

Contents

1	Introduction to Measuring Systems.....	1
1.1	Sensor.....	3
1.2	Transducer.....	3
1.3	Matching Circuit.....	3
1.4	Anti-aliasing Filter.....	3
1.5	Multiplexers/Demultiplexers.....	6
1.6	Sample-and-Hold Circuit.....	8
1.7	Analog-to-Digital Conversion.....	10
1.7.1	A/D Converter with Parallel Comparison.....	10
1.7.2	A/D Converter with Successive Approximation.....	12
1.7.3	Integrating A/D Converters.....	17
1.7.4	Sigma Delta A/D Converter.....	22
1.8	Input Register.....	24
1.9	Digital-to-Analogue Conversion.....	25
1.10	Reconstruction Filter.....	26
1.11	DSP.....	27
1.12	Control System.....	28
	References.....	28
2	Sensors.....	29
2.1	Strain Gauge Sensors.....	29
2.1.1	Temperature Compensation.....	31
2.1.2	Lead Wires Effect.....	33
2.1.3	Force Measurement.....	34
2.1.4	Torque Measurement.....	35
2.1.5	Pressure Measurement.....	35
2.2	Capacitive Sensors.....	38
2.3	Inductive Sensors.....	40
2.4	Temperature Sensors.....	45
2.5	Vibration Sensors.....	51
2.5.1	Accelerometer.....	51
2.5.2	Vibrometer.....	54
2.6	Piezoelectric Sensors.....	56
2.7	Binary-Coded Sensors.....	59
	References.....	62

3	Methods of Noise Reduction.....	63
3.1	Weighted Mean Method.....	63
3.2	Windows.....	65
3.3	Effect of Averaging Process on Signal Distortion.....	67
3.4	Efficiency Analysis of Noise Reduction by Means of Filtering....	72
3.5	Kalman Filter.....	78
	References.....	82
4	Model Development.....	83
4.1	Lagrange Polynomials.....	84
4.2	Tchebychev Polynomials.....	86
4.3	Legendre Polynomials.....	90
4.4	Hermite Polynomials.....	93
4.5	Cubic Splines.....	95
4.6	The Least-Squares Approximation.....	101
4.7	Relations between Coefficients of the Models.....	102
4.8	Standard Nets.....	105
4.9	Levenberg-Marquardt Algorithm.....	111
4.9.1	Implementing Levenberg-Marquardt Algorithm Using LabVIEW.....	113
4.10	Black-Box Identification.....	115
4.11	Implementing Black-Box Identification Using MATLAB.....	117
4.12	Monte Carlo Method.....	123
	References.....	124
5	Mapping Error.....	127
5.1	General Assumption.....	127
5.2	Signals Maximizing the Integral Square Error.....	128
5.2.1	Existence and Availability of Signals with Two Constraints.....	128
5.2.2	Signals with Constraint on Magnitude.....	130
5.2.3	Algorithm for Determining Signals Maximizing the Integral Square Error.....	131
5.2.4	Signals with Two Constraints.....	134
5.2.5	Estimation of the Maximum Value of Integral Square Error.....	139
5.3	Signals Maximizing the Absolute Value of Error.....	140
5.3.1	Signals with Constraint on Magnitude.....	140
5.3.2	Shape of Signals with Two Constraints.....	140
5.4	Constraints of Signals.....	148
	References.....	149
	Index.....	151
