

CONTENTS

INVITED LECTURES

Logic Programming and Parallel Complexity, <i>Paris C. Kanellakis</i>	1
The Generalized Counting Method for Recursive Logic Queries, <i>Domenico Saccá, Carlo Zaniolo</i>	31

CONTRIBUTED PAPERS

Restructuring of Complex Objects and Office Forms, <i>Serge Abiteboul, Richard Hull</i>	54
Set Containment Inference, <i>Paolo Atzeni, D. Stott Parker</i>	73
A Domain Theoretic Approach to Higher-Order Relations, <i>Peter Buneman, Atsushi Ohori</i>	91
On the Desirability of Gamma-Acyclic BCNF Database Schemes, <i>Edward P. F. Chan, Héctor J. Hernández</i>	105
Update Semantics under the Domain Closure Assumption, <i>Laurence Cholvy</i>	123
Unsolvable Problems Related to the View Integration Approach, <i>Bernhard Convent</i>	141
Horizontal Decompositions Based on Functional-Dependency-Set-Implications, <i>Paul De Bra</i>	157
Update Serializability in Locking, <i>R. C. Hansdah, L. M. Patnaik</i>	171
Filtering Data Flow in Deductive Databases, <i>Michael Kifer, Eliezer L. Lozinskii</i>	186
Multidimensional Order Preserving Linear Hashing with Partial Expansions, <i>Hans-Peter Kriegel, Bernhard Seeger</i>	203
Split-Freedom and MVD-Intersection: A New Characterization of Multivalued Dependencies Having Conflict-Free Covers, <i>V. S. Lakshmanan</i>	221

Towards Online Schedulers Based on Pre-Analysis Locking, <i>Georg Lausen, Eljas Soisalon-Soininen, Peter Widmayer</i>	242
Query Processing in Incomplete Logical Databases, <i>Nadine Lerat</i>	260
Introduction to the Theory of Nested Transactions, <i>Nancy Lynch, Michael Merritt</i>	278
Entity-Relationship Consistency for Relational Schemas, <i>Johann A. Makowsky, Victor M. Markowitz, Nimrod Rotics</i>	306
Modelling Large Bases of Categorical Data with Acyclic Schemes, <i>Francesco M. Malvestuto</i>	323
Some Extensions to the Closed World Assumption in Databases, <i>Shamim A. Naqvi</i>	341
Expedient Stochastic Move-to-Front and Optimal Stochastic Move-to-Rear List Organizing Strategies, <i>B. John Oommen, E. R. Hansen</i>	349
The Cost of Locking, <i>Peter K. Rathmann</i>	365
Theoretical Foundation of Algebraic Optimization Utilizing Unnormalized Relations, <i>Marc H. Scholl</i>	380
A Polynomial-Time Join Dependency Implication Algorithm for Unary Multi-Valued Dependencies, <i>Peter Thanisch, George Loizou</i>	397
Interaction-Free Multivalued Dependency Sets, <i>Dirk Van Gucht</i>	409
Updating Logical Databases Containing Null Values, <i>Marianne Winslett</i>	421
A New Characterization of Distributed Deadlock in Databases, <i>Ouri Wolfson</i>	436
