

Table of contents

1	Introduction	1
1.1	Background.....	1
1.1.1	History of Liebherr-Werk Nenzing GmbH	1
1.1.2	Origin of the Compendium.....	2
1.2	Structure and use of the Compendium	2
1.2.1	General.....	2
1.2.2	Structure of the main chapters.....	2
1.2.2.1	Process principle	2
1.2.2.2	Characteristics and application limits	3
1.2.2.3	Machinery with equipment	3
1.2.3	Applications of the drilling processes	3
1.2.4	IT solutions	3
1.2.5	Technical explanations to the Compendium.....	3
2	General	5
3	Kelly drilling	13
3.1	Process principle	13
3.1.1	Kelly bar	13
3.1.2	Drilling	20
3.1.2.1	Uncased Kelly drilling.....	20
3.1.2.1.1	Uncased.....	20
3.1.2.1.2	Uncased with support fluid	20
3.1.2.2	Cased Kelly drilling.....	22
3.1.2.2.1	Fully cased	22
3.1.2.2.2	Fully cased with support fluid.....	24
3.1.2.2.3	Partially cased	24
3.1.2.2.4	Partially cased with support fluid.....	25
3.1.2.2.5	Fully or partially cased drilling with casing oscillator.....	26
3.1.3	Filling	27
3.1.3.1	Cleaning of the borehole bottom.....	27
3.1.3.2	Reinforcement of the pile	28
3.1.3.3	Concreting the pile and extracting the casing.....	28
3.1.3.4	Trimming of the pile head.....	31

3.2	Characteristics and application limits	32
3.2.1	Characteristics.....	32
3.2.2	Application limits.....	32
3.3	Machinery and equipment.....	35
3.3.1	Carrier machines	35
3.3.2	Rotary drives	37
3.3.3	Casing oscillators and casing rotators.....	38
3.3.3.1	Casing oscillators	38
3.3.3.2	Casing rotators.....	40
3.3.4	Machine limits.....	41
3.3.5	Tool system	42
3.3.5.1	Kelly bars.....	42
3.3.5.2	Casing drivers.....	43
3.3.5.3	Casings	44
3.3.5.4	Cutting shoes	46
3.3.5.5	Retaining clamps.....	46
3.3.5.6	Augers.....	47
3.3.5.7	Drilling buckets	48
3.3.5.8	Core barrels.....	50
3.3.5.9	Special drilling tools	51
3.3.5.9.1	Belling buckets.....	51
3.3.5.9.2	Cross cutters.....	52
3.3.5.9.3	Cluster drills.....	52
3.3.5.10	Wear parts.....	53
3.3.5.11	Applicability of drilling tools	54
4	Continuous flight auger drilling.....	57
4.1	Process principle	57
4.1.1	Closed system – with small hollow stem	58
4.1.1.1	Drilling	58
4.1.1.2	Concreting and extraction.....	58
4.1.1.3	Reinforcement	60
4.1.2	Open system – with large hollow stem.....	61
4.1.2.1	Drilling	61
4.1.2.2	Reinforcement	62
4.1.2.3	Concreting and extraction.....	62

4.2	Characteristics and application limits	62
4.2.1	Characteristics.....	62
4.2.2	Application limits.....	64
4.3	Machinery with equipment	64
4.3.1	Carrier machines	64
4.3.2	Rotary drives	66
4.3.3	Concrete pumps.....	67
4.3.4	Machine limits.....	69
4.3.5	Tool system	70
4.3.5.1	Augers.....	70
4.3.5.2	Kelly extension.....	71
4.3.5.3	Auger cleaners	72
4.3.5.4	Auger starters.....	72
4.3.5.4.1	Auger starters for predrilling	72
4.3.5.4.2	Auger starters for cast-in-place piles – closed system.....	73
4.3.5.4.3	Auger starters for cast-in-place piles – open system.....	73
4.3.5.5	Drill bits	73
4.3.5.6	Wear parts.....	74
4.3.5.7	Applicability of drilling tools	74
5	Double rotary drilling	77
5.1	Process principle	77
5.1.1	Drilling	78
5.1.2	Concreting and extraction.....	78
5.1.3	Reinforcement	78
5.2	Characteristics and application limits	78
5.2.1	Characteristics.....	78
5.2.2	Application limits.....	79
5.3	Machinery with equipment	79
5.3.1	Carrier machines	79
5.3.2	Rotary drives	81
5.3.3	Machine limits.....	83
5.3.4	Tool system	84
5.3.4.1	Casing drivers.....	84
5.3.4.2	Casings	85
5.3.4.3	Cutting shoes	85

5.3.4.4	Protective cover.....	86
5.3.4.5	Head pieces	86
5.3.4.6	Augers.....	87
5.3.4.7	Auger starters.....	87
5.3.4.8	Wear parts.....	88
5.3.4.9	Applicability of drilling tools	88
6	Full displacement drilling.....	91
6.1	Process principle	91
6.1.1	Closed system.....	91
6.1.1.1	Drilling	91
6.1.1.2	Concreting and extraction.....	91
6.1.1.3	Reinforcement	92
6.1.2	Open system.....	92
6.1.2.1	Drilling	92
6.1.2.2	Reinforcement	93
6.1.2.3	Concreting and extraction.....	93
6.2	Characteristics and application limits	94
6.2.1	Characteristics.....	94
6.2.1.1	Closed system.....	95
6.2.1.2	Open system.....	95
6.2.2	Application limits.....	95
6.3	Machinery with equipment	96
6.3.1	Carrier machines	96
6.3.2	Rotary drives	98
6.3.3	Machine limits.....	99
6.3.4	Tool system	100
6.3.4.1	Drive tubes	100
6.3.4.2	Kelly extension.....	100
6.3.4.3	Displacer	101
6.3.4.3.1	Closed system.....	101
6.3.4.3.2	Open system.....	102
6.3.4.4	Drill bits	103

7	Grab drilling	107
7.1	Process principle	107
7.1.1	Cased grab drilling	107
7.1.1.1	Fully cased	107
7.1.1.2	Partially cased	107
7.1.2	Uncased grab drilling	108
7.1.2.1	Uncased	108
7.1.2.2	Uncased with support fluid	108
7.2	Characteristics and application limits	109
7.2.1	Characteristics	109
7.2.2	Application limits	110
7.3	Machinery with equipment	110
7.3.1	Carrier machines	110
7.3.2	Casing oscillators and casing rotators	112
7.3.2.1	Casing oscillators	112
7.3.2.2	Casing rotators	114
7.3.3	Machine limits	115
7.3.4	Tool system	115
7.3.4.1	Casings	115
7.3.4.2	Pile grabs	115
7.3.4.2.1	Mechanical pile grabs	116
7.3.4.2.1.1	Single-rope grabs	116
7.3.4.2.1.2	Two-rope grabs	118
7.3.4.2.2	Hydraulic pile grabs	119
7.3.4.3	Chisels	120
7.3.4.4	Special drilling tools	120
7.3.4.4.1	Gravel pumps	120
7.3.4.4.2	Mud buckets	121
8	Reverse circulation drilling	125
8.1	Process principle	125
8.2	Characteristics and application limits	127
8.2.1	Characteristics	127
8.2.2	Application limits	128

8.3	Machinery with equipment	128
8.3.1	Carrier machines	130
8.3.2	Casing oscillators	131
8.3.3	Pile top drill rigs	131
8.3.4	Machine limits.....	132
8.3.5	Tool system	132
8.3.5.1	Casings	132
8.3.5.2	Drill string	132
8.3.5.3	Cutting head.....	135
8.3.5.4	Belling buckets	136
8.3.5.5	Underreamer	137
9	Down-the-hole drilling	139
9.1	Down-the-hole hammer	139
9.1.1	Functional principle.....	139
9.1.2	Cluster drill	143
9.2	Flushing.....	144
9.2.1	Conventional flushing.....	144
9.2.2	Reverse circulation flushing.....	144
9.2.3	Crossover flushing	146
9.3	Cased down-the-hole drilling	147
9.3.1	Process principle	147
9.3.1.1	Drilling	147
9.3.1.2	Lifting and extending of drill string and casing	149
9.3.1.2.1	Horizontal set-up.....	149
9.3.1.2.2	Vertical set-up	150
9.3.1.2.3	Drill rod and casing tube extension.....	151
9.3.2	Characteristics and application limits	152
9.3.2.1	Characteristics	152
9.3.2.2	Application limits	153
9.3.3	Machinery with equipment.....	154
9.3.3.1	Carrier machines	154
9.3.3.2	Rotary drives.....	156
9.3.3.3	Down-the-hole hammers.....	159
9.3.3.3.1	DTH hammer accessories	160

9.3.3.4	Machine limits	161
9.3.3.5	Tool system.....	161
9.3.3.5.1	Casing tubes.....	161
9.3.3.5.2	Drill string	162
9.3.3.5.3	Drill bit systems	164
9.3.3.5.3.1	Concentric drill bit system	165
9.3.3.5.3.1.1	Symmetrix.....	166
9.3.3.5.3.1.2	Elemex.....	167
9.3.3.5.3.2	Selection criteria.....	168
10	Applications of the drilling processes	173
10.1	General.....	173
10.1.1	Pile systems	173
10.1.2	Terms and descriptions.....	173
10.2	Cast-in-place piles	175
10.2.1	Operating principle	175
10.2.2	Pile load-bearing capacity.....	175
10.2.3	Pile load tests	176
10.2.3.1	Integrity tests	176
10.2.3.1.1	Pulse echo integrity tests.....	177
10.2.3.1.2	Ultrasonic integrity tests.....	177
10.2.3.1.3	Core drilling	177
10.2.3.2	Static pile load tests	177
10.2.3.2.1	External hydraulic cylinders.....	177
10.2.3.2.2	Osterberg method	179
10.2.3.3	Dynamic pile load tests.....	182
10.2.3.3.1	High strain method	182
10.2.3.3.2	Statnamic method	183
10.2.4	Pile foundation systems.....	184
10.2.4.1	Single piles, pile groups and combined pile-raft foundations	184
10.2.4.2	Bored pile walls	184
10.2.5	Special applications.....	191
10.2.5.1	Batter piles	191
10.2.5.2	Foot and shaft enlargement.....	192
10.2.5.3	Pile base and pile shaft grouting	192

10.2.5.4	Sleeve pipes	193
10.2.5.5	Geotextile cover.....	195
10.2.5.6	Geothermal exploitation.....	195
10.3	Installation of load-bearing or supporting elements with precast steel or concrete elements.....	199
10.3.1	General.....	199
10.3.2	Installation in a temporary casing.....	199
10.3.2.1	Steel beam profiles	199
10.3.2.2	Precast concrete elements	201
10.3.2.3	Steel pipes	201
10.3.3	Load-bearing and support elements with permanent casings	202
10.3.3.1	Installation by the dry drilling method	202
10.3.3.2	Installation by the hydraulic circulation method as cased DTH drilling.....	202
10.4	Replacement drilling	205
10.5	Predrilling.....	206
10.5.1	General.....	206
10.5.2	Installation	206
10.5.3	Predrilling by continuous flight auger drilling	206
10.5.4	Predrilling by double rotary drilling.....	207
10.6	Construction of wells	208
10.6.1	General.....	208
10.6.2	Installation	208
10.6.3	Well systems	209
10.7	Micropiles of steel bars with ribbed surface.....	210
10.7.1	General.....	210
10.7.2	Process principle	211
10.7.3	Characteristics	211
10.7.4	Application limits.....	213
10.7.5	Micropile tests	213
11	IT solutions.....	217
11.1	General.....	217
11.1.1	Digitisation in construction	217
11.1.2	Digitisation in deep foundation engineering	217
11.2	Site survey	218

11.3	Planning.....	219
11.3.1	Machine deployment planning	219
11.3.2	Lifting deployment planning	220
11.3.3	Simulator	221
11.4	Operator assistance systems.....	223
11.4.1	Remote control.....	223
11.4.2	Control monitor.....	223
11.4.3	Camera systems.....	224
11.4.4	Positioning system.....	224
11.4.5	Automatic leader adjustment	225
11.4.6	Kelly assistant.....	225
11.4.7	Automatic shake-off.....	226
11.4.8	Drilling assistant.....	226
11.4.9	Verticality assistant	227
11.4.10	Automatic winch control	227
11.4.11	Automatic chisel control.....	227
11.4.12	Process data recording.....	228
11.4.13	Ground pressure assistant	228
11.4.14	Attachment recognition.....	229
11.5	Quality management.....	229
11.5.1	Process data recording.....	229
11.5.2	Process data reporting	229
11.5.3	Real-time monitoring	231
11.6	Telematics system.....	231
11.6.1	Machine information	231
11.6.2	Messages.....	231
11.6.3	Maintenance.....	232
11.6.4	Reports	232
11.6.5	Teleservice.....	233
11.6.6	Process data transmission.....	233
12	Technical explanations to the Compendium	235
12.1	Carrier machines	235
12.2	Rotary drives	235

12.3	Technical data	235
12.3.1	Leader length	235
12.3.2	Crowd distance	235
12.3.3	Distance from rotational axis to drilling axis	236
12.3.4	Effective length	236
12.3.4.1	Without Kelly extension.....	236
12.3.4.2	With Kelly extension	237
12.3.5	Vertical leader adjustment	237
12.3.6	Boom length	238
12.3.7	Total height	238
12.3.8	Hook height	238
12.3.9	Winch line pull	238
12.4	Machine limits.....	240
12.4.1	General.....	240
12.4.2	Drilling diameter.....	240
12.4.3	Drilling depth	241
12.4.4	Crowd force and pull force.....	244
12.4.5	Line pull Kelly winch.....	245
12.5	Applicability of drilling tools	246
12.6	Colour scheme	247
