

Contents

1. The Beginnings of Doppler	1
By <i>A. Eden</i>	
2. Transmission of Ultrasound Through the Temporal Bone . .	10
By <i>P. Grolimund</i>	
3. The Doppler Principle Applied to Measurement of Blood Flow Velocity in Cerebral Arteries.	22
By <i>R. Aaslid</i>	
4. Transcranial Doppler Examination Techniques	39
By <i>R. Aaslid</i>	
5. Cerebral Hemodynamics	60
By <i>R. Aaslid</i> and <i>K.-F. Lindegaard</i>	
6. Cerebral Arteriovenous Malformations	86
By <i>K.-F. Lindegaard</i> , <i>R. Aaslid</i> , and <i>H. Nornes</i>	
7. Comparison of Intraoperative and Transcranial Doppler . .	106
By <i>J. Gilsbach</i> and <i>A. Harders</i>	
8. Transcranial Doppler for Evaluation of Cerebral Vasospasm .	118
By <i>R. W. Seiler</i> and <i>R. Aaslid</i>	
9. Monitoring Hemodynamic Changes Related to Vasospasm in the Circle of Willis After Aneurysm Surgery	132
By <i>A. Harders</i>	
10. Transcranial Doppler Monitoring	147
By <i>E. B. Ringelstein</i>	
11. Transcranial Doppler in the Study of Cerebral Perfusion During Cardiopulmonary Bypass	164
By <i>T. Lundar</i>	
Subject Index	173
