| <i>Preface</i> | <i>vii</i> |
| <i>Acknowledgement</i> | <i>xi</i> |
| <i>Symbols and Abbreviations</i> | <i>xiii</i> |
| 1. Introduction | 1 |
| 1.1 Introduction | 1 |
| 1.2 History | 2 |
| 1.3 Classification of compounds | 5 |
| 1.4 Nomenclature | 5 |
| 1.5 Characteristics of crown compounds | 7 |
| 1.6 Solubility in solvents | 7 |
| 1.7 Significant properties of crown compounds | 7 |
| 1.8 Recent developments in macrocyclic and supramolecular compounds | 9 |
| 1.9 Toxicological manifestations | 11 |
| 1.10 Physiological properties of calixarenes | 14 |
| 1.11 Toxicity of cryptands and crown compounds | 14 |
| 1.12 Handling precautions | 14 |
| Conclusion | 14 |
| References | 15 |
| 2. Synthesis of Crown Compounds | 18 |
| 2.1 Introduction | 18 |
| 2.2 Synthesis of crown ethers | 19 |
| 2.3 The template effect | 20 |
| 2.4 Recent developments in the synthesis of crown ethers | 22 |
| 2.5 Synthesis of cryptands | 24 |
| 2.6 New developments in the synthesis of cryptands | 27 |
| 2.7 Synthesis of aza crown ethers | 28 |
| 2.8 Synthesis of thia crown ethers and related compounds | 30 |
| 2.9 Chiral crown ethers | 31 |
| 2.10 Proton ionisable crown ethers | 31 |
| 2.11 Diester crown ethers | 31 |
| 2.12 New developments in thia and aza crown ether synthesis | 32 |
| 2.13 Synthesis of calix (n) arenes | 33 |
| 2.14 Recent developments in synthesis of calixarenes | 41 |
| Conclusion | 44 |
| References | 45 |

| | |
|---|------------|
| 3. Characterisation and Metal Complexation | 51 |
| 3.1 Introduction | 51 |
| 3.2 Metal complexes with crown ethers | 52 |
| 3.3 Metal complexes with cryptands | 57 |
| 3.4 Characterisation of complexes by absorption spectroscopy | 58 |
| 3.5 Characterisation of crown complexes by NMR spectroscopy | 59 |
| 3.6 Metal complexes with calixarenes | 65 |
| 3.7 Characterisation of calix(n)arene complexes by NMR spectroscopy | 69 |
| 3.8 Characterisation of calixarene complexes by mass spectrometry | 73 |
| Conclusion | 74 |
| References | 76 |
| 4. Metal Complexes and Their Structure | 82 |
| 4.1 Introduction | 82 |
| 4.2 Structure in the solution | 87 |
| 4.3 Complexation and structure elucidation by classical methods | 90 |
| 4.4 Metal complexes structure studies by X-ray methods | 94 |
| 4.5 Structure of complex by thermal methods | 101 |
| 4.6 Structure of the complex by radiochemical methods | 103 |
| Conclusion | 103 |
| References | 105 |
| 5. Solvent Extraction Separations | 113 |
| 5.1 Introduction | 113 |
| 5.2 Extraction equilibria with crown ethers[5] | 114 |
| 5.3 Interpretation of equilibria | 114 |
| 5.4 Factors influencing extraction | 117 |
| 5.5 Solvent extraction separations with crown ethers | 125 |
| 5.6 Solvent extractions with cryptands | 127 |
| 5.7 Solvent extractions with aza and thia crown ethers | 135 |
| 5.8 Solvent extractions with calixarenes | 137 |
| Conclusion | 144 |
| References | 144 |
| 6. Chromatographic Separations | 155 |
| 6.1 Introduction | 155 |
| 6.2 High performance liquid chromatography | 159 |
| 6.3 Gas chromatographic separations | 162 |
| 6.4 Reversed phase extraction chromatography | 167 |
| 6.5 Ion exchange chromatography | 169 |
| 6.6 Ion chromatography separation | 171 |
| 6.7 Capillary electrophoresis with crown compounds | 175 |
| Conclusion | 178 |
| References | 179 |

| | |
|---|------------|
| 7. Extractive Spectrophotometry | 186 |
| 7.1 Introduction | 186 |
| 7.2 Classification of chromoionophores | 188 |
| 7.3 Neutral chromoionophores | 188 |
| 7.4 Monoprotic crown ether dyes | 189 |
| 7.5 Diprotic crown ether chromoionophores | 192 |
| 7.6 Other protic chromoionophores | 193 |
| 7.7 Analytical applications of crown ethers in extraction photometry | 194 |
| 7.8 Application of cryptands in extractive photometry | 197 |
| 7.9 Application of thia and aza crown ethers in extraction photometry | 204 |
| 7.10 Applications of calixarene in extractive photometry | 205 |
| Conclusion | 209 |
| References | 209 |
| 8. Extractive Emission Spectroscopy with Crown Cryptands and Calixarenes | 215 |
| 8.1 Introduction | 215 |
| 8.2 Fluoroionophores | 217 |
| 8.3 Ring substituted fluorogenic crown ethers | 218 |
| 8.4 Luminescence characterisation of lanthanide by crown ethers | 219 |
| 8.5 Lanthanide complexes as supramolecular photochemical devices | 221 |
| 8.6 Analytical application in fluorescence spectroscopy | 223 |
| 8.7 Atomic emission spectroscopic analysis with crown compounds | 224 |
| 8.8 Applications of emission spectroscopy for analysis | 225 |
| 8.9 Atomic absorption spectroscopy with crown compounds | 228 |
| 8.10 Analytical application of AAS with crown ethers and cryptand extractions | 228 |
| 8.11 Recent advances in switched on crown ethers | 231 |
| 8.12 Photoresponsive switching crown ethers | 233 |
| Conclusion | 235 |
| References | 235 |
| 9. Electroanalytical Methods with Crown Compounds | 240 |
| 9.1 Introduction | 240 |
| 9.2 Potentiometry | 241 |
| 9.3 Analytical applications of potentiometry | 243 |
| 9.4 Conductometric studies of complexes with crown ethers | 245 |
| 9.5 Analytical applications of conductometry with crown compounds | 247 |
| 9.6 Polarography | 248 |

| | | |
|------|---|-----|
| 9.7 | Cyclic voltammetry | 249 |
| 9.8 | Analytical applications of voltammetry with crown compounds | 251 |
| 9.9 | Coulometry and its analytical applications | 254 |
| 9.10 | Electrochemistry of supramolecular compounds | 255 |
| | Conclusion | 256 |
| | References | 256 |

10. Ion Selective Electrodes and Membrane Transport with Crown Compounds **261**

| | | |
|-------|--|-----|
| 10.1 | Introduction | 261 |
| 10.2 | Characteristics of the electrode | 262 |
| 10.3 | Crown ethers as neutral carriers | 265 |
| 10.4 | Bis (crown ethers) in ion selective electrodes | 268 |
| 10.5 | Analytical applications of crown compounds in ion selective electrodes | 270 |
| 10.6 | Membrane transport | 273 |
| 10.7 | Separations with liquid membranes | 278 |
| 10.8 | Experimental set up for ion transport work | 279 |
| 10.9 | Applications of membrane transport | 280 |
| 10.10 | Novel role of crown and pondant as ionophores | 281 |
| 10.11 | Transportation of ions across membrane | 281 |
| 10.12 | Analytical applications of membrane transport with crown compounds | 282 |
| | Conclusion | 285 |
| | References | 287 |

INDEX **293**
