

Table of Contents

Rikio ONAI, Hajime SHIMIZU, Kanae MASUDA, Akira MATSUMOTO and Moritoshi ASO Architecture and Evaluation of a Reduction-based Parallel Inference Machine: <i>PIM-R</i>	1
M. SUGIE, M. YONEYAMA, T. SAKABE, M. IWASAKI, S. YOSHIKUMI, M. ASO, H. SHIMIZU and R. ONAI Hardware Simulator of Reduction-based Parallel Inference Machine: <i>PIM-R</i>	13
T. MARUYAMA, K. HIRATA, H. TANAKA and T. MOTO-OKA A Note on the Elementary Execution Unit in a Parallel Inference Machine	25
H. MATSUDA, M. KOHATA, T. MASUO, Y. KANEDA and S. MAEKAWA Parallel Prolog Machine <i>PARK</i> : Its Hardware Structure and Prolog System	35
Etsuo ITOH and Hiroshi NAKAGAWA Heuristics Applied in Tree Manipulation Algorithm Synthesis	44
Makoto HARAGUCHI Analogical Reasoning using Transformations of Rules	56
T. HISANO and M. SUWA Synchronization and Communication in The ' <i>SUBJECT</i> '	66
H. ITO and H. UENO <i>ZERO</i> : Frame + Prolog	78
Hidehisa TAKAHASHI and Etsuya SHIBAYAMA <i>PRESET</i> - A Debugging Environment for Prolog	90
M. NUMAO and H. MARUYAMA <i>PROEDIT</i> - A Screen Oriented Prolog Programming Environment	100
Shinichi HONIDEN, Naoshi UCHIHARA and Toshiaki KASUYA Software Prototyping with <i>MENDEL</i>	108
H. YOSHIDA, H. KATO and M. SUGIMOTO Retrieval of Software Module Functions Using First-order Predicate Logical Formulae	117

T. AOYAGI, M. FUJITA and T. MOTO-OKA Temporal Logic Programming Language <i>Tokio</i> - Programming in <i>Tokio</i>	128
S. KONO, T. AOYAGI, M. FUJITA and H. TANAKA Implementation of Temporal Logic Programming Language <i>Tokio</i>	138
K. NAKAMURA Heuristic Prolog: Logic Program Execution by Heuristic Search	148
Jiro TANAKA, Takashi YOKOMORI and Makoto KISHISHITA AND-OR Queuing in Extended Concurrent Prolog	156
Kazunori UEDA Guarded Horn Clauses	168
Satoru TOMURA TDProlog : An Extended Prolog with Term Description	180
M. KISHIMOTO, T. SHINOGI, Y. KIMURA and A. HATTORI Design and Evaluation of a Prolog Compiler	192
Akira YAMAMOTO, Masaki MITSUI, Hiroyuki YOSHIDA, Minoru YOKOTA and Katsuto NAKAJIMA The Program Characteristics in Logic Programming Language <i>ESP</i>	204
Kuniaki UEHARA, Takashi KAKIUCHI, Osamu MIKAMI and Jun'ichi TOYODA Extended Prolog and its Application to an Integrated Parser for Text Understanding	214
H. SUZUKI, M. KIYONO, S. KOUGO, M. TAKAHASHI, S. MOTOIKE and T. NIKI A Travel Consultation System : Towards a Smooth Conversation in Japanese	226
J.M. CHOI, M.S. SONG, K.J. JEONG, H.C. KWON, S.Y. HAN and Y.T. KIM A Prolog-based Korean-English Machine Translation System and its Efficient Method of Dictionary Management	236

Masahiro FUJITA, Makoto ISHISONE, Hiroshi NAKAMURA, Hidehiko TANAKA and Tohru MOTO-OKA Using the Temporal Logic Programming Language <i>Tokio</i> for Algorithm Description and Automatic CMOS Gate Array Synthesis	246
Yasunori NODA, Tetsuo KINOSHITA, Akira OKUMURA, Tatsuro HIRANO and Tadashi HIRUTA A Parallel Logic Simulator based on Concurrent Prolog	256
I. NAGASAWA A Method of Representing Processes in a Constraint Solver	266
Katsumi NITTA and Juntaro NAGAO <i>KRIP</i> : A Knowledge Representation System for Laws relating to Industrial Property	276
Yasushi MATSUMURA, Takashi MATSUNAGA, Yusuke MAEDA, Shusaku TSUMOTO, Hiroshi MATSUMURA and Michio KIMURA Consultation System for Diagnosis of Headache and Facial Pain: ' <i>RHINOS</i> '	287
Isao SUGIYAI and Keiko ISHIKAWA Knowledge Realization and Transformation in <i>KRISP</i>	299
