Contents

1. Introduction 1

2. Elements of Analysis, Geometrical Optics, and Kinematics 4
2.1 Review of Some Basic Concepts of Tensor Analysis 4
2.1.1 Dyadics, Derivatives, and Projectors 4
2.1.2 Calculus on Surfaces 11
2.2 Introduction to Some Elements of Geometrical Optics 19
2.2.1 Wave Equation, Eikonal, and Ray Equation 20
2.2.2 Refraction at Interfaces 28
2.3 Kinematics of Deformation 37
2.3.1 General Equations for the Deformation of a Body 37
2.3.2 Deformation of a Surface and a Thin Body 40

3. Elements of Holography and Image Modification 48
3.1 Formation and Aberration of the Image at the Reconstruction. Coupled-Wave Theory 48
3.1.1 Image Formation in Standard Holography 48
3.1.2 Image Formation of a Point Source for a Modification at the Reconstruction 52
3.1.3 Bragg Condition and Coupled-Wave Theory for Volume Holograms 63
3.2 Deformation and Distortion of the Image of an Object at the Reconstruction 75
3.2.1 Primary Seidel Aberrations for a Rotational Symmetric Modification 75
3.2.2 Apparent Deformation of an Image and Duality in Holography 84
3.2.3 Deformation of an Image in Space 91
3.3 Particular Modifications at the Reconstruction 101
3.3.1 Basic Concepts of Cylindrical Composite Holograms 101
3.3.2 Small Modifications 104

4. Holographic Interferometry or Fringe Interpretation 110
4.1 Basic Relations for Deformed Opaque Bodies and Isotropic Nonhomogeneous Transparent Media 111

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.1.1 Optical Path Difference and Its Derivative for a Deformed Opaque Object . . . 111
4.1.2 Optical Path Difference and Its Derivative for a Transparent Isotropic Medium with a Varying Index of Refraction. The Analogy . . . 118
4.1.3 Problem of Inversion . . . 127
4.2 Fringe Visibility and Localization . . . 131
4.2.1 Theory of Homologous Rays . . . 131
4.2.2 Visibility and Shift of Fringes for a Finite Aperture . . . 136
4.2.3 Time Dependent Effects . . . 144

5. Modification at the Reconstruction in Holographic Interferometry . . . 151
5.1 Modifications with a Single Reference Source and a Single Hologram . . . 151
5.1.1 Large Modification in the Double-Exposure Method . . . 151
5.1.2 Two Close Wavelengths at the Recording. Holographic Contouring . . . 156
5.1.3 Small Modifications in the Real-Time Technique . . . 160
5.2 Modifications with Two Reference Sources . . . 164
5.2.1 General Equations. Wavelength Changes with Two Reference Sources . . . 165
5.2.2 Moderate Shifts of Moderately Close Reference Sources . . . 171
5.2.3 Derivatives of the Path Difference for Two Moderately Close Reference Sources: Applications . . . 175

References . . . 185
