

Contents

A. Basophils of the Peripheral Blood	1
I. Basophil Count	1
1. Normal Values; Counting Procedures	1
2. Basophil Leukocytosis and Basopenia	4
a) Thyroid Hormone	4
b) Pituitary and Adrenal Hormones	5
c) Sex Hormones	6
d) Insulin	6
e) Other Factors	7
II. Light-Microscopic Morphology	8
III. Phase-Contrast Microscopic Morphology	11
IV. Electron-Optical Morphology	13
References	21
V. Cytochemistry of Blood Basophils	28
1. Lipids	29
2. Glycogen	30
3. Acid Mucopolysaccharides (Glycosamino- glycans)	31
a) Bismarck Brown	32
b) Colloidal Iron	32
c) Phthalocyanine Stains	33
d) Aldehyde Fuchsin	33
e) The PAS-Reaction	34
f) Thiazine Dyes	36
g) Metachromasia	36
4. Enzymes	42
a) Oxidoreductases	42
b) Hydrolases	47
5. Biogenic Amines (Histamine)	53
6. Trace Elements (Zinc, Copper)	54
7. Amino Acids	55
References	55
VI. Comparative Studies on the Morphology of Blood Basophils	69
References	73
 B. The Origin of Blood Basophils	 77
I. Literature Review	77

XII Contents

II. Detection of Blood Basophils and Their Precursors in Normal Human Bone Marrow	78
1. Qualitative Findings	80
a) Application of Basic Dyes	80
b) Detection with the Naphthol AS-D Chloroacetate Esterase Reaction	83
2. Quantitative Findings	89
a) Cytophotometric Determination of the Naphthol AS-D Chloroacetate Esterase Activity in Basophil Granulopoietic Cells	89
b) The Quantitative Composition of Basophil Granulopoietic Cells in Human Bone Marrow	91
III. Evidence of Basophil Descent from Promyelocytes	92
References	95
 C. Biochemistry and Function of Blood Basophils	100
I. Heparin in Blood Basophils	100
1. Evidence of Heparin in Basophil Granules	100
2. Biochemical-Functional Significance of Heparin	102
a) Biological Properties of Heparin and its Structure-Action Relationships	106
b) Anticoagulant Activity of Heparin	108
c) Blood Basophils and Heparin-Induced Serum Lipolysis	108
References	125
II. Histamine in Blood Basophils	134
1. Detection of Histamine in Basophils	134
2. Biochemical-Functional Significance of Histamine	137
a) Structure-Activity Relationship of Histamine	138
b) Immunological Significance of Blood Basophils	144
α) Blood Basophils in Immune Reactions of the Immediate Type	145
β) Blood Basophils in Immune Reactions of the Delayed Type. (Histopathology of the Jones-Mote Reaction)	149
References	155
III. Granulolysis and Kinetic Properties of Blood Basophils	165
1. The Degranulation Mechanisms of Blood Basophils	165
2. Kinetics of Blood Basophils in Rabbits	172
3. Kinetics of Human Blood Basophils	178

4. The Effect of Compound 48/80 on Rabbit	
Basophils	192
a) In-vivo Tests	193
b) In-vitro Tests	194
References	199
 D. The So-Called Basophilic Leukemias	203
I. Review of the Literature	203
II. Clinical and Pathoanatomical Features	205
1. Primary Basophilic Leukemia	205
2. Secondary Basophilic Leukemia	210
III. Cytomorphology and Cytogenesis of Leukemic	
Blood Basophils	211
IV. Nosology of the So-Called Basophilic Leukemia	218
References	228
 Subject Index	231
