadvantages	447
9.18.4	Applicable Materials	447
9.18.5	Typical Applications	448
9.19	Thin-Wall Molding	449
9.19.1	Process Description	450
9.19.2	Process Advantages	452
9.19.3	Process Disadvantages	452
9.19.4	Applicable Materials	454
9.19.5	Typical Applications	454
9.20	Vibration Gas Injection Molding	454
9.20.1	Process Description	454
9.21	Rubber Injection	455
	<i>M. DeGreiff, N. Castaño</i>	
9.21.1	Rubber Molding Processes	455
9.21.2	Curing Systems in Rubber Injection Process	458
