

CONTENTS

I. SYNTHESIS AND ASSEMBLY

A scheme for the intracellular assembly of human fibrinogen S. Yu, B. Kudryk and C. Redman	3
Evidence that platelet and plasma fibrinogen have the same A-alpha chain gene product C. Southan, I. Knight, H. Ireland and D.A. Lane	15
Fibrinopeptide A and the phosphorylation of fibrinogen O.C. Leeksa, F.M. Meijer-Huizinga and J.A. van Mourik	23

II. STRUCTURE AND FUNCTION

Size and shape of the fibrinogen molecule: crystalline forms of native and modified human fibrinogen R. Gollwitzer and W. Bode	35
The C-terminal polymerisation domain of fibrinogen C. Southan, E. Thompson and D.A. Lane	47
γ -Chain crosslinking of fibrin at DD-trans contact E. Selmayr, W. Thiel and G. Müller-Berghaus	55
Soluble fibrin contains fibrin polymers of different molecular weight. Ultracentrifugation studies at 37°C K.T. Preissner, J. Rötter and G. Müller-Berghaus	61
Relationship of final thickness of fibrin fibers to maximal rate of assembly and to fibrinopeptide B release H. Pirkle, P. Vukasin, I. Theodor and D. Miyada	69

III. CONGENITAL VARIANTS

Fibrinogen New York 1: The structural, functional, and genetic defects and an hypothesis of the role of fibrin in the regulation of coagulation and fibrinolysis C.Y. Liu, P. Wallen and D.A. Handley	79
Fibrinogen Pontoise - a genetically abnormal fibrinogen with defective fibrin polymerisation but normal fibrinopeptide release H. Kaudewitz, A. Henschen, J. Soria and C. Soria	91

Fibrinogen Milano I: Abnormal fibrin polymerization related to a carboxy-terminal defect of the γ -chain (γ -330 Asp $\rightarrow$ Val) P. Reber, M. Furlan, C. Rupp, M. Kehl, A. Henschen, P.M. Manucci and E.A. Beck	97
Fibrinogen "Bergamo I" ($A\alpha$ 16 Arg $\rightarrow$ Cys): Alternative methods for structure elucidation P. Reber, M. Furlan and E.A. Beck	103
Screening small plasma samples by HPLC for abnormalities of fibrinopeptide release C. Southan and D.A. Lane	111
IV. FIBRIN(OGEN) AND FIBRINOLYSIS	
On the role of fibrin in the fibrinolytic system H.R. Lijnen	121
Isolation and characterisation of plasmic degradation products of fibrinogen by high-performance liquid chromatography E. Müller and A. Henschen	137
The acceleration of tissue-type plasminogen activator (t-PA)-mediated activation of plasminogen by fibrinogen cyanogen bromide fragments is species specific W. Nieuwenhuizen and J. Keyser	145
Role of fibrin polymerization in fibrinolysis: Comparison between polymerisable and unpolymerisable fibrins in the potentiating effect of plasminogen activation by tissue-type plasminogen activator (tpA) J. Soria, C. Soria, O. Bertrand, M. Mirshahi, F.W. Dunn, E. Svenson, P. Desvignes, P. Bonnet, M. Samama and J.P. Caen	153
Role of fibrin and its degradation products in the activation of plasminogen by streptokinase and urokinase A. Takada and Y. Takada	159
V. INTERACTIONS WITH CELLS	
The role of fibrinogen in platelet aggregation G. Marguerie, M.H. Ginsberg and E.F. Plow	175
Platelet-associated fibrinogen: Conformational change of fibrinogen induced by its adsorption to platelet-surface C. Soria, J. Soria, M. Mirshahi, C. Boucheix, A. Thomaidis, A. Bernadou, M. Samama and J.P. Caen	185

Migration of cultured endothelial cells in response to fibrinogen E. Dejana, L.R. Languino, S. Colella, A. Erroi, A. Mantovani, G. Marguerie and L. Maes	193
Characteristics of the interactions of fibrinogen and soluble fibrin with cultured endothelial cells U. Delvos, K.T. Preissner and G. Müller-Berghaus	203
Mechanism of fibrin-induced disorganisation of cultured human endothelial cells B. Weimar, U. Delvos, C. Schubring and G. Müller-Berghaus	211
The fibrinogen: red cell interaction and its influence on blood rheology M.W. Rampling	219
Haemorheologic effects of plasmin and thrombin-induced fibrinogen derivatives: An in vitro study G. Palareti, M. Poggi and S. Coccheri	229
Binding of human fibrinogen to streptococci and its role in streptococcal pathogenicity G.S. Chhatwal and H. Blobel	239

VI. ASSAYS TO FIBRIN(OGEN) FRAGMENTS AND THEIR USE

Discrimination between fibrin and fibrinogen by a monoclonal antibody against a synthetic hexapeptide representing the amino-terminus of the alpha-chain of fibrin U. Scheefers-Borchel, G. Müller-Berghaus, P. Fuhge and N. Heimbürger	253
A new enzyme immunoassay of fibrin(ogen) degradation products in plasma using a monoclonal antibody J. Koopman, F. Haverkate, P. Koppert, W. Nieuwenhuizen, E.J.P. Brommer and W.G.C. van der Werf	261
Fibrin(ogen) degradation products. Determination using a monoclonal anti D neo antibody. Advantages in clinical investigation M. Mirshahi, J. Soria, C. Soria, J.Y. Perrot, A. Bernadou and C. Boucheix	271
A monoclonal antibody, specific for human fibrinogen and fibrinopeptide A-containing fragments. Its application in an enzyme-immunoassay for fibrinogen degradation products, suitable for use in plasma P.W. Koppert, C.M.G. Huijsmans, F. Haverkate, J. Engbers, E.J.P. Brommer and W. Nieuwenhuizen	279
A monoclonal antibody against the CNBr-peptide F-CB3 of the A α -chain of human fibrinogen R. Gollwitzer, G.E. Kulbe, D. Gabrijelčič and R.P. Linke	297

XVIII

Clinical aspects of fibrin formation and fibrinolysis
measured with monoclonal antibodies against D-dimer
R. Hafter, R. Schröck, R. von Hugo and H. Graeff 303

Fibrinogen derivatives in acute stroke
J.T. Douglas, G.D.O. Lowe, C.D. Forbes, I. Knight,
D.A. Lane, M.J. Perry and P.J. Gaffney 313

VII. FIBRIN(OGEN) AND DISEASE PATHOLOGY

Triggering of the extrinsic blood coagulation system
H. Prydz 325

Extravascular fibrin formation and fibrinolysis in a
model of inflammation accompanying cellular
hypersensitivity
R.F. Peters, M.K. Jasani, M.F. Tweed, I. Knight and
D.A. Lane 337

Extra-vascular fibrin deposition in cellular hyper-
sensitivity - the role of T lymphocyte-macrophage
interactions
M.D. Talbot, R.F. Peters, M.F. Tweed and M.K. Jasani 347

Fibrinolytic studies in disorders of connective tissue
A. Keegan, M.I.V. Jayson, I. Tomlinson, R. Million
and G. Pountain 357

Soluble fibrin/fibrinogen related antigen in human
intima in relation to atherogenesis
E.B. Smith and J.E. Walker 363

Fibrinogen as a possible risk factor for IHD in the
Caerphilly study
J.W.G. Yarnell, P.M. Sweetnam, P.C. Elwood,
R. Eastham, R.A. Gilmour, J.R. O'Brien and
M.D. Etherington 371

VIII. APPENDIX: DATA ON FIBRINOGEN

Fibrinogen amino acid sequences
A. Henschen 381
