

CONTENTS

	Foreword.....7
	List of participants.....8
	Programme of the conference.....11
ALBRECHT, E.;ESCHMEIER, J.; NEUMANN, M.N.	Some topics in the theory of decomposable operators.....15
ALTOMARE, F.	Korovkin closures in Banach algebras....35
APOSTOL, C.;BERCOVICI, H.; FOIAŞ, C.;PEARCY, C.	On the theory of the class A_{K_0} with applications to invariant subspaces and the Bergman shift operator.....43
BARRÍA, J.; DAVIDSÓN, K.R.	Examples of chains of invariant subspaces.....51
CEAUŞESCU, ZOIA; SUCIU, I.	Isometric dilations of commuting contractions.IV.....55
CHEVREAU, B.	Recent results on reflexivity of operators and algebras of operators.....79
CONSTANTINESCU, T.	Schur analysis for matrices with finite number of negative squares.....87
CURTO, R.E.;MUHLY, P.S.; NAKAZI, T.	Uniform algebras, Hankel operators and invariant subspaces.....109
DAZORD, J.	Contractions génériques.....121
DOUGLAS, R.G.	Hilbert modules over function algebras.....125
HELSON, H.	Differential equation of an inner function. II.....141
JONAS, P.	On a class of unitary operators in Krein space.....151
KAILATH, T.; BRUCKSTEIN, A.M.	Naimark dilations, state-space generators and transmission lines.....173
KÉRCHY, L.	Contractions being weakly similar to unitaries.....187

LANGER, H.	A characterization of generalized zeros of negative type of functions of the class N_k201
LEGISA, P.	Skew-symmetric operators and isometries on a real Banach space with a hyperorthogonal basis.....213
MAGAJNA, B.	On the operator equation $ax + (ax)^* - \lambda x = b$219
NEIDHARDT, H.	On the inverse problem of a dissipative scattering theory.I.....223
OMLADIČ, M.	Some spectral properties of an operator.....239
PUTINAR, M.	Hyponormal operators and eigendistributions.....249
READ, C.J.	The invariant subspace problem: a description with further applications of a combinatorial proof.....275
ROSENBERG, J.	Some results on cohomology with Borel cochains, with applications to group action on operator algebras....301
RUDOL, K.	Spectral mapping theorems for analytic functional calculi.....331
TIMOTIN, D.	Prediction theory and choice sequences: an alternate approach.....341
VUZA, D.	Ideal properties of order bounded operators on ordered Banach spaces which are not Banach lattices.....353
WIDOM, H.	More about pseudodifferential operators on bounded domains.....369
