Contents

A Service-Oriented Approach for Holonic Manufacturing Control and Beyond **1**
Jan Van Belle, Johan Philips, Osman Ali, Bart Saint Germain, Hendrik Van Brussel, and Paul Valckenaers
1 Introduction 1
2 Holonic Manufacturing Execution System 2
3 Application Domains 5
3.1 Manufacturing 6
3.1.1 Car Paint Shop 6
3.1.2 Photographic Foil Facility 7
3.1.3 Machine Tool Shop 8
3.1.4 Heat Treatment Facility 9
3.2 Open-Air Engineering 10
3.3 Robotics 11
3.4 Logistics 13
3.4.1 Chain Conveyor System 13
3.4.2 Cross-Docking Facility 14
4 Supporting Services 15
5 Conclusions 17
References 18

Service Oriented Control Framework for a Holonic System Characterized by a Guided Flow of Entities **21**
Theodor Borangiu, Silviu Raileanu, Octavian Stocklosa, Christian Tahon, Thierry Berger, and Damien Trentesaux
1 Introduction 21
2 The System Characterized by a Guided Flow 23
2.1 The Concept and Characterization of Entities 23
Active entity 23
Non-active entities 23
Generalized active entity (GAE) 24
2.2 Control Architecture for an Active Entity System 25
3 Structure of the Holonic Control System 26
3.1 Static and Dynamic Models of the Composing Holons 27
3.2 Static Structure 28
Coordinator Holon (CH) 28
Resource Holon (RH) 28
System Knowledge Holon (SKH) 28

Bibliografische Informationen
http://d-nb.info/1017419566

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.3 Dynamic Structure 29
Conduct Holon (COH) 29
Mobility Holon (MH) 29
Services to be Obtained Holon (SOH) 29
Object Service Receiving Holon (OSRH) 29
Flow Holon (FH) 29
3.4 Aggregation Process and Lifecycle of a FH 29
4 Behavioural Model 30
4.1 Planning Process 31
4.2 Resource Scheduling 31
4.3 Service Reception 31
5 Realization 32
6 Conclusion 33
References 33

The Augmentation Concept: How to Make a Product "Active" during Its Life Cycle 35
Yves Sallez
1 Introduction 35
2 The Concept of "Active" Product 36
2.1 Improved Performance of the Pair "Active Products - Support System" 36
2.2 Proposed Model 38
Functional view 38
Evolutionary view 39
3 Application of the Model in a Manufacturing Context 40
3.1 Product Augmentation in a Manufacturing Phase 40
3.2 Real Implementation 41
3.3 Experimental Results 43
4 Application of Our Model in a Condition-Based Maintenance Context 43
4.1 Product Augmentation in Use Phase 43
4.2 Real Implementation 45
4.3 Results 46
5 Conclusion and Prospects 46
References 47

Engineering Hierarchical Complex Systems: An Agent-Based Approach: The Case of Flexible Manufacturing Systems 49
Gildas Morvan, Daniel Dupont, Jean-Baptiste Soyez, and Rochdi Merzouki
1 Introduction 49
2 Two Trends in MABS Research 50
2.1 Multi-level Modelling 50
2.2 The Influences → Reaction Model 51
3 A Generic Meta-model for Multi-level MABS 52
3.1 Specification of the Levels and Their Interactions 52
3.2 Agent Population and Environments 53

3.3 Action Modelling 53
4 Engineering Hierarchical Complex Systems with IRM4MLS 54
4.1 The Emergence/Constraint Paradigm 54
4.2 IRM4MLS Implementation 54
4.3 Conception of Hierarchical Systems 55
4.4 Case Study: AGV Deadlocks in Gradient Field-Based FMS 56
5 Conclusion 57
References 58

HAPBA – A Holonic Adaptive Plan-Based Architecture 61
Doru Panescu and Carlos Pascal
1 Introduction 61
2 Petri Nets Modelling of Holonic Systems; Some Main Planning Issues 62
3 The Need of Holonic Centralized Components – Staff Holons 67
4 Experimental Results and Conclusions 70
References 74

Integrating Intelligent Robot Services in Holonic Manufacturing 75
Florin Daniel Anton, Theodor Borangiu, Silvia Anton, Marco Ceccarelli, and Giuseppe Carbone
1 Introduction 75
2 Decomposing Orders in Operations 77
3 Transforming Operations in Programs 79
4 High Availability Services 81
5 Conclusion 83
References 87

Key Factors for Information Dissemination on Communicating Products and Fixed Databases 89
Sylvain Kubler, William Derigent, André Thomas, and Éric Rondeau
1 Introduction 89
2 The System Characterized by a Guided Flow 91
2.1 General Data Distribution Framework 91
2.2 Distributed Databases through Literature 91
3 Case Study Presentation 93
3.1 Reference Distribution Pattern 93
3.2 Adaptation of the Logistic Process 93
4 DiPA and CoPA Architecture Modelling 95
4.1 Architecture 95
4.2 Estimated "Round Trip Times" via OPNET 95
4.3 Petri Nets: DiPA and CoPA Architectures 96
5 Results and Analysis 98
5.1 Simulation and Results 98
5.2 Key Factor Identification 99
6 Conclusion 101
References 102

A Load Balancing Algorithm for Multi-agent Systems 103
Iulia Ştefan, George Moiş, Szilárd Enyedi, and Liviu Miclea
1 Introduction 103
1.1 Generalities 103
1.2 Load Balancing 104
1.3 Agent Society 105
2 Proposed Solution 106
3 Skill Classes Awareness 108
4 The Load Balancing Algorithm 109
5 Task Agents Transfer 111
6 Distributed Security 112
7 Conclusions and Future Work 112
References 113

A Holonic Approach to Myopic Behavior Correction for the Allocation Process in Flexible-Job Shops Using Recursiveness 115
Gabriel Zambrano Rey, Nassima Aissani, Abdelghani Bekrar, and Damien Trentesaux
1 Introduction 115
2 Myopic Behaviour in Holonic Manufacturing Systems 117
2.1 Recursiveness in HMS 118
3 The Approach 118
3.1 Modelling Holons 119
3.2 Modelling Resources 120
3.3 The Allocation Method 121
3.4 Reactivity to Uncertain Conditions 122
4 Holons and Their Agent-Based Implementation 123
5 FJSP Test Case and Lower Bound Calculation 123
5.1 Mixed-Integer Linear Program (MILP) for FMS 123
6 Results 125
7 Conclusions and Future Work 126
References 127

Integrating e-IMS Platform via Interoperability within Collaborative Enterprises 129
Aurelian Mihai Stanescu, Mihnea Alexandru Moisescu, Ioan Stefan Sacala, and George Burlacu
1 Introduction 129
2 Key Requirement towards the Development of a Methodology for Future Enterprise System of Systems 130
3 From Virtual Enterprise towards Future Enterprise 134
4 Case Study Modules Operator for FInES Supply Chain 138
5 Conclusions 141
References 142

Dynamic Bayesian Network for Decision Aided Disassembly Planning 143
Luminita Duta and Sidali Ad Douche
1 Introduction 143
2 State of the Art 144
3 Dynamic Bayesian Networks 145
4 Proposed Model 147
4.1 Notations and Assumptions 147
5 Validation and Results 148
5.1 Case Study 148
5.2 BayesiaLab 150
5.3 Implementation 151
6 Conclusions 153
References 154

Service Oriented Architecture for Holonic Isoarchic and Multicriteria Control 155
Yves Dubromelle, Fouzia Ounnar, and Patrick Pujo
1 Introduction 155
2 Main Characteristics of PROSIS Approach 157
2.1 Definition of Isoarchic System 157
2.2 Deployment of SOA in Isoarchic System 158
2.3 ACE as Support System for Isoarchic SOA 159
2.4 Presentation of SOA in PROSIS 161
3 Services Provided by ACE 162
3.1 Hosting Service 162
3.2 Decision Support Service 164
4 Conclusion 167
References 167

Viable System Model Approach for Holonic Product Driven Manufacturing Systems 169
Carlos Herrera, Sana Belmokhtar Berraf, and André Thomas
1 Introduction 169
2 VSM for Holonic Product-Driven Manufacturing Systems 170
2.1 Implementation 171
2.2 Coordination 171
2.3 Control 171
2.4 Intelligence 171
2.5 Policy 172
3 Application to MPC Systems 175
3.1 Part I: Design/Virtual 177
3.2 Part II: Design/Physical 177
3.3 Part III: Implementation/Physical 177
3.4 Part IV: Implementation/Virtual 178

4 Discussion 178
5 Conclusion 180
References 180

Speech to Head Gesture Mapping in Multimodal Human-Robot Interaction 183
Amir Aly and Adriana Tapus
1 Introduction 183
2 Prosodic Features Extraction 184
3 Head Pose Estimation 185
4 Speech and Head Gesture Segmentation 188
4.1 Speech Temporal Segmentation 189
4.2 Gestures Temporal Segmentation 190
5 Speech to Head Gesture Coupling 191
6 Experimental Results 193
7 Conclusions 195
References 195

Myopia of Service Oriented Manufacturing Systems: Benefits of Data Centralization with a Discrete-Event Observer 197
Olivier Cardin and Pierre Castagna
1 Introduction 197
2 Service Oriented Manufacturing Systems 198
2.1 Service Orientation in the Context of Distributed Manufacturing Systems 198
2.2 Service Oriented Manufacturing System Example 199
3 HMS and SOA 200
3.1 PROSA Modelling 200
3.2 PROSA in SOA 201
4 Centralizing Data, Not Decisions 202
4.1 Gathering an Up-to-Date State of a HMS 202
4.2 Integration in HMS 203
5 Applications 204
5.1 Application to Decision DG2 204
5.2 Application to Decision DL1 205
Problem Definition 206
Scenarios 207
Results and Discussion 207
6 Conclusion and Future Works 209

A JADE Environment for Product Driven Automation of Holonic Manufacturing **265**
Silviu Raileanu, Mihai Parlea, Theodor Borangiu, and Octavian Stocklosa
1 Introduction 265
2 Using Intelligent Products for Decision Taking in an Industrial Environment 266
2.1 Control System Model 266
2.2 Production Driving Strategies 268
2.3 Using the CNP to Obtain Workstation Offers and Make Reservations 270
2.4 Comparing Robot Offers 271
2.5 Planning the Route 272
2.6 Taking the Production Decision 273
3 Product Driven Automation 273
4 Software System for Implementation Using the JADE Environment 275
4.1 Message Exchange System 275
4.2 System Classes and Implementation 276
5 Conclusions 277
