

Contents

B. E. Strauer	
Opening remarks	9
W. Klaus	
Current pharmacology of nitrates and calcium antagonists	11
A. M. Ehrly	
Effects and modes of action of nitrates upon rheologic properties of the blood and the supply to ischaemic tissue	23
E. Ernst, A. Matrai	
Recent findings on the effect of nitroglycerin on haemorheology	29
N. Franke	
Nitroglycerin therapy in operative medicine considering micro- and macrohaemodynamic aspects	37
A. G. Franks jr.	
Topical glyceryl trinitrate as adjunctive treatment in Raynaud's disease	47
M. Staritz, K.-H. Meyer zum Büschenfelde	
Studies of glyceryl trinitrate application in gastroenterology	53
W.-D. Bussmann, H. Sievert, R. Geiß, F. D. Maul, M. Kaltenbach	
Regional ventricular function before and after sublingual nitroglycerin in patients with a recent myocardial infarction, during the subacute and chronic phase	65
M. Stauch	
Therapy of coronary heart disease with nitrates in combination with other antianginal agents	71
H. Just	
Nitrate tolerance	81

M. Tauchert, W. Jansen	
New results in the field of nitrate tolerance under nitroglycerin, ISDN and ISMN	87
J. O. Parker	
Current results of nitroglycerin therapy	97
A. Boskamp	
Presentation of the Nitrolingual prize, 1985	99
Supplement	
W. Schneider, G. Krumpl, N. Mayer, G. Raberger	
Nitroglycerin prevents exercise induced regional myocardial dysfunction in dogs	103
K. K. Teo, J. H. Horgan	
Prevention of diminished activity of glyceryl trinitrate by use of an aerosol . . .	113
I. Hutton, A. C. Tweddel, I. McGhie, W. Martin	
Contrasting effects of Nitrolingual-Spray® at rest and after exercise induced angina post exercise on myocardial nutrient flow	115
