

Contents

J. ABRAHAM, V. PEROV, K. NYIRI, L. IKLODI and I. KAPOSZTA: Mathematical Modelling and Optimization of PVC Powder Blending Process for Development of Multilevel, Optimized Process Control System	1
M.F. ALLAM and M.M. ALI: An Economic Approach for Optimum Long-Term Plant Mix Choice	10
I. ARANY: An Algorithm for Getting a Minimum Cut-Set of a Graph . .	17
F. ARCHETTI, A. SCIOMACHEN and C. VERCELLIS: Optimal Design of a Remote Heating Network	25
M.D. AŠIĆ and V.V. KOVAČEVIĆ-VUJČIĆ: Computational Complexity of Some Semiinfinite Programming Methods	34
O. BABIĆ: The Calculation of Manpower for Aircraft Ground Service .	43
G. BARTOLINI and T. ZOLEZZI: Discontinuous Adaptive Control of Non Minimum Phase Linear Plants	54
W. BAUER, E. LINDNER and HJ. WACKER: Optimal Control of the Storage Power Plant System Gosau	63
B. BETRÓ, F. SCHOEN and M.G. SPERANZA: Stochastic Control in Urban Traffic	75
R. BLAŠKO: Throughput Optimization of Packet Communication Networks.	84
L.B. BOGUSLAVSKY, A.L. STOLYAR: Performance Analysis of Data Link and Communication Device Control Procedures in Distributed Micro/Mini Computer Systems	91
R. BREHMER and P. NEMETZ: Optimal Control Methods for Power System Operation	102

M. BRENNINGER-GÖTHE and K. JÖRNSTEN: Models and Methods for Estimating an Origin-Destination Trip Matrix from Network Data .	112
M. BROKATE: Optimal Control of Age-Structured Populations	125
C.G. BROYDEN: Skew-Symmetric Matrices, Staircase Functions and Theorems of the Alternative.	133
O.P. BURDAKOV: Stabilization of the Secant Method Via Quasi-Newton Approach	141
R.E. BURKARD: Assignment Problems: Recent Solution Methods and Applications*.	153
T. CHACON and O. PIRONNEAU: Optimal Control as a Tool for Solving the Stationnary Euler Equation with Periodic Boundary Conditions	170
A.P. CHERENKOV: Optimization Problems for Two-Stage Process of Resource Allocation	177
R.F. CURTAIN: Balanced Realisations for Infinite-Dimensional Discrete-Time Systems	181
T. CSENDES, B. DARÓCZY and Z. HANTOS: Nonlinear Parameter Estimation by Global Optimization: Comparison of Local Search Methods in Respiratory System Modelling	188
J.K. DELSON, R.T. JENKINS, W.L. STILLINGER, R. BEUNE and N. HALBERG: The "BENCHMARK" Chronological Simulation Model: A New Tool for Better Understanding the Economic and Physical Behaviour of Electrical Generating Systems	193
N.I. DJURANOVIĆ-MILIČIĆ: An Algorithm in Constrained Optimization .	203
A. DOURADO and J.L. CALVET: An Efficient Algorithm for the Optimal Operation of a Cascade Reactor.	209
E. DUDEK-DYDUCH: Evolutionary Method in Discrete Programming . . .	220
A. FARKAS: Environmental Systems Modelling with Respect to the Future	226

J.A. SOÉIRO FERREIRA and R.V.VALQUI VIDAL: On the Connections Between Mathematical Programming and Discrete Optimal Control.	234
S. FUKS: Exploration of Non-Renewable Resources: A Dynamic Approach	244
A. GARLIAUSKAS, A. BURKAUSKAS, G. LESINSKAS and R. VYGOVSKAYA: Dynamic and Stochastic Optimization of Transport Networks. . .	254
A. GARLIAUSKAS and A. GARLIAUSKIENE: Simulation of Biomedical Systems*.	264
P. GRABOWSKI: Stability of Semilinear Systems in Hilbert Spaces .	282
W. GREGA: A Decomposition Algorithm for the Determination of Optimal Bus Frequencies	292
K.M. HANGOS and T. VIRÁG: The Effect of Point-Like Noise Sources on Chemical Distributed Parameter Systems	298
P.G. HARHAMMER and A. SCHADLER: Optimal Energy Management	304
CH. HENDRICH and B. DRAXLER: Effects of Power-Converters, Compensation Equipment and Filter Circuits on the Voltage Trajectories in Electrical Distribution Systems	312
A. HERTZ: ORELIA a Probabilistic Model for the Expansion Planning of the EHV Electric Power System	321
P. HOLNICKI, J. SOKOŁOWSKI and A. ZOCHOWSKI: Sensitivity Analysis of an Optimal Control Problem Arising from Air Quality Control in Urban Area	331
T. HRABA and J. DOLEŽAL: On Mathematical Model of Immunological Tolerance	340
V.V. IVANOV and Ju.P. JACENKO: Problem of Optimal Control for Integral Dynamic Models with Controllable Prehistory	350
A. JANIÁK: One-Machine Scheduling Problems with Resource Constraints	358

VII

S. JENDO and W. MARKS: Multiobjective Structural Optimization . .	365
J.I. KALEV and L.AT. GUNCHEV: Linear Approximation of Surfaces with a Criterion "Minimum of Average Quadratic Time" Treating Optimal Control Problems	375
N.A. KARATUEVA and V.M. MATROSOV: Vector Lyapunov Functions Method for Difference-Differential Systems and its Applications to Immunology	384
I. KARPOUZAS and Y. CHERRUAULT: A New Global Optimization Technique for Solving Partial Differential Equations	394
P. KELLE: Modelling and Optimization of Buffer Stocks in a Production Line	399
A.M. KHAN: Simulating Expert Judgment: Actuarial Models and Applications.	406
H. KIVIJÄRVI and M. TUOMINEN: Corporate Planning and the Value of Information	412
É. KOMÁROMI: Duality in Probabilistic Constrained Linear Programming	423
F. KONECNY: Nonlinear Estimation Problems of Poisson Cluster Processes	430
A. KÓSA: On the Manifold of Control Processes in Lagrange Problems	437
W. KRABS: On the Numerical Solution of Certain Time-Minimal Problems of Second Order	442
M. KRAWCZAK: Nash Game with Regular Polynomial Perturbation . .	452
I. KUN: A Worst Case Analysis for the Optimal Gradient Method .	461
S. KYPREOS: Energy Modelling Approach at the Swiss Federal Institute for Reactor Research	468

VIII

F. LAMPARIELLO and S. LUCIDI: Analysis of DNA Distributions from Flow Cytometry by Means of an Optimization Procedure	478
A. LASCIAK: Planning Computation of a Long-Range Planning on the Basis of Macroeconomic Models	488
I. LASIECKA: Boundary stabilization Problems for Hyperbolic Dynamics - a review [*]	499
G. LEITMANN, E.P. RYAN and A. STEINBERG: Uncertain Systems: Robustness of Ultimate Boundedness Control with Respect to Neglected Dynamics	522
R. LEPP: Discrete Stability of Stochastic Programming Problems with Recourse	529
G. LEUGERING: Time Optimal Boundary Controllability of a Viscoelastic Beam	535
N. LEVAN: Stabilization by the Feedbacks $-B^*$ and $-B^*P$	542
Y.V. LIVANOV: The Stochastic Models for Estimation of Functioning Quality of Communications and Their Application	551
F.De LORENZO, V. GERVASIO and P. VERPECCHIA: MDS: An Instrument for the Construction of Models for Company Planning Using the Concepts of System Dynamics	557
A. MAGDZIARZ and Z. ZAGAN: Mathematical Simulation Model of Power Transformer for Electrical Power System Protective Schemes	567
P. MARINOV and P. KIRIAZOV: Time-Optimal Control of Acceleration Constrained Mechanical Systems	577
U.MASCHTERA and S. WALTER: A Relational View of a Linear Optimization Model and its Consequence for the Modelling Process	583
M. MICHNIEWICZ: An Adaptive Coordination Algorithm for the Interaction Balance Method with Feedback	591

IX

S. MOLNÁR and F. SZIDAROVSKY: A Stochastic Multiobjective Dynamic Programming Method with Application to Energy Modelling . . .	601
M. MUSCHICK and A. SCHADLER: Operation Planning of Power Systems .	610
W. MÜLLER: Modelling and Numerical Simulation of Wind-Generated Circulation and Matter Transport in Shallow Lakes	620
H. MÜLLER, G. THELL and W. WALDMANN: Results of Evolutional Random Search Procedure for Load Flow Optimization in Electric Networks	628
P. NEITTAANMÄKI: On the Optimal Cooling of the Steel During Continuous Casting	637
H. NIEDERREITER: Good Lattice Points for Quasirandom Search Methods	647
R.C. OLIVEIRA: A Visual Interactive Simulation Model for the Design of a Railway Station	655
A. OLSBU, P.A. LOEKEN and I.E. GROSSMANN: Simultaneous Synthesis and Economic Optimization of the Power System on an Oil/Gas Production Platform	665
M.M.OSTOJIĆ: Dc Motor Drive Parameters Optimization	675
G.CH. PFLUG: Optimizing Simulated Markov Processes	684
G.DI PILLO, L. GRIPPO and S. LUCIDI: Globally Convergent Exact Penalty Algorithms for Constrained Optimization	694
J. PINTÉR and J.SZABÓ: Global Optimization Algorithms: Theory and Some Applications	704
G.DA PRATO: Periodic Solutions of an Infinite Dimensional Riccati Equation	714
G. RABENSTEINER: Computer Aided Expansion Planning of Combined Electric Power and District Heating Systems - a Mixed Integer Programming Model -	723

T. RAPCSÁK: Convex Programming on Riemannian Manifolds	733
N. RIJAVEC: Interactive Multicriteria Goal Programming by Reference Objectives	741
C. RICHTER and K.SCHÖNEFELD: Hybrid Methods in Nonlinear Programming	745
S.M. ROBINSON: Bundle-Based Decomposition: Description and Preliminary Results*.	751
R. GONZALEZ and E. ROFMAN: On the Optimization of a Short-Run Model of Energy Production Systems	757
J. RYCKBOSCH: Power System Corrective Switching: A New Approach Using Non-Linear Programming	768
C. SAGUEZ: Optimal Control of Free Boundary Problems*	776
P. SANDRIN: Optimal Control Methods for Large Power Systems Planning and Operation*.	783
K. SCHITTKOWSKI: Mathematical Programming Software*.	804
C. SCHIEMANGK: Design, Analysis and Implementation of Thermodynamically Motivated Simulation for Optimization of Subgraphs	811
J. SIKORSKI: A Quasi-Subgradient Scheme for Calculating Surrogate Constraints	821
A.H. SILLABER: Linear Programming for Electric Power Distribution System Expansion Planning: A Dynamic Expansion Model for Loop Structured Networks	828
L. SZOMINSKI: On Existence of Assignments in Zero - One Matrices .	838
J. SOKOŁOWSKI and J.P. ZOLESIO: Sensitivity Analysis of Elastic - -Plastic Torsion Problem	845
J. SOKOŁOWSKI: Differential Stability of Solutions to Boundary Optimal Control Problems for Parabolic Systems	854
GY. SONNEVEND: An "Analytical Centre" for Polyhedrons and New Classes of Global Algorithms for Linear (Smooth, Convex) Programming	866

J.D. SØRENSEN and P. THOFT-CHRISTENSEN: Structural Optimization with Reliability Constraints	876
J.A. MARQUES DE SOUZA, P. MOLINA, J.P. CHARPENTIER and K. SCHENK: IDEA's Activities in Electric System Expansion Planning	886
A. STACHURSKI: Monotone Sequences of Feasible Solutions for Quadratic Programming Problems with M-Matrices and Box Constraints	896
L.E. STANFEL: Clustering Theory in the Design of Information Systems	903
Ł. STETTNER: On Continuous Time Adaptive Impulsive Control	913
N. STOICA and G. ROTH: Neuronal Networks Modelled by Petri Type Nets with Controllers	923
E.I. STOILOV and M.S. STRUGAROVA: The Use of Flying Horizon Method to Traffic Optimization in Process Control Communication Systems.. . . .	933
J. SZELEZSÁN: On the Numerical Solution of an Optimal Control Problem	943
F. SZIDAROVSKY and K. OKUGUCHI: Linear and Nonlinear Oligopoly Models	949
J. SZILÁGYI: Solving Scheduling Problems by Computer	957
C. TÁNCZOS: Multiple Criteria Analysis and Evaluation in Decision Making of Transport Planning	961
P. THOFT-CHRISTENSEN: Reliability Modelling of Structural Systems*	970
Ph. TORRION, J. LEVEUGLE and C. HERY: Comparison of Different Methods for Solving a Large Scale, Stochastic Dynamic Problem	982
J. TOMKÓ: Semi-Markov Analysis of the Inhomogeneous Machine Interference Model	992
A.D. TSVIRKUN and YU. YAKOVENKO: Lyapunov Functions and Turnpike Theory	1002

A. VÁSÁRHELYI and M. GRÓSZ: Elasto-Plastic Analysis of Continuum Structures by Nonlinear Programming	1008
G.E. VERESS: Modelling of Metrological Systems	1020
M. WIECEK and A. LIGEZA: Optimal Identification Problems of Regionalized Variables Systems	1028
R.J. WIJBRANDS: The Analysis of I/O Configurations: On the Robustness of the Central Server Model	1037
