

Contents

1	Introduction	1
2	Materials and Methods	5
3	Results	7
3.1	Anatomy of the Spinal Accessory (XI) Muscles	7
3.2	Anatomy of the Nerves Supplying the Spinal Accessory (XI) Muscles	9
3.3	The Spinal Accessory (XI) Nucleus	10
3.4	Emergent Course of Axons Arising in the Spinal Accessory (XI) Nuclear Complex and the Intramedullary Ascending Spinal XI Fasciculus	18
3.5	Somatotopic Organization of the Spinal Accessory (XI) Nucleus	22
3.6	Communicating Branches of the Cervical Plexus	23
4	Discussion	26
4.1	Topographic and Geometric Position of the Spinal Accessory (XI) Nuclear Complex	26
4.2	Somatotopic Organization of the Spinal Accessory (XI) Nuclear Complex: Functional Significance of the Spinal XI Muscles and of the Spinal XI Subnuclei	29
4.2.1	Myology	30
4.2.2	Somatotopic Grouping of the Motoneurons	31
4.2.3	Significance of the Motoneuronal Pools	33
4.2.3.1	Developmental Considerations	34
4.2.3.2	Supraspinal Control of the Medial Subnucleus of the Spinal XI Nuclear Complex	37
4.3	The Spinal Accessory (XI) Nerve: A Cranial Nerve of Special Visceral Origin?	39
4.4	Significance of the Motoneuronal Organization in the Cervical Cord	43
	Summary	50
	References	52
	Subject Index	58
