

CONTENTS

1. Introduction	1
2. Forced Plume Model	9
2.1 Formulation of basic model equations	10
2.2 Entrainment velocity	18
2.2.1 Advective flows	22
2.2.2 Environmental turbulence	23
2.3 Surface roughness and wind profile	45
2.4 Dense effluents	53
2.4.1 Model formulation	53
2.4.2 The Boussinesq approximation	57
3. Cross-Sectional Profiles	59
3.1 Top Hat and Gaussian profiles	59
3.1.1 Zone of flow establishment (ZFE) ..	62
3.1.2 Model equivalent parameters	64
3.2 Radial length scales	70
3.2.1 Rates of spread	74
3.2.2 The effects of stratification on the crosssectional shape	80
3.3 Urban plumes	84
4. Gaussian Plume Model	93
4.1 Fickian diffusion	93
4.2 The third phase and its relation to Fickian diffusion	94
5. Ground Level Concentrations	97
6. Software specification	100
7. Conclusions	101
