

## Contents

<b>Abstract</b> . . . . .	1
<b>A. Introduction</b> . . . . .	3
<b>B. Materials and Methods</b> . . . . .	6
<b>C. General Part.</b> . . . . .	8
1. Geographical Distribution and Habitats . . . . .	8
2. Habit and Growth Form Analyses . . . . .	19
2.1. Large to Medium-sized Shrubs . . . . .	19
2.2. Dwarf Shrubs . . . . .	23
2.2.1. Short-lived Shrubs ("Woody Herbs") . . . . .	28
2.3. Subshrubs . . . . .	28
2.4. Perennial Herbs . . . . .	29
2.5. Influence of External Factors on Habit and Growth Form . . . . .	31
2.5.1. Fire . . . . .	31
2.5.2. Browsing . . . . .	33
3. Stems. . . . .	34
3.1. Indumentum, Cortex, Cork . . . . .	34
3.2. Wood, Node and Petiole Anatomy . . . . .	34
4. Leaves . . . . .	37
4.1. Arrangement; Leafy Short Shoots . . . . .	37
4.2. Stipules . . . . .	37
4.3. Blades and Petioles . . . . .	40
4.4. Age and Persistence . . . . .	42
4.5. Anatomy . . . . .	42
4.5.1. Epidermis [incl. Trichomes and Stomata] . . . . .	42
4.5.2. Chlorenchyma . . . . .	59
4.5.3. Bundle Sheaths and Bundle Sheath Extensions . . . . .	63
5. Inflorescences . . . . .	65
6. Flowers . . . . .	72
6.1. Pedicels . . . . .	72
6.2. Calyx . . . . .	73
6.3. Corolla . . . . .	73
6.4. Androeceum . . . . .	79
6.5. Gynoecium . . . . .	80
7. Carpophores, Fruits and Seeds . . . . .	81
7.1. Carpophores . . . . .	81
7.2. Fruits and Seeds of <i>Anthospermum</i> , <i>Galopina</i> and <i>Nenax</i> . . . . .	82
7.2.1. Indumentum . . . . .	82
7.2.2. Persistent Calyx Lobes . . . . .	83
7.2.3. Fruits Dehiscing into Two Mericarps . . . . .	84
7.2.4. Indehiscent Fruits . . . . .	89
7.2.5. Fruit (Mericarp) Anatomy . . . . .	89
7.2.6. Seeds . . . . .	94

7.3. Fruits and Seeds of <i>Carpacoe</i>	97
7.3.1. Morphology.	97
7.3.2. Anatomy.	98
7.3.3. Seeds	103
8. Embryology	103
9. Karyology	107
10. Pollen	122
11. Phytochemical Data.	125
11.1. Leaf Flavonoids (by R. D. WILSON).	125
11.2. Iridoid Glycosides	130
12. Reproductive Biology	131
12.1 Anemophily	131
12.2. Sex Distributions and Sex Ratios	134
12.2.1. Sex Forms of Individual Plants	134
12.2.2. Sex Ratios and Sex Distributions in Populations	141
12.2.3. Sex Distributions and Anemophily, and the Evolution of Dioecy	146
12.3. Secondary Sex Characters and Sexual Dimorphism	148
12.4. Self-Compatibility, Auto- and Geitonogamy; Parthenocarpic Fruits and the Question of Apomixis	152
12.5. Hybridization	156
12.6. Diaspore Dispersal	161
12.7. Germination Data	163
12.8. Regeneration after Fire.	169
<b>D. Systematic Part.</b>	173
Tribe <i>Anthospermeae</i> , Subtribe <i>Anthosperminae</i>	173
Key to the African and Madagascan Genera.	173
<i>Anthospermum</i>	174
Regional Keys	178
A. Key to Taxa Occurring in Tropical Africa	178
B. Key to Taxa Occurring in the Flora Zambesiaca and the Flora of Angola Area	180
C. Key to Taxa Occurring in the Flora of Southern Africa Area Excluding the SW Cape Floristic Region	181
D. Key to Taxa Occurring in the SW Cape Floristic Region	185
E. Key to Taxa Occurring in Madagascar.	189
The Taxa.	190
<i>Nenax</i>	393
Key to Species and Subspecies	396
The Taxa.	398
<i>Galopina</i>	427
Key to Species	429
The Species	430
<i>Carpacoe</i> .	446
Key to Species and Subspecies	448
The Taxa.	449
Taxa to be Excluded	465
<b>E. Phylogenetic Relationships and Evolutionary Aspects</b>	467
1. Relationships Within <i>Anthospermum</i>	467
1.1. Introductory Remarks	467
1.2. The <i>Anthospermum usambarens</i> Group.	475

1.3. The <i>Anthospermum spathulatum</i> Group . . . . .	479
1.4. The <i>Anthospermum whyteanum</i> Group . . . . .	481
1.5. The <i>Anthospermum ternatum</i> Group . . . . .	483
1.6. The <i>Anthospermum herbaceum</i> Group . . . . .	485
1.7. The <i>Anthospermum pumilum</i> Group . . . . .	488
1.8. Isolated SW Cape Taxa, Including General Comments on Taxa Occurring in the SW Cape Floristic Region . . . . .	492
1.9. Isolated Madagascan Taxa . . . . .	497
1.10. Concluding Remarks . . . . .	498
2. Affinities Between <i>Nenax</i> and <i>Anthospermum</i> , and Relationships Within <i>Nenax</i> . . . . .	501
3. Relationships Within <i>Galopina</i> and its Affinities to Other <i>Antho-</i> <i>spermeae</i> . . . . .	506
4. The Isolated Position of <i>Carpacoce</i> and Relationships Within the Genus. . . . .	508
5. Relationships Between <i>Anthosperminae</i> and Extra-African <i>Antho-</i> <i>spermeae</i> . . . . .	512
6. Thoughts on the Evolution of the <i>Anthospermeae</i> . . . . .	513
Acknowledgements . . . . .	520
References . . . . .	521
Index of Taxa (in part D.) . . . . .	533
