

Contents

1. A glossary of the categories in which we shall work, and fibre resolutions.	6
2. Pro-objects in the homotopy category.....	20
3. Completions.	25
4. Cohomological criteria for h -isomorphism.....	35
5. Completions and fibrations.	60
6. Homotopy groups of completions.....	70
7. Stable results.	75
8. Hypercoverings.	93
9. The Verdier functor.....	111
10. The fundamental group.....	117
11. A profiniteness theorem.....	124
12. Comparison theorems.....	129

Appendix:

1. Limits.....	147
2. Pro-objects and pro-representable functors.	154
3. Morphisms of pro-objects.....	159
4. Exactness properties of the pro-category.	163
References.....	167
