

# Contents

<b>1. Introduction</b>	<b>1</b>
1.1 Principle of the Scanning Electron Microscope	1
1.2 Electron-Specimen Interactions	3
1.3 Imaging Modes of Scanning Electron Microscopy	7
1.3.1 Secondary Electrons (SE)	7
1.3.2 Backscattered Electrons (BSE)	8
1.3.3 Specimen Current	8
1.3.4 Transmitted Electrons	9
1.3.5 Electron-Beam-Induced Current (EBIC)	9
1.3.6 Cathodoluminescence	9
1.3.7 Thermal-Acoustic Wave Mode	10
1.3.8 Imaging with X-Rays	10
1.4 Analytical Modes	10
1.4.1 Crystal Structure and Orientation	10
1.4.2 Elemental Analysis	11
 <b>2. Electron Optics of a Scanning Electron Microscope</b>	 <b>13</b>
2.1 Electron Guns	13
2.1.1 Thermionic Electron Guns	13
2.1.2 Field Emission Guns	17
2.1.3 Measurement of Gun Parameters	18
a) Two-Diaphragm Method	19
b) Crossover-Projection Method	19
c) Electron-Probe Diameter Method	20
2.2 Electron Optics	20
2.2.1 Electron Lenses	20
2.2.2 Lens Aberrations	23
a) Spherical Aberration	23
b) Chromatic Aberration	23
c) Axial Astigmatism	25
d) Diffraction Error	26
e) Wave Aberration of an Electron Lens	26
2.2.3 Geometric Optical Theory of Electron-Probe Formation	27
2.2.4 Wave-Optical Theory of Electron-Probe Formation	31
2.2.5 Stabilisation of the Electron-Probe Current	35

2.3	Electron Beam Deflection Modes . . . . .	36
2.3.1	Electron Beam Deflection by Transverse Fields . . . . .	36
2.3.2	Scanning, Magnification and Rocking . . . . .	38
2.3.3	Electron Beam Blanking and Chopping . . . . .	40
	a) Blanking of the Beam by the Wehnelt Bias . . . . .	41
	b) Blanking by Deflection Across a Diaphragm . . . . .	41
	c) Travelling Wave Structures and Reentrant Cavities . . . . .	42
	d) Deflection Across the Final Aperture Image (FAI) . . . . .	42
2.4	Focusing . . . . .	44
2.4.1	Focusing and Correction of Astigmatism . . . . .	44
2.4.2	Depth of Focus . . . . .	47
2.4.3	Dynamic and Automatic Focusing . . . . .	49
2.4.4	Resolution and Electron-Probe Size . . . . .	50
	a) Rayleigh Criterion . . . . .	51
	b) Edge Resolution . . . . .	51
	c) Radial Intensity Distribution . . . . .	52
	d) Maximum Spatial Frequency . . . . .	52
<b>3.</b>	<b>Electron Scattering and Diffusion . . . . .</b>	<b>57</b>
3.1	Elastic Scattering . . . . .	57
3.1.1	Differential Cross-Section . . . . .	57
3.1.2	Classical Mechanics of Electron-Nucleus Scattering . . . . .	59
3.1.3	The Schrödinger and Pauli-Dirac Equations . . . . .	62
3.1.4	Quantum Mechanics of Scattering . . . . .	64
3.1.5	Rutherford Scattering at a Screened Nucleus . . . . .	66
3.1.6	Exact Mott Cross-Sections . . . . .	70
3.2	Inelastic Scattering . . . . .	73
3.2.1	Electron Excitation Processes and Energy Losses . . . . .	73
3.2.2	Electron-Electron Collisions . . . . .	75
3.2.3	Quantum Mechanics of Inner-Shell Ionisation . . . . .	77
3.2.4	Angular Distribution of Total Inelastic Scattering . . . . .	81
3.3	Multiple Scattering Effects . . . . .	82
3.3.1	Mean-Free-Path Length . . . . .	82
3.3.2	Angular Distribution of Transmitted Electrons . . . . .	84
3.3.3	Spatial Beam Broadening . . . . .	87
3.3.4	Continuous-Slowing-Down Approximation . . . . .	89
3.3.5	Distribution of Energy Losses . . . . .	93
3.4	Electron Diffusion . . . . .	96
3.4.1	Transmission and Electron Range . . . . .	96
3.4.2	Spatial and Depth Distribution of Energy Dissipation . . . . .	100
3.4.3	Diffusion Models . . . . .	105
	a) Everhart's Single-Scattering Model . . . . .	105
	b) Archard's Point-Source Diffusion Model . . . . .	107
	c) Thümmel's Continuous Diffusion Model . . . . .	107
	d) Combination of Models . . . . .	108

3.4.4 General Transport Equation . . . . .	108
3.4.5 Special Solutions of the Transport Equation . . . . .	110
3.4.6 Monte Carlo Calculations . . . . .	113
3.5 Specimen Heating and Damage . . . . .	117
3.5.1 Specimen Heating . . . . .	117
3.5.2 Charging of Insulating Specimens . . . . .	119
3.5.3 Radiation Damage of Organic and Inorganic Specimens . . . . .	124
3.5.4 Contamination . . . . .	125
<b>4. Emission of Electrons and X-Ray Quanta . . . . .</b>	<b>128</b>
4.1 Backscattered Electrons . . . . .	128
4.1.1 Measurement of the Backscattering Coefficient and the Secondary Electron Yield . . . . .	128
4.1.2 Backscattering from Self-Supporting and Coating Films . . . . .	131
4.1.3 Backscattering from Solid Specimens . . . . .	135
4.1.4 Energy Distribution of Backscattered Electrons and Low-Loss Electrons . . . . .	139
4.2 Secondary Electrons . . . . .	143
4.2.1 Dependence of Secondary Electron Yield on Beam and Specimen Parameters . . . . .	143
4.2.2 Physics of Secondary-Electron Emission . . . . .	147
4.2.3 Contribution of Backscattered Electrons to the Secondary Electron Yield . . . . .	151
4.2.4 Statistics of SE and BSE Emission . . . . .	155
4.3 X-Ray and Auger Electron Emission . . . . .	158
4.3.1 X-Ray Spectra . . . . .	158
4.3.2 The X-Ray Continuum . . . . .	160
a) Angular Distribution . . . . .	161
b) Energy Distribution . . . . .	162
c) Polarisation . . . . .	162
d) Continuous X-Ray Emission from a Solid Target . . . . .	163
4.3.3 The Characteristic X-Ray Spectrum . . . . .	164
4.3.4 Absorption of X-Rays . . . . .	169
a) Elastic or Thomson Scattering . . . . .	169
b) Inelastic or Compton Scattering . . . . .	170
c) Photoelectric Absorption . . . . .	170
4.3.5 Auger Electron Emission . . . . .	172
<b>5. Detectors and Signal Processing . . . . .</b>	<b>176</b>
5.1 Scintillation Detectors and Multipliers . . . . .	176
5.1.1 Scintillation Materials . . . . .	176
5.1.2 Detection of Secondary Electrons by a Scintillator- Photomultiplier Combination . . . . .	178
5.1.3 Detection of Backscattered Electrons by Scintillators and Conversion to Secondary Electrons . . . . .	180

5.1.4	Electron Channel Multipliers . . . . .	182
5.1.5	Noise Introduced by a Scintillator-Photomultiplier Combination . . . . .	182
5.2	Current Measurements and Semiconductor Detectors . . . . .	185
5.2.1	Measurement of Electron-Probe and Specimen Currents . . . . .	185
5.2.2	Surface Barrier and p–n Junction Diodes . . . . .	186
5.2.3	The Electronic Circuit and Noise of Semiconductor Detectors . . . . .	190
5.3	Electron Spectrometers and Filters . . . . .	193
5.3.1	Types of Electron Spectrometer . . . . .	193
5.3.2	Secondary Electron Spectrometers . . . . .	196
5.3.3	Energy Spectrometers for Auger and Backscattered Electrons . . . . .	198
5.4	Spectrometers and Detectors for X-Rays and Light Quanta . . . . .	200
5.4.1	Wavelength-Dispersive X-Ray Spectrometer . . . . .	200
5.4.2	Energy-Dispersive X-Ray Spectrometer . . . . .	202
5.4.3	Electronic Circuit of an Energy-Dispersive Spectrometer . . . . .	206
5.4.4	Comparison of Wavelength- and Energy-Dispersive Spectrometers . . . . .	209
5.4.5	Detection and Spectrometry of Light Quanta . . . . .	210
5.5	Image Recording and Processing . . . . .	213
5.5.1	Observation and Recording on Cathode-Ray Tubes . . . . .	213
5.5.2	Analogue Signal-Processing Methods . . . . .	216
5.5.3	Digital Image Acquisition . . . . .	220
5.5.4	Digital Image Processing . . . . .	221
<b>6.</b>	<b>Imaging with Secondary and Backscattered Electrons . . . . .</b>	<b>227</b>
6.1	Secondary Electron Imaging Mode . . . . .	227
6.1.1	The Collection of Secondary Electrons . . . . .	227
6.1.2	Topographic Contrast . . . . .	231
6.1.3	Material Contrast . . . . .	235
6.1.4	Detector Strategies for the SE Mode . . . . .	237
	a) Suppression of the Externally Generated SE . . . . .	237
	b) Additional Electrodes for Angular Selection . . . . .	237
	c) Two-Detector System . . . . .	238
	d) Difference Between the SE and BSE Signals . . . . .	243
	e) Separation of the BSE Contribution by Electron Optics . . . . .	243
6.1.5	Resolution and Contrast in the Secondary Electron Mode . . . . .	243
6.2	Backscattered Electron Imaging Modes . . . . .	244
6.2.1	Collection of Backscattered Electrons . . . . .	244
6.2.2	Topographic and Material Contrast with Backscattered Electrons . . . . .	245
6.2.3	Channelling or Crystal Orientation Contrast . . . . .	247
6.2.4	Multiple Detector System for Backscattered Electrons . . . . .	249
6.2.5	Quantitative Information from the BSE Signal . . . . .	252

6.2.6	Energy-Filtering of Backscattered Electrons . . . . .	254
6.2.7	Resolution and Contrast of the Backscattered Electron Mode . . . . .	255
6.2.8	The Specimen-Current Mode . . . . .	256
6.3	Imaging and Measurement of Magnetic Fields . . . . .	257
6.3.1	Type-1 Magnetic Contrast Created by Secondary Electrons	257
6.3.2	Type-2 Magnetic Contrast Created by Backscattered Electrons . . . . .	260
6.3.3	Measurement of Magnetic Fields by the Deflection of Primary Electrons . . . . .	263
6.4	Voltage Contrast . . . . .	264
6.4.1	Qualitative Voltage Contrast . . . . .	264
6.4.2	Quantitative Measurement of Surface Potential . . . . .	266
6.4.3	Stroboscopic Measurement of Voltages . . . . .	269
6.4.4	Voltage Contrast on Ferroelectrics and Piezoelectrics . . . . .	270
<b>7.</b>	<b>Electron-Beam-Induced Current, Cathodoluminescence and Special Techniques . . . . .</b>	<b>272</b>
7.1	Electron-Beam-Induced Current (EBIC) Mode . . . . .	272
7.1.1	EBIC Modes and Specimen Geometry . . . . .	272
7.1.2	Charge Carrier Generation, Diffusion and Collection . . . . .	274
7.1.3	Quantitative Measurement of Semiconductor Parameters	280
7.1.4	EBIC and EBIV in Semiconductors and Insulators Without a Depletion Layer . . . . .	283
7.1.5	EBIC Imaging of Depletion Layers and Defects . . . . .	286
7.1.6	Radiation Damage Effects in Semiconductor Devices . . . . .	288
7.2	Cathodoluminescence . . . . .	289
7.2.1	Basic Mechanisms of Cathodoluminescence . . . . .	289
7.2.2	Quantitative Cathodoluminescence of Semiconductors . . . . .	292
7.2.3	Cathodoluminescence Imaging Mode . . . . .	296
7.2.4	Cathodoluminescence of Organic Specimens . . . . .	300
7.3	Special Techniques in SEM . . . . .	301
7.3.1	Transmitted Electron Mode . . . . .	301
7.3.2	Scanning Electron Mirror Microscopy . . . . .	302
7.3.3	Environmental and Atmospheric Scanning Electron Microscopy . . . . .	305
7.3.4	Scanning Electron Acoustic Microscopy . . . . .	306
7.3.5	Scanning Electron Microscopy Using Polarized Electrons	309
7.3.6	Electron-Beam Lithography . . . . .	311
<b>8.</b>	<b>Crystal Structure Analysis by Diffraction . . . . .</b>	<b>313</b>
