

CHAPTER I - FOLIATIONS ON COMPACT SURFACES.

1. Vector fields on surfaces.

- 1.1. Examples of isolated singularities. 1
- 1.2. The index of an isolated singularity. 5
- 1.3. The theorem of Poincaré - Bohl - Hopf. 6
- 1.4. Existence of non-singular vector fields. 9

2. Foliations on surfaces.

- 2.1. Motivating remarks. 10
- 2.2. Definition of foliations and related notions. 11
- 2.3. Orientability ; relation with vector fields. 14
- 2.4. The existence theorem of Poincaré-Kneser. 20

3. Construction of foliations.

- 3.1. Suspensions. 29
- 3.2. Germs near circle leaves ; leaf holonomy. 34
- 3.3. Reeb components. 39
- 3.4. Turbulization. 41
- 3.5. Gluing foliations together. 43

4. Classification of foliations on surfaces.

- 4.1. Topological dynamics. 44
- 4.2. Foliations on the annulus and on the Möbius band. 49
- 4.3. Foliations on the torus and on the Klein bottle. 62

5. Denjoy theory on the circle.

- 5.1. The rotation number. 68
- 5.2. Denjoy's example. 72
- 5.3. Denjoy's theorem. 80

6. Structural stability.

- 6.1. Structural stability for diffeomorphisms of the interval and the circle. 88
- 6.2. Structural stability for suspensions. 94
- 6.3. Structural stability for foliations in general. 102

CHAPTER II - FUNDAMENTALS ON FOLIATIONS.

1. Foliated bundles.

- 1.1. Preparatory material on fibre bundles. 113
- 1.2. Suspensions of group actions. 123
- 1.3. Foliated bundles. 135
- 1.4. Equivariant submersions. 142

2. Foliated manifolds.

- 2.1. Definition of a foliation ; related notions. 147
- 2.2. Transversality ; orientability. 157
- 2.3. The tangent bundle of a foliation ; Frobenius' theorem. 163
- 2.4. Pfaffian forms ; Frobenius' theorem (dual version). 168

3. Examples of foliated manifolds.

3.1. Foliations defined by locally free group actions. 171

3.2. Foliations with a transverse structure. 176

CHAPTER III - HOLONOMY.

1. Foliated microbundles.

1.1. Localization in foliated bundles. 184

1.2. Generalities on foliated microbundles. 186

1.3. Holonomy of foliated microbundles. 194

2. Holonomy of leaves.

2.1. Unwrapping of leaves; leaf holonomy. 203

2.2. Holonomy and foliated cocycles; leaves without holonomy. 211

3. Linear holonomy; Thurston's stability theorem.

3.1. Linear and infinitesimal holonomy. 217

3.2. Thurston's stability theorem. 219

Literature. 225

Glossary of notations. 228
