

Table of Contents

On Multiway Cut Parameterized above Lower Bounds	1
<i>Marek Cygan, Marcin Pilipczuk, Michał Pilipczuk, and Jakub Onufry Wojtaszczyk</i>	
Parameterized Complexity of Firefighting Revisited	13
<i>Marek Cygan, Fedor V. Fomin, and Erik Jan van Leeuwen</i>	
Parameterized Complexity in Multiple-Interval Graphs: Domination	27
<i>Minghui Jiang and Yong Zhang</i>	
A Faster Algorithm for Dominating Set Analyzed by the Potential Method	41
<i>Yoichi Iwata</i>	
Contracting Graphs to Paths and Trees	55
<i>Pinar Hegghernes, Pim van 't Hof, Benjamin L��v��que, Daniel Lokshantov, and Christophe Paul</i>	
Increasing the Minimum Degree of a Graph by Contractions	67
<i>Petr A. Golovach, Marcin Kami��ski, Dani��l Paulusma, and Dimitrios M. Thilikos</i>	
Planar Disjoint-Paths Completion	80
<i>Isolde Adler, Stavros G. Kolliopoulos, and Dimitrios M. Thilikos</i>	
Sparse Solutions of Sparse Linear Systems: Fixed-Parameter Tractability and an Application of Complex Group Testing	94
<i>Peter Damaschke</i>	
New Upper Bounds for MAX-2-SAT and MAX-2-CSP w.r.t. the Average Variable Degree	106
<i>Alexander Golovnev</i>	
Improved Parameterized Algorithms for above Average Constraint Satisfaction	118
<i>Eun Jung Kim and Ryan Williams</i>	
On Polynomial Kernels for Structural Parameterizations of Odd Cycle Transversal	132
<i>Bart M.P. Jansen and Stefan Kratsch</i>	
Kernel Bounds for Path and Cycle Problems	145
<i>Hans L. Bodlaender, Bart M.P. Jansen, and Stefan Kratsch</i>	

On the Hardness of Losing Width	159
<i>Marek Cygan, Daniel Lokshtanov, Marcin Pilipczuk, Michał Pilipczuk, and Saket Saurabh</i>	
Safe Approximation and Its Relation to Kernelization	169
<i>Jiong Guo, Iyad Kanj, and Stefan Kratsch</i>	
Simpler Linear-Time Kernelization for Planar Dominating Set	181
<i>Torben Hagerup</i>	
Linear-Time Computation of a Linear Problem Kernel for Dominating Set on Planar Graphs	194
<i>René van Bevern, Sepp Hartung, Frank Kammer, Rolf Niedermeier, and Mathias Weller</i>	
Tight Complexity Bounds for FPT Subgraph Problems Parameterized by Clique-Width	207
<i>Hajo Broersma, Petr A. Golovach, and Viresh Patel</i>	
Finding Good Decompositions for Dynamic Programming on Dense Graphs	219
<i>Eivind Magnus Hvidevold, Sadia Sharmin, Jan Arne Telle, and Martin Vatshelle</i>	
Parameterized Maximum Path Coloring	232
<i>Michael Lampis</i>	
On Cutwidth Parameterized by Vertex Cover	246
<i>Marek Cygan, Daniel Lokshtanov, Marcin Pilipczuk, Michał Pilipczuk, and Saket Saurabh</i>	
Twin-Cover: Beyond Vertex Cover in Parameterized Algorithmics	259
<i>Robert Ganian</i>	
Author Index	273
