

CONTENTS · INHALT

<i>Scott Blair, G. W.</i> (Iffley, Oxford/U.K.), Presentation of the Poiseuille gold medal of the international society of biorheology to Prof. A. L. Copley, Lyon, France, 1972	1
In memoriam Arthur Tobolsky	4
<i>Copley, A. L.</i> (New York/USA), Joint inaugural adress: Biorheology as an organized science	5
<i>Petrie, C. J. S.</i> (Newcastle upon Tyne/England), Memory effects in a non-uniform flow: A study of the behavior of a tubular film of viscoelastic fluid (with 1 figure)	8
<i>Waters, N. D.</i> and <i>M. J. King</i> (Liverpool/England), Unsteady flows in elasticoviscous liquids (with 2 figures)	16
<i>Dökmeci, M. C.</i> and <i>M. Alp D.</i> (Evanston/USA), A continuum theory for viscoelastic laminated composite beams (with 1 figure)	22
<i>Doležalová, E.</i> (Praha/CSSR), L'influence du temps dans les solutions statiques (avec 4 figures)	30
<i>Boulanger, P.</i> (Bruxelles/Belgique), Une théorie de l'effet Faraday dans un diélectrique visco-élastique isotrope polarisable	32
<i>Leal, L. G.</i> (Pasadena/USA) and <i>E. J. Hinch</i> (Cambridge/U.K.), Theoretical studies of a suspension of rigid particles affected by Brownian couples (with 3 figures)	43
<i>Sobotka, Z.</i> (Prague/CSSR), Structure, anisotropie et modèles à deux dimensions en rhéologie (avec 6 figures)	49
<i>Brankov, G.</i> and <i>N. Petrov</i> (Sofia/Bulgaria), Electromechanical interaction in viscoelastic micropolar medium	57
<i>Ting, T. C. T.</i> (Chicago, Illinois/USA), A moving punch on an infinite viscoelastic layer (with 1 figure)	66
<i>Chezeaux, M.</i> (Marseille/France), Ecoulement à travers un milieu poreux isotrope (avec 4 figures)	71
<i>Ebert, F.</i> (Erlangen/Deutschland), Une solution similaire pour l'écoulement dans la couche limite d'un fluide polaire (avec 3 figures)	76
<i>Currie, P. K.</i> (Coleraine/Northern Ireland), The orientation of liquid crystals by temperature gradients	81
<i>Axelrad, D. R., D. Atack</i> and <i>J. W. Provan</i> (Montreal and Quebec/Canada), Microrheology of fibrous systems (with 4 figures)	86
<i>Axelrad, D. R.</i> and <i>J. W. Provan</i> (Montreal/Canada), Microrheology of crystalline media	93
<i>Danilova, I. N.</i> and <i>T. V. Sokolova</i> (Moscow/USSR), Experimental and theoretical investigation of creep of rigid polymers on torsion (with 5 figures)	99
<i>Mussatti, F. G.</i> and <i>C. W. Macosko</i> (Minneapolis/USA), Rheology of network forming systems (with 7 figures and 2 tables)	105
<i>Spencer, A. J. M.</i> and <i>M. R. Kingston</i> (Nottingham/England), Plane mechanics and kinematics of compressible ideal granular materials	110
<i>Avula, X. J. R.</i> (Rolla/USA), Application of large elastic deformation theory to the calculation of liquid drop shapes of same polymers (with 8 figures and 2 tables)	116
<i>Kaye, A.</i> (Manchester/England), The shape of a liquid surface between rotating concentric cylinders (with 3 figures)	122

*) Die Seitenzahlen beziehen sich auf die fetten Zahlen am Fuße.

The page numbers quoted in these contents are that to be found **bold typed** at the bottom of each page!

<i>Cobble, M. H., P. R. Smith, and G. P. Mulholland</i> (Las Cruces, New Mexico/USA), Nonlinear motion equations for a Non-Newtonian incompressible fluid in an orthogonal coordinate systems (with 3 figures)	128
<i>Cousins, R. R.</i> (Teddington, Middlesex/England), Stability of plane Poiseuille flow of slightly viscoelastic fluids (with 6 figures)	133
<i>Oka, S.</i> (Yokohama/Japan), Pressure development in a non-Newtonian flow through a tapered tube (with 2 figures)	140
<i>Cheng, D. C.-H.</i> (Stevenage, Herts./U.K.), A differential form of constitutive relation for thixotropy	144
<i>Hajal, M.</i> (Beyrouth/Liban), Comportement des matériaux plastiques parfaits, non visqueux (avec 3 figures)	150
<i>Pearson, J. R. A.</i> (Cambridge/U.K.) and <i>Y. T. Shah</i> (Pittsburgh, Pennsylvania/USA), On the stability of non-isothermal flow in channels (with 4 figures)	156
<i>Guélin, P.</i> (Grenoble/France), Sur la résolution numérique des problèmes à grandes déformations élastiques: cas de la symétrie sphérique (avec 1 figure)	161
<i>Goldstein, Ch. and W. R. Schowalter</i> (Princeton/USA), Nonlinear effects in the unsteady flow of viscoelastic fluids (with 7 figures)	169
<i>Kamal, M. R. and H. Nyun</i> (Montreal/Canada), The effect of pressure on the shear viscosity of polymer melts (with 5 figures)	179
<i>Marrucci, G., G. Titomanlio</i> (Palermo/Italia) and <i>G. C. Sarti</i> (Napoli/Italia), Testing of a constitutive equation for entangled networks by elongational and shear data of polymer melts (with 6 figures)	185
<i>Ciferri, A.</i> (Genoa/Italy), Comments on recent results bearing on the rubber elasticity theory	192
<i>Huet, C.</i> (Paris/France), Application à la viscoélasticité non linéaire du calcul symbolique à plusieurs variables	195
<i>Cristescu, N.</i> (Bucharest/Romania), Rheological aspects in plasticity (with 4 figures)	205
<i>Bernstein, B.</i> (Chicago/USA), On rheological relations (with 2 figures)	211

<i>Tackels, G. and M. J. Crochet</i> (Louvain-La-Neuve/Belgium), Thermal stresses during annealing of a glass ribbon (with 5 figures)	246
<i>Prod'homme, M.</i> (Paris/France), Viscosité des verres présentant une séparation de phases (avec 5 figures and 3 tableaux)	253
<i>Ohlberg, S. M.</i> (Harmarville, Pennsylvania/USA) and <i>T. C. Woo</i> (Pittsburgh, Pennsylvania/USA), Thermal stress analysis of glass with temperature dependent coefficient of expansion (with 4 figures)	261
<i>Manfrè, G.</i> (Novara/Italia), Rheology on the drawing zone in glass spinning (with 10 figures and 2 tables)	265

<i>Vinogradov, G. V.</i> (Moscow/USSR), Critical regimes of deformation of liquid polymeric systems (with 18 figures and 2 tables)	273
<i>Kröner, E.</i> (Stuttgart/Germany), The rheological behaviour of metals (with 28 figures)	290
<i>Mandel, J.</i> (Paris/France), Essai de définition de quelques comportements rhéologiques (avec 3 figures)	309
<i>Bismuth, W.</i> (Marseille/France), L'acoustique en rhéologie et ses applications (avec 4 figures)	314
<i>Roscoe, R.</i> (Newcastle upon Tyne/U.K.), Isotropic composites with elastic or viscoelastic phases: General bounds for the moduli and solutions for special geometries (with 4 figures)	320
<i>Habib, P.</i> (Paris/France), Comportements compares des sols et des roches (avec 9 figures)	328
<i>Koh, Severino L.</i> (Indiana/USA), Theory of a second-order microfluid (with 2 figures)	334
<i>Philippoff, W.</i> (Linden, New Jersey/U.S.A.), Recoverable shear in rheology (with 2 tables)	341
<i>Chevalier, Y. et V. Tuong</i> (Saint Ouen/France), Calcul de prévision des matériaux composites viscoélastiques renforcés de fibres unidirectionnelles (avec 4 figures et 1 table)	346
<i>Lamb, J.</i> (Glasgow/Scotland), Mechanical retardation and relaxation in liquids (with 16 figures)	354
<i>LeRoy, Ph. et J. M. Pierrard</i> (Grenoble/France), Fluides viscoélastiques non linéaires satisfaisant à un principe de superposition étude théorique et expérimentale (avec 6 figures)	365
<i>Simha, R. and L. A. Utracki</i> (Cleveland/USA and Montreal/Canada), The viscosity of concentrated polymer solutions: Corresponding states principles (with 7 figures and 1 table)	371
<i>Meixner, J.</i> (Aachen/Germany), The entropy problem in thermodynamics of processes	381
<i>Van Geen, R. E.</i> (Brussel/Belgique), Analyse macro- et microrhéologique de certains effets observés en photoélasticité (avec 8 figures)	384
<i>Predeleanu, M.</i> (Bucharest/Romania), Mathematical models in rheology of the bodies with memory and ageing	395
<i>Malkin, A. Ya.</i> (Moscow/USSR), General characteristics of the visco-elastic properties of flexible-chain polymer solutions over a wide range of concentrations (with 20 figures)	402
<i>Peterlin, A.</i> (Triangle Park, North Carolina/USA), Molecular model of internal viscosity (with 4 figures and 1 table)	412
<i>Stevens, J. M.</i> (Eindhoven/The Netherlands), Rheological properties of alkali borate glasses (with 25 figures)	419
<i>Kirschke, K.</i> (Berlin, Federal Republic of Germany), Documentation and information on rheology: Present state and development in its design and application (with 1 table)	432
<i>Galvin, G. D., J. F. Hutton, B. Jones, H. Naylor, M. C. Phillips, G. Powell, and E. Wyn-Jones</i> (Chester and Salford/England), Experience in making rheological measurements at high pressures (with 3 figures)	435
<i>Knight, D. G. and K. Walters</i> (Aberystwyth/U.K.), Nearly viscometric flows in the new rheometers (with 4 figures)	440
<i>Higman, R. W.</i> (Stevenage, Hertfordshire/U.K.), A new torque and normal thrust measuring system for the Weissenberg rheogoniometer (with 6 figures)	449
<i>Godfrey, J. C.</i> (Bradford/England), Steady shear measurement of thixotropic fluid properties (with 3 figures)	456
<i>Kearsley, E. A.</i> (Washington, D.C./USA), A test sample to standardize measurements of normal stress (with 3 figures and 1 table)	462

<i>Dealy, J. M., J. F. Petersen, and T.-T. Tee</i> (Montreal/Canada), A concentric-cylinder rheometer for polymer melts (with 3 figures)	466
<i>Vinh Tuong, N. P.</i> (Saint Ouen/France), Sur la mesure des constantes viscoélastiques des plaques de matériaux composites par les ultrasons (avec 3 figures)	475
<i>Ferrara, Michel</i> (Saint-Fons/France), Pendule de torsion automatique (avec 4 figures)	479
<i>Krieger, I. M. and Tyan-Faung Niu</i> (Cleveland/USA), A rheometer for oscillatory studies of nonlinear fluids (with 6 figures)	483
<i>Gleissle, W. und H. Reichert</i> (Karlsruhe/Deutschland), Kurzzeit-Rotations-Rheometer zur Messung von hohen Schub- und Normalspannungen bei großen Schergefällen (mit 3 Abbildungen und 1 Tabelle)	488
<i>Code, R. K. and J. D. Raal</i> (Kingston/Canada), Rates of shear in coaxial cylinder viscometers (with 11 figures)	494
<i>Putzker, S.</i> (Freital/DDR), Rotating viscosimeters for process control (with 3 figures)	504
<i>Miyakawa, Shintaro and Takao Ishii</i> (Tokyo/Japan), Development and application of micro pressure-pickups to measure point-pressure of elastomer flow (with 6 figures)	509
<i>Drislane, C. J., J. P. De Nicola, W. M. Wareham, and R. I. Tanner</i> (Canton, Mass./U.S.A.), A new versatile rheological instrument: Design, testing and data analysis (with 3 figures and 1 table)	512
<i>Uzomaka, Osondu J.</i> (Rickmansworth, Herts./England), A concrete rheometer and its application to a rheological study of concrete mixes (with 15 figures and 1 table)	520
<i>Rothenspieler, A.</i> (Duisburg/Deutschland), Meßsystem für verarbeitungstechnische Eigenschaften von Kunststoffen (mit 9 Abbildungen)	530
<i>Harrison, G.</i> (Glasgow/U.K.), A low frequency torsional rheometer (with 3 figures)	536
<i>Hunston, D. L.</i> (Evanston and Washington, D.C./U.S.A.), Some graphical methods for the analysis of mechanical and dielectric relaxation data (with 3 figures and 2 tables)	541
