

CONTENTS

JUNCTION AND DEVICE PHYSICS

Physics of tunneling barriers

T.M. Klapwijk 1

Tunnelspectroscopy of inhomogeneous potential barriers showing resonances exemplified for Nb_2O_5

J. Halbritter 31

Non-thermal noise in ultrasmall area tunnel junction dc SQUIDS

R.T. Wakai and D.J. Van Harlingen 43

Microscopic theory of the Josephson effect in the SNINS and SNIS tunnel junction

V.F. Lukichev, A.A. Golubov and M.Yu Kupriyanov 49

Stationary properties of Josephson SN-N-NS microbridges

V.F. Lukichev, M.Yu. Kupriyanov and A.A. Orlikovsky 55

Alteration of magnetic field dependence for voltage biased SNS Josephson junctions

K.D. Bures and K. Baberschke 59

Behaviour of aluminium microbridges irradiated with microwaves

S. Wang and P.E. Lindelof 65

Automation of numerical analysis of circuits with Josephson tunnel junctions

V.K. Semenov, A.A. Odintsov and A.B. Zorin 71

On a few-degree-of-freedom-model of the Josephson tunneling junction

G. Brunk 77

Direct numerical determination of stationary rotational states in Josephson junctions with arbitrary current phase relation

G. Brunk, H. Lübbig and Ch. Zurrügg 83

Analytical calculation of the inductance of Josephson junctions

J. Buechler and M. Rieger 89

Influence of the Abrikosov's vortices on superconducting tunnel junctions properties

A.A. Golubov and M.Yu. Kupriyanov 95

I-V curves of RF-driven Josephson junctions in the low frequency regime	
C. Vanneste and C.C. Chi	101
Reconstruction of the Josephson junction parameters via its threshold curves	
A. Barone, F. Esposito, V.K. Semenov and R. Vaglio	107
Properties of the lead-alloy Josephson tunnel junctions	
V.Yu. Kistenev, L.S. Kuzmin, A.G. Odintsov, E.A. Polunin and I.Yu. Syromyatnikov	113
Resonant modes in light-sensitive dc SQUIDS	
M. Russo and G. Paternò	119
Resonant modes in refractory baselayer d.c. SQUIDS	
G. Paternò, A.M. Cucolo, G. Modestino and R. Vaglio	125
Quantized flux ϕ_0 in DC-SQUID with $LI_0 \ll \phi_0$	
T. Yamashita	131
Multiple periods and hyperfine features in DC SQUID response	
F. Xu and P.W. Zeng	137
The inductances of R.F. SQUIDS	
P.A.J. de Groot, A.T. Cayless and J.G. Park	141
Nb-Si-Nb tunnel junction RF SQUID	
S.Q. Xue, W.C. Qiao, L.X. Xiao, G.Q. Cui, X.F. Meng, J.Z. Li, X.W. Wu and T.P. Zhang	147
Noise, bandwidth and the resistively shunted junction model of an AC biased SQUID magnetometer	
R.J. Prance, J.E. Mutton, E.P. Shephard, T.D. Clark, H. Prance and T.P. Spiller	151
The asymmetry effect in DC-SQUID	
F.Z. Xu and P.W. Zeng	157
A resistive DC-SQUID	
S.N. Erné, H. Koch and H. Luther	165
Three-terminal non-equilibrium superconducting devices	
R.A. Buhrman	171
Quiteron for logic applications	
I. Iguchi and H. Kashimura	191
Probable coherent oscillations at single-electron tunneling	
D.V. Averin and K.K. Likharev	197

Charge oscillations and Zener noise due to interband transitions in small junctions	
E. Ben-Jacob, Y. Gefen, K. Mullen and Z. Schuss	203
The lifetimes of non-equilibrium dissipative steady states	
E. Ben-Jacob, D.J. Bergman, B.J. Matkowsky and Z. Schuss	219

MACROSCOPIC QUANTUM FLUCTUATIONS

Macroscopic quantum tunnelling and coherence: Their significance for the foundations of physics	
A.J. Leggett	243
Macroscopic quantum effects and quantum noise in Josephson elements	
G. Schön	251
Macroscopic quantum tunneling and quantum coherence in Josephson systems	
H. Grabert	289
Macroscopic quantum effects in the zero voltage state of the current biased Josephson junction	
J. Clarke, M.H. Devoret, D. Esteve and J. Martinis	317
The decay of metastable states in systems with highly damped Josephson junctions	
D.B. Schwartz, B. Sen, C.N. Archie, A.K. Jain and J.E. Lukens	337
Intrinsic tunnel junction properties and Kramers' macroscopic escape problem	
G. Brunk, H. Lübbig and Ch. Zurbügg	343
Influence of thermal fluctuations and biasing forces on Q-factor and amplitude of macroscopic quantum oscillations	
U. Weiss and H. Grabert	349
Macroscopic quantum coherence: An experimental strategy	
C.D. Tesche	355
Macroscopic quantum mechanical behaviour of an A.C. biased SQUID magnetometer	
T.P. Spiller, J.E. Mutton, H. Prance, R.J. Prance, T.D. Clark and R. Nest	361

Behaviour of an AC biased SQUID ring in the quantum mechanical Josephson limit

H. Prance, R.J. Prance, J.E. Mutton, T.P. Spiller,
T.D. Clark and R. Nest 367

Schrödinger equation solutions for a weak link constriction ring

J.E. Mutton, T.P. Spiller, T.D. Clark, R.J. Prance,
H. Prance, P. Croyden and R. Nest 373

CHAOTIC PHENOMENA

Chaos in junctions and devices

J. Kurkijärvi 377

Universal scaling and chaotic behaviour - a Josephson junction analog approach

Y.H. Kao 409

Effect of chaos on the I-V curves of RF-driven Josephson junctions

C.C. Chi and C. Vanneste 419

Observation of multiquantum transitions with intermittency in hysteretic slightly underdamped RF-SQUIDS

M. Odehnal and V. Petříček 425

FLUXON DYNAMICS

Problems of fluxon motion in long Josephson junctions and their applications

F. Irie and K. Yoshida 431

Spatial distribution of the maximum Josephson current in a superconducting tunnel junction

J. Bosch, R. Gross, M. Koyanagi and R.P. Huebener 461

Numerical studies of fluxon dynamics in annular Josephson junction oscillators

F. If, P.L. Christiansen, R.D. Parmentier, O. Skovgaard
and M.P. Soerensen 465

Cavity modes in rectangular Josephson junctions

H. Svensmark 471

Effect of nonlinear damping on the zero field steps of long Josephson tunnel junctions	
M. Scheuermann and C.C. Chi	477
Influence of the lower limit for the fluxon contraction on the I-V characteristic of zero-field singularities in long Josephson junctions	
A. Ferrigno, U. Gambardella and S. Pace	483
Measurements of frequency and linewidth of the radiation emitted from overlap Josephson junctions	
J. Bindslev Hansen, Yu.Ya. Divin, J. Mygind and M.R. Samuelsen	489
Fiske steps in long overlap junctions	
S. Pace, M. Cirillo, B. Savo and E.P. Balsamo	495
RF induced steps in long Josephson junctions	
R. Monaco, D. Andreone, V. Lacquaniti, G. Costabile and S. Pagano	501
Chaos and subharmonic generation in long Josephson junctions	
Yu.Ya. Divin, J. Bindslev Hansen, J. Mygind, O.H. Olsen, N.F. Pedersen and M.R. Samuelsen	507
Fluxon oscillations in intermediate-length Josephson junctions	
S. Pagano, R.D. Parmentier, M.P. Soerensen, P.L. Christiansen, O. Skovgaard, N.F. Pedersen, J. Mygind and M.R. Samuelsen	513
Splitting of the first zero-field step in a Josephson junction of intermediate length	
J. Bindslev Hansen, Yu.Ya. Divin, J. Mygind, M.R. Samuelsen and H. Svensmark	521
FLUX QUANTIZATION IN NORMAL METAL RINGS	
Quantum oscillations in normal metal loops	
M. Büttiker	529
In search of magnetic flux quantization in normal metal rings	
R.A. Webb, S. Washburn, C.P. Umbach and R.B. Laibowitz .	561
$h/2e$ oscillations in the magnetoresistance of normal aluminium rings	
V. Petrashov, B. Nilsson, J. Binslev Hansen and T. Claeson	585

FABRICATION TECHNIQUES

New materials for refractory tunnel junctions:
Fundamental aspects

A.I. Braginski, J.R. Gavaler, M.A. Janocko and
J. Talvacchio 591

NbN based Josephson junctions

A. Shoji 631

Niobium etch products in a CF_4/O_2 plasma

R. Fromknecht, M. Neuhaus and W. Jutzi 659

Fabrication and properties of nitrogen implanted
niobium weak-links

C. Camerlingo, G. Jung, M. Cerdonio, C. Tosello,
S. Vitale and P. Gierłowski 665

Fabrication techniques for thin film Nb_3Ge Josephson
devices

H. Rogalla, B. David and M. Mueck 671

Anodic oxydation: A simple procedure for NbN thin film
characterisation

G. Dousselin, J. Pinel and J. Rosenblatt 685

Tin-Cobalt alloy Josephson junctions

P. Gierłowski, S.J. Lewandowski, R. Sobolewski,
J. Górecka and H. Bielska-Lewandowska 691

DC Magnetron system for the preparation of Niobium thin
films

J. Staśkiewicz, Cz. Szypowski and W. Gulbiński 697

CRYOCOOLERS

Progress in cooling facilities for SQUID applications ?!

C. Heiden 701

Gifford-McMahon cryocooler with a final Joule-Thomson
stage

S. Barbanera 717

Conical plastic cryocooler for SQUIDS

N. Lambert 723

SQUID INSTRUMENTS

Integrated thin film SQUID instruments	
G.B. Donaldson, C.M. Pegrum and R.J.P. Bain	729
Tunnel junction DC SQUID with a planar input coil	
T. Noguchi, N. Ohkawa and K. Hamanaka	761
DC-SQUID with a resistively shunted inductance	
K. Enpuku, K. Yoshida and F. Irie	767
DC-SQUID design for a 25 channel multisensor test circuit	
H. Koch	773
Multiloop planar DC SQUID gradiometer	
S.I. Bondarenko	779
Effect of a superconducting cylinder on the SQUID-magnetometer signal from a magnetic dipole	
H.J.M. ter Brake, P.C. Rem and J. Flokstra	783
Hysteretic AC SQUIDS using tunnel Josephson junctions	
D.A. Butusow, V.K. Kornev, L.S. Kuzmin and N.A. Simonov	791
DC SQUIDS with low 1/F noise	
C.D. Tesche	797
Hysteretic noise simulation of DC SQUIDS with input coil	
D. Drung and W. Jutzi	807
Noise contributions to SQUID circuits due to temperature fluctuations	
J.H. Claassen, S.A. Wolf, D.U. Gubser and T.R. Clem	813
A new R.F. SQUID	
M. Lumley, J.A. Good, R.E. Somekh and J.E. Evetts	823
Application of a DC SQUID to RF amplification: NQR	
C. Hilbert, J. Clarke, T. Sleator and E.L. Hahn	829
SQUID gradiometric detection of defects in ferromagnetic structures	
R.J.P. Bain, G.B. Donaldson, S. Evanson and G. Hayward .	841
Noise optimization of DC SQUID-based wideband amplifiers	
A.A. Dmitriev and O.V. Snigirev	847

Nondestructive evaluation of metallic structures using a SQUID magnetometer	853
H. Weinstock and M. Nisenoff	
SQUID magnetometers for material research	859
D.H.A. Blank, H.J.M. ter Brake and J. Flokstra	
DC SQUID flux focuser	
M.B. Ketchen, W.J. Gallagher, A.W. Kleinsasser, S. Murphy and J.R. Clem	865
Calorimetry at low temperatures using a SQUID	
A.T. Cayless, P.A.J. de Groot and C.N. Guy	873
Detection of NMR Larmor and double Larmor frequency of protons by a SQUID	
M. Kohl, M. Odehnal, V. Petříček and R. Tichý	879
Detection of Schumann resonances with three-axial SQUID magnetometer	
Z. Janů, M. Odehnal, V. Petříček and R. Tichý	885

BIOMAGNETIC INSTRUMENTATION

SQUID measurement techniques in medical diagnosis	891
S.N. Erné	
Use of multisensor SQUID systems in brain research	909
R.J. Ilmoniemi	
Multichannel instrumentation for biomagnetism	919
G.L. Romani, R. Leoni and C. Salustri	
Design of compensated planar input coils for biomagnetic measurements	933
C.D. Tesche	
Design considerations for multichannel SQUID magnetometers	
J. Knuutila, A.I. Ahonen, M.S. Härmäläinen, R.J. Ilmoniemi and M.J. Kajola	939
High-resolution MCG with DC-thin film SQUID'S	
G. Albrecht, H. Nowak, H.G. Zach, W. Haberkorn, K.-H. Berthel, G. Kirsch and W. Vodel	945
Performances of higher order planar gradiometers for biomagnetic source localization	951
S.N. Erné and G.L. Romani	

HF APPLICATIONS

Advances in high frequency applications of superconducting tunnel junctions

S. Rudner and T. Claeson 963

SIS quasiparticle mixer receiver for radio-astronomy applications

K.H. Gundlach, R. Blundell, J. Ibruegger and E.J. Blum . 987

Satellite microwave steps and mixing close to the self-resonance of a Josephson tunnel junction

H. Olsson and T. Claeson 999

Josephson interference and its suppression in SIS mixers operating close to the gap frequency

D. Winkler, T. Claeson and S. Rudner 1005

Quantum fluctuations at quadratic videodetection of microwave radiation using superconducting junctions

I.A. Devyatov, K.K. Likharev and A.B. Zorin 1011

Parametric effects in inductively compensated tunnel junctions

L. Kuzmin, H. Olsson and T. Claeson 1017

Amplifier noise simulation of DC SQUIDS with grounded input coil

D. Drung 1023

X-Band parametric amplifier and microwave SQUID using single-tunnel-junction superconducting interferometer

L.S. Kuzmin, K.K. Likharev, V.V. Migulin, E.A. Polunin and N.A. Simonov 1029

Josephson junction arrays

J. Bindslev Hansen and P.E. Lindelof 1035

Mutual phase locking of the Josephson tunnel junctions

V.K. Kornev, K.K. Likharev, E.S. Soldatov and Yu.P. Tsar'gorodtsev 1059

Dynamic conductance of a two-dimensional array of Josephson junctions

Ch. Leemann, Ph. Lerch, G.-A. Racine, A. Strupler and P. Martinoli 1065

RF SQUID matching to a fifty ohms line: Theory and experiment

D. Robbes, C. Dubuc, J. Lepaisant, D. Bloyet and D. Duret 1071

DIGITAL APPLICATIONS

Configuration of High Speed Superconducting Logic Circuits

H. Yamada 1077

Optimized RCJL family and two-bit full adder

A. DeLustrac, P. Crozat and R. Adde 1097

Resistive single flux quantum logic for the Josephson-junction digital technology

K.K. Likharev, O.A. Mukhanov and V.K. Semenov 1103

Josephson-junction A/D converter using parametric quantrons and redundant coding

S.V. Rylov and V.K. Semenov 1109

Overshoot and rise time simulation of Josephson junction samplers

H. Kratz 1115

A comparison of digital technologies with super- and semi-conductors

P. Wolf 1127

METROLOGICAL APPLICATIONS

Thermometry and standards with Josephson junctions

G. Schuster 1147

Noise thermometer between 1 and 7.2 K using a SQUID magnetometer

R. Malassis and J.J. Veyssie 1157

Stable constant voltage steps between 0.1 and 1.5 V from new series arrays of Josephson tunnel junctions

J. Niemeyer, E. Vollmer, J.H. Hinken and W. Meier 1163

A possible quantum current standard based on a superconducting weak-link

J.C. Gallop and W.J. Radcliffe 1167

VARIOUS APPLICATIONS AND PROPOSALS

Superconductive tunnel structures as radiation detectors A. Barone and K.E. Gray	1173
ESR in situ with a Josephson tunnel junction K. Baberschke and K.D. Bures	1177
The SQUID as a measuring device for the electromagnetic response to gravitational waves R. Schrader	1179
Laboratory experiment for testing the Gravi-Magnetic Hypothesis with Squid-magnetometers A. Harasim, I.v.Ludwiger, W. Kroy and H.Th. Auerbach ...	1183
A superconducting gravity gradiometer A.B. Colquhoun, N.A. Lockerbie and G.B. Donaldson	1191
Gyromagnetic detection of rotation with a ferromagnetic core SQUID M. Cerdonio, A. Goller and S. Vitale	1197
SUMMARY AND CONCLUSIONS	
Summary and conclusions, J. Clarke	1203
SUBJECT INDEX	1213
AUTHOR INDEX	1232
