A. Transplantation of Autogenous Bone

1. Clinical Aspects of Free Autogenous Bone Transplantation. By H. M. TSCHOPP	3
1.1. Architecture of the Bone Graft	3
1.1.1. Compact Cortical Bone	3
1.1.2. Cancellous Bone	4
1.2. Behavior of the Bone Graft After Free Transplantation	4
1.3. Practical Application of Bone Transplantation ...	4
1.3.1. Choise of the Right Bone Transplant	4
1.3.2. Vascularization at the Recipient Site	5
1.3.3. Absolute Immobilization of the Graft	5
1.4. Removal of the Bone Graft	5
1.4.1. Iliac Bone Graft	5
1.4.2. Femoral Bone Graft	6
1.4.3. Rib Graft	6
2. Osteoplastic Treatment of Large Cysts of the Jaw.	
By B. SPIESSL and E. HOLTGRAVE	7
2.1. Introduction	7
2.2. Procedure	8
2.2.1. Transplantation of Cancellous Bone	8
2.2.2. Case Histories	8
2.3. Clinical Results	10
2.4. Discussion	11
2.5. Summary	12
3. Free Composite Rib Transplantation Using Neurovascular Microsurgical Anastomoses. By H. M. TSCHOPP	13
3.1. Animal Experiments	13
3.2. Results	14
3.3. Summary	18

IX

B. Traumatology and Reconstructive Surgery

1. Principles of Rigid Internal Fixation in Fractures of the Lower Jaw. By B. SPIESSL	21
1.1. Indication	21
1.2. Principles	23
1.2.1. Accurate Anatomical Reduction	23
Occlusal Repositioning	23
Basal Repositioning	24
1.2.2. Absolute Stability	24
1.2.3. Tension Band and Stabilization Plate	26
1.3. Plates (DCP and EDCP)	27
1.4. Instrument Set	33
2. Rigid Internal Fixation of Compound Mandibular Fractures. By J. PREIN and B. SPIESSL	35
2.1. Introduction	35
2.2. Case Reports	35
2.3. Conclusion	40
3. Experimental Studies on the Effect of Rigidity Using an Excentric Dynamic Compression Plate (EDCP). By R. SCHMOKER	41
3.1. Theoretical Considerations	41
3.2. Results	47
3.3. Discussion	50
3.4. Summary	52
4. Internal Fixation of Mandibular Fractures Using an Excentric Dynamic Compression Plate (EDCP). By R. SCHMOKER	53
4.1. Patient Population	53
4.2. Time of Treatment	53
4.3. Type of Treatment	53
4.4. Results	55
4.5. Summary	57
5. Anatomic Reconstruction in Mandibular Fractures with Loss of Bony Substance. (A Case Report). By W.-A. JAKUES, B. SPIESSL and H. M. TSCHOPP	59
5.1. Introduction	59
5.2. Case Report	59
5.2.1. Treatment of the Fracture	59
5.2.2. Reconstruction of the Missing Bone	59
5.2.3. Restitution of Dentition	59
5.3. Discussion	60
5.4. Summary	62

6. Principles of Treatment in Combined Fractures of the Upper and Lower Jaw. By H. M. TSCHOPP and G. MARTINONI	63
6.1. Timing of Surgery	63
6.2. Preoperative Management of the Patient	63
6.2.1. Preparation of the Wound	63
6.2.2. Teeth in the Fracture Line	64
6.2.3. Occlusal Retention	64
6.3. Surgical Procedures	64
6.3.1. Fractures of the Maxilla	64
6.3.2. Fractures of the Mandible	71
7. The Surgical Approach in the Treatment of Facial Fractures. By G. MARTINONI and H. M. TSCHOPP	75
7.1. Fracture of the Naso-ethmoidal Region	75
7.2. Fracture at the Site of the Sutura Fronto-zygomatica	76
7.3. Fracture at the Site of the Lower Orbital Rim, Blow-out Fracture, and Fracture of the Malar Complex	76
7.4. Fracture of the Zygomatic Arch	76
7.5. Fractures of the Nose	77
7.6. Intraoral Incisions	77
7.7. Submandibular and Submental Incisions	77

C. Orthopaedic Maxillofacial Surgery

1. Temporal Bolting Osteoplasty in the Treatment of Excessive Condylar Movement. By B. SPIESSL	81
1.1. Introduction	81
1.2. Technique	83
1.3. Postoperative Treatment	85
1.4. Discussion	85
2. Treatment of Ankylosis by a Condylar Prosthesis of the Mandible. By B. SPIESSL, R. SCHMOKER and R. MATHYS	88
2.1. Introduction	88
2.2. The Condylar Prosthesis	88
2.3. Technique	88
2.4. Case Report	90
2.5. Summary	91
3. Bone Transplantation for Broadening of the Apical Base (Combined Operative and Conservative Treatment of Pronounced Maxillary Protrusion). By E. HOLTGRAVE, TH. RAKOSI and B. SPIESSL	93
3.1. Introduction	93

3.2. Procedure	93
3.2.1. The Transplantation of an Autogenous Rib Graft to Broaden the Apical Base	93
3.2.2. The Transplantation of an Autogenous Cancellous Bone from the Iliac Crest to Broaden the Apical Base	94
3.3. Case History	94
3.4. Results	97
3.4.1. Radiographic Results	97
3.4.2. Clinical Results	97
3.5. Discussion	97
 4. Preoperative Planning of Sagittal Split Osteotomy of the Ascending Mandibular Ramus (Simulography). By R. SCHMOKER	98
4.1. Introduction	98
4.2. Previous Methods of Simulation	98
4.3. Theoretical Considerations	99
4.4. Principle of the Present Method	99
4.5. Description of the Simulograph	101
4.6. Summary	102
 5. Results of Rigid Internal Fixation and Simulography in Sagittal Split Osteotomy of the Ascending Ramus. A Comparative Clinical Investigation. By R. SCHMOKER, B. SPIESSL and TH. GENSHEIMER	103
5.1. Introduction	103
5.2. Survey of the Literature	103
5.3. Theoretical Considerations	107
5.4. Material and Method	107
5.4.1. Diagnosis	107
5.4.2. Age and Sex	108
5.4.3. Dentition	108
5.4.4. Orthodontic Treatment	108
5.4.5. Operation	108
5.4.6. Preoperative Planning	108
5.4.7. Prophylaxis with Antibiotics	108
5.4.8. Fixation	109
5.4.9. Division into Groups	109
5.5. Results	109
5.5.1. Objects of the Study	109
5.5.2. Length of Stay in Hospital	109
5.5.3. Duration of Intermaxillary Fixation	110
5.5.4. Resumption of Normal Diet	110
5.5.5. Period of Unfitness for Work	110
5.5.6. Removal of the Arch Bars	110
5.5.7. Follow-up Treatment	110
5.5.8. Rate of Recurrence	110

5.5.9. Disturbances of Sensation	111
5.5.10. Infection	111
5.5.11. Other Complications	111
5.5.12. Subjective Statements	111
5.6. Discussion	111
5.6.1. Indication	111
5.6.2. Preoperative Planning	112
5.6.3. Length of Stay in Hospital	112
5.6.4. Intermaxillary Fixation	112
5.6.5. Resumption of Normal Diet	112
5.6.6. Unfitness for Work	113
5.6.7. Follow-up Treatment	113
5.6.8. Disturbances of Sensation	113
5.6.9. Prophylactic Treatment with Antibiotics ...	113
5.6.10. Recurrence	113
5.6.11. Advantages of Correct Positioning and Rigid Internal Fixation	114
5.7. Summary	114
 6. Rigid Internal Fixation After Sagittal Osteotomy of the Ascending Ramus. By B. SPIESSL	115
6.1. Introduction	115
6.2. Technique	116
6.2.1. Osteotomy	116
6.2.2. Rigid Internal Fixation	118
6.3. Discussion	122

D. Implantology

1. The Dynamic Compression Implant (DCI) as a Basis for Allenthetic Prosthetics. Fundamental Principles of Theory and Practice. By B. SPIESSL	125
1.1. Introduction	125
1.2. Principle of Construction and Fixation	127
1.2.1. Static Friction	128
1.2.2. Pretension and Transverse Compression ...	128
1.3. The Area of Implantation	129
1.4. Induction of Periosteal Bone Formation	130
1.5. Summary of the Principles	130
 2. The Dynamic Compression Implant (DCI) – A First Evaluation of 70 Cases. By W.-A. JAQUES	134
2.1. Introduction	134
2.2. Material and Method	134
2.3. Discussion	139
2.4. Summary	140

3. Experimental Studies of the Load-Bearing Properties of Implanted Prostheses. By R. SCHMOKER, D. CORNOLEY, W. HUSER, B. SPIESSL and H. GRAF	141
3.1. Introduction	141
3.2. Theoretical Principles	141
3.3. Method of Measurement	142
3.4. Results	143
3.5. Discussion	143
3.6. Summary	143
4. Experimental Studies on the Stability of the Dynamic Compression Implant (DCI). By R. SCHMOKER	144
4.1. Introduction	144
4.2. Theoretical Considerations	144
4.3. Method of Measurement	146
4.4. Results	147
4.5. Summary	149
5. Histologic-Morphometric Investigations into Cadaver Mandibles. The Bony Structure as a Site for an Implant Prosthesis. By C. BASSETTI, W. REMAGEN and B. SPIESSL	150
5.1. Introduction	150
5.2. Material and Method	150
5.3. Results	150
5.4. Discussion	153
6. A Total Mandibular Plate to Bridge Large Defects of the Mandible. By R. SCHMOKER, B. SPIESSL and R. MATHYS	156
6.1. Introduction	156
6.2. The New Plate	158
7. Anatomic Reconstruction and Functional Rehabilitation of Mandibular Defects after Ablative Surgery. By B. SPIESSL, J. PREIN and R. SCHMOKER	160
7.1. Introduction	160
7.2. Case Report	160
7.3. Discussion	164
7.4. Summary	166

E. Postoperative Infections and Prophylaxis

1. Treatment of Infected Fractures and Pseudarthrosis of the Mandible. By J. PREIN and R. SCHMOKER	169
1.1. Introduction	169
1.2. Case Report	169
1.3. Discussion	174

2. Preventive Antibiotics in Elective Maxillofacial Surgery. By W.-A. JAKUES	175
2.1. Introduction	175
2.2. Material and Method	175
2.3. Results	176
2.4. Discussion	179
2.5. Conclusion	179
