1	Introduction	1
1.1	Approach	1
1.2	Main Contributions	2
1.3	Chapter by Chapter Overview	3
2	Literature Survey	5
2.1	Introduction	5
2.2	Feature Detection	6
2.2.1	Quality Criteria for Feature Detectors	6
2.2.2	Review of Edge Detection	6
2.2.3	Choices	8
2.3	Image Modelling	8
2.4	Visual Servoing	9
2.5	Camera Configuration	11
2.6	Hybrid Position/Force Control	11
2.7	Sensor Integration	12
2.8	Relation to This Work	14
3	Framework	17
3.1	Hybrid Control Structure	17
3.1.1	Example	19
3.1.2	Control Scheme	20
3.1.3	Robot with Joint Controller	20
3.2	Theoretical 2D Contour Following	23
3.2.1	Notations	23
3.2.2	Non-rotating Task Frame/Straight Contour	23
3.2.3	Rotating Task Frame/Straight Contour	25
3.2.4	Rotating Task Frame/Circular Contour	25
3.2.5	Conclusion	29

3.3	Dynamic Control Aspects	29
3.3.1	Vision Control Loop	30
3.3.2	Force Control Loop	31
3.4	Force Sensing	33
3.5	Tracking Error Identification	35
3.6	Relative Area Contour Detection	37
3.7	ISEF Edge Detection	40
3.8	Contour Modelling and Control Data Extraction	43
3.8.1	The Tangent Model	44
3.8.2	Comparison	45
3.8.3	Conclusion	48
3.9	Camera Model and Calibration	48
3.9.1	Used Camera Model	48
3.9.2	Calibration	49
3.9.3	Tsai's Model and Parameters	49
3.9.4	Tsai's Setup	50
3.9.5	Used Setup	51
3.9.6	Used Procedure	51
3.10	Conclusion	54
4	Classification	55
4.1	Introduction	55
4.2	Adopted Restrictions	56
4.3	Tool/Camera Configurations	58
4.4	Shared Control Types	61
4.5	Combined Vision/Force Task Examples	64
4.5.1	Traded Control Example	65
4.5.2	Hybrid and Shared Control Examples	66
4.6	Conclusion	71
5	Visual Servoing: A 3D Alignment Task	73
5.1	Strategy	73
5.1.1	3D Alignment Using a Circle	74
5.1.2	3D Alignment Using an Ellipse	77
5.1.3	3D Alignment Using a Rectangle	78
5.2	Used Algorithms	81
5.3	Experimental Results	82
5.3.1	Experimental Setup	82
5.3.2	Global Remarks	82
5.3.3	Circle Alignment Task	83
5.3.4	Ellipse Alignment Task	84
5.3.5	Rectangle Alignment Task	84
5.4	Conclusion	88

6	Planar Contour Following of Continuous Curves	89
6.1	Introduction	89
6.2	EOL Setup	90
6.3	Task Specification	91
6.4	Detailed Control Approach	92
6.4.1	Double Contact Control	92
6.4.2	Matching the Vision Data to the Task Frame	94
6.4.3	Contour Measurement	94
6.4.4	Tool Position Measurement	97
6.4.5	Matching	97
6.4.6	Calculating the Feedforward Signal	98
6.5	Experiments	100
6.5.1	Experimental Setup	100
6.5.2	Results	101
6.6	Conclusion	101
7	Planar Contour Following at Corners	105
7.1	Introduction	105
7.2	Path Measurement and Corner Detection	105
7.3	Augmented Control Structure	108
7.4	Experimental Results	110
7.5	Conclusion	112
8	Additional Experiments	115
8.1	Introduction	115
8.2	Traded Control in EOL	115
8.3	Shared Control in Non-parallel ECL	116
8.4	3D Path in Fixed EOL	118
8.5	Conclusion	119
9	Conclusion	123
9.1	Main Contributions	124
9.2	Limitations and Future Work	127
A	Derivations	129
A.1	Frames and Homogeneous Transformations	129
A.2	Screw Transformations	130
A.3	Denavit-Hartengberg for KUKA361	131
A.3.1	Formalism	132
A.3.2	KUKA361	132
A.4	Point Symmetry with Relative Area Method	133
A.5	Relative Area Algorithms	136

XVIII Contents

A.6	Arc Following Simulation	137
A.6.1	The System	137
A.6.2	The Sensor	139
A.6.3	The Controller	140
A.6.4	Parameters	140
A.6.5	Some Results	140
B	Contour Fitting	143
B.1	The Tangent Model	143
B.2	Full Second Order Function	144
B.3	Interpolating Polynomial	145
B.4	Third Order Non-interpolating Polynomial	145
B.5	Interpolating Cubic Splines	146
B.6	Parameterized Representation	149
B.7	Conclusion	151
B.8	Graphical User Interface	152
C	Experimental Validation of Curvature Computation	155
D	Image Processing Implementation on DSP	159
E	Technical Documentation	161
E.1	Sinusoidal Contour	161
E.2	‘Constant-Curved’ Contour	162
E.3	Camera Mounting – ‘Ahead’	162
E.4	Camera Mounting – ‘Lateral’	164
