FOREWORD
PATRONS COMMITTEE
LOCAL ARRANGEMENTS COMMITTEE

	Page
SYMPOSIUM ON "SOCIAL SYSTEMS"	
B. D. JOSEPHSON (U.K.)	<i>A Theoretical Analysis of Higher states of Consciousness and Meditation</i> 3
O. RADEMAKER (Netherlands)	<i>Modelling and Simulation of Macro-Social Systems for Cybernetic Purposes</i> 4
J. RANDERS (Norway)	<i>The Potential in Simulation of Macro-Social Processes or How to be a Useful Builder of Simulation Models</i> 6
A. RAPOPORT (U.S.A.)	<i>Simulation-Reality: A Feedback Loop</i> 7
H. A. SIMON (U.S.A.)	<i>Simulation of Large-Scale Systems by Aggregation</i> 8
SYMPOSIUM ON "COMPUTER PRIVACY"	
D. FIRNBERG (U.K.)	<i>To be Effective, Privacy Needs Security!</i> 13
F. HONDIUS (France)	<i>Computer Privacy—Regulatory Aspects</i> 15
J. C. LAUTSCH (U.S.A.)	<i>Computers and the Law of Privacy: The American Experience</i> 17
Y. MASUDA (Japan)	<i>Privacy in the Future Information Society</i> 18
SYMPOSIUM ON "ROBOTS"	
J. F. ENGELBERGER (U.S.A.)	<i>Robotics and Society</i> 23
I. KATO (Japan)	<i>The Future of Robotics</i> 28
M. W. THRING (U.K.)	<i>Telechirics</i> 29
H. J. WARNECKE, R. D. SCHRAFT and E. ABELE (F.R.G.)	<i>Industrial Robot Today—Structure and Application</i> 30
SECTION 1—ARTIFICIAL INTELLIGENCE	
S. S. AGAIAN and A. G. SARUKHANIAN (U.S.S.R.)	<i>A Note on the Construction of Hadamard Matrices</i> 35
M. ALFONSECA (Spain)	<i>Automatic Solution of Syllogisms and Sorites</i> 36
C. ARCELLI and G. SANNITI DI BAJA (Italy)	<i>Role of Elongatedness in Digital Figure Compression</i> 37
C. B. BALOGH and M. E. BALOGH (U.S.A.)	<i>On a Learning System</i> 38
A. GHOSE (India)	<i>Machine Intelligence and a Constructive Epistemology</i> 39
A. GHOSE (India)	<i>Designing C.A.I. on Some Ideas of Artificial Intelligence</i> 40
R. GLANVILLE (U.K.)	<i>The Model's Dimensions: A Form for Argument</i> 42
R. GLANVILLE and P. JACKSON (U.K.)	<i>Theory of Model Dimensions to Relational Databases</i> 43
I. M. KREIN (U.S.S.R.)	<i>Representation of the Environment in a Complex Heterogeneous Stationary Random Medium</i> 44
G. E. LASKER (Canada)	<i>Interactive Mobile Automata: Deterministic Models</i> 45
A. LOCKER (Austria)	<i>Elements of a Cybernetic Theory of Purposiveness</i> 47
G. F. LUGER (U.K.)	<i>The Mechanics Problem Solver: A Problem and Goal-Driven Inferencing System</i> 49
M. J. MAGEE (U.S.A.)	<i>Using Transducer Tremor to Refine Gray Level Images</i> 51
V. MASNIKOSA (Yugoslavia)	<i>Artificial Intelligence Structure Based on Associative Space</i> 52
L. J. MAZLACK (Canada)	<i>An AI Archetype</i> 54
M. R. MILLAN and P. L. DA R. FILHO (Brazil)	<i>Using Natural Language in a CAI System: The Knowledge Base</i> 55
H. NOMURA (Japan)	<i>A Model for Knowledge Acquisition Systems with Problem Solver</i> 59

		Page
E. P. L. PASSOS, R. L. DE CARVALHO and S. R. PEIXOTO (Brazil)	<i>Communication Predicates: A Complete Strategy for Resolution-Based Theorems-Provers: An Evalu- ation of an Implementation</i>	60
F. D. PESCHANEL (F.R.G.)	<i>Optimal Information Reduction Systems Require Multi-Layer-Structures</i>	63
H.-J. SCHEK (F.R.G.)	<i>Automatic Error Detection in Natural Language Words</i>	64
A. SCHREURS and H. BAART (Netherlands)	<i>Cybernetics and Conceptual Analysis</i>	65
L. SIKLÓSSY and J. DREUSSI (U.S.A.)	<i>Negative Goals and Forbidden States</i>	66
S. N. SRIHARI (U.S.A.)	<i>Efficient Measurement Selection in Invariant Pattern Recognition</i>	67
P. TANCIG, I. BRATKO and S. TANCIG (Yugoslavia)	<i>Mental Set Revisited in the Formal Manner</i>	68
P. ZUNDE (U.S.A.)	<i>On the Problem of Representation</i>	69
SECTION 2—CYBERNETICS OF ECONOMIC SYSTEMS AND MANAGEMENT		
I. ASSA and T. PETROV (Bulgaria)	<i>Cybernetic Approach to the Management of Econo- mic Systems</i>	73
J. Y. AULOGE, M. J. CAPRANO and A. DUSSAUCHOY (France)	<i>Evolution of an Input-Output Leontief Matrix</i>	74
J. BAJEC (Yugoslavia)	<i>The Correspondence System as a Method of Inter- dependence Measurement in Comparative Develop- ment Analyses</i>	76
S. BÎRLEA, T. HOMOS and C. SUCIU (Romania)	<i>Applied Entropic Concepts for Establishing the Organisational Level in Machines Building Enter- prises</i>	77
A. CHIKÁN (Hungary)	<i>The National Economy, as a Material Stock and Flow System</i>	79
E. A. DANIELIAN (U.S.S.R.)	<i>Asymptotical Investigation of the Virtual Waiting Time for Priority Queues in a Busy Store</i>	80
W. DREGER (D.D.R.)	<i>Systematic and Goal-Oriented Targets for Systems Planning</i>	81
M. DUBOIS (Belgium)	<i>Limits to Modeling and Optimal Control of Dynamic Systems in an Economy: Towards Another Oper- ations Research</i>	82
B. HENGST (U.K.)	<i>Development and Implementation of a Hierarchical Computer Aided Company Planning System</i>	83
T. ISHIHARA (Japan)	<i>Cybernetics of Technology and Economic Growth</i>	85
A. G. KEFALAS (U.S.A.)	<i>Managing a Steady-State Firm. A Cybernetic Framework</i>	86
N. J. T. A. KRAMER (The Netherlands)	<i>Controlled Problem Solving in Management</i>	87
A. KRAN (U.S.A.)	<i>System Simulation and Cybernetics Affirm Potential of Low Cost Solar Power</i>	88
H. G. LAUENROTH (D.D.R.)	<i>Algorithmic Systems with Hierarchical Structure for Control of Economic Processes</i>	90
M. LUKKA (Finland)	<i>The Environmental Effects of Economical Growth—A Two-Level Mathematical Model</i>	92
J. A. DOMINGUEZ MACHUCA (Spain)	<i>The Choice of Policies in Socioeconomic Systems by System Dynamics (Presentation of a Real Case)</i>	94
V. MATEJIĆ (Yugoslavia)	<i>"Resistance" Towards Change and Its Effect on Deci- sion-Making</i>	95
H. MYOKEN (Japan)	<i>Economic Cybernetics of Informatics: Decision and Control</i>	96
H. MYOKEN and Y. UCHIDA (Japan)	<i>A System Modelling for the World Economy and Control Simulation Analysis: A Two-Country Case</i>	97
S. OSTOJÍ (Yugoslavia)	<i>Information Structure of Multi-Level Planning Pro- cesses in Self-Management Environment</i>	98
V. PESCARU and I. CATONA (Romania)	<i>The Development of Management Systems for Data Banks with Facilities for Calculations on Tree-Like Information Structures</i>	99
S. PETROVIĆ-LAZAREVIĆ (Yugoslavia)	<i>Self-Management Social Welfare Model</i>	101
M. PÍŠEK (Czechoslovakia)	<i>Stochastic Experiments with an Econometric Model</i>	102
G. A. POPOV (U.S.S.R.)	<i>Some Remarks on the Theorem of Gnedenko and Soloviev</i>	103
J. RUDOLPH (D.D.R.)	<i>An Analytical Model for the Material Transforma- tion Process</i>	104

D. STODOLSKY (U.S.A.)	<i>Information Systems for Self-Management</i>	Page 106
R. STOJANOVIĆ (Yugoslavia)	<i>The Role of the Motivation System in the Optimization of Complex Economic System</i>	107
R. TOMKINS and R. J. BETTS (U.K.)	<i>Theory and Practice with a System Dynamics Model of the U.K. Economy</i>	109
J. VOBOŘIL (Czechoslovakia)	<i>Computational Experiments with an Economic System Model</i>	110
M. WALKER, D. ELLIOTT, P. MCCABE and D. STOREY (U.K.)	<i>A Cost Abatement Model of the River Tees (in the U.K.)</i>	112
J. WĘGLARZ (Poland)	<i>On Certain Models of Resource Allocation Problems</i>	113

SECTION 3—INDUSTRIAL CYBERNETICS

Y. ALEKAL (U.S.A.)	<i>Some Aspects of Automated Quality Control</i>	117
A. ATHANASSOV (G.D.R.)	<i>On the Dual Adaptive Control of Stochastic Systems</i>	119
S. BAJUREANU and C. BUDA (Romania)	<i>An Application of the Bajureanu-Buda Criteria in On-Off Control Systems</i>	120
G. BARTOLINI, G. CASALINO, F. DAVOLI, R. MINCIARDI and R. ZOPPOLI (Italy)	<i>Algorithms for Direct Digital Control and their Implementation on Micro-Computers</i>	121
M. EREMIA and A. V. GHEORGHE (Romania)	<i>The Stability of Large-Scale Systems in the Face of Small Perturbations</i>	122
A. V. GHEORGHE (Romania)	<i>Information and Coherence in Large-Scale Energy System Design</i>	123
B. GLIKSMAN (Poland)	<i>Decision Tables in Computer-Aided Engineering Projects</i>	124
T. A. HYDE and D. W. C. SHEN (U.S.A.)	<i>A New Method for Optimizing Systems with Bounded-State Variables</i>	125
C. R. JOHNSON JR. (U.S.A.)	<i>Adaptive Control via Input Matching Despite Plant Structure Uncertainty</i>	128
E. C. KOENIG (U.S.A.)	<i>Application of Some Rules of Propositional Calculus to the Design of Digital Systems: Introduction and Elimination Rules</i>	130
T. POSTON (Switzerland)	<i>Stability of Correct Reasoning</i>	131
B. H. RUDALL, R. F. W. COATES and N. T. SHEPHEARD (U.K.)	<i>A Compiler Technique for Modelling Multiprocessor Systems Utilising Microprocessors of Arbitrary Architecture</i>	132
L. L. TÖVISSI, I. T. IVAN, E. N. MOSCOVICI, I. T. MIHAI, G. A. BALTATEANU and I. N. URSATEANU (Romania)	<i>A Model System for the Management of Discontinuous Processes in a Production Sector</i>	133
J. A. G. ZORBAS (Iran)	<i>Man's Reliability Under Operator Stress</i>	135

SECTION 4—INFORMATICS AND EDUCATION

C. BILCIU and G. DIACONESCU (Romania)	<i>The Information System for Educational Management Activity</i>	139
M. C. BOTEZ and M. CELAC (Romania)	<i>Evolution Through Learning: An Image-Making Oriented Approach</i>	141
D. F. CAHN and J. J. HERR (U.S.A.)	<i>Automatic Database Mapping and Translation Methods</i>	142
F. COLLOT, M. BOUMOKRA, R. CASSE and J. RICARD (France)	<i>Concept of P-Information</i>	143
R. DE MORI and E. PICCOLO (Italy)	<i>Automatic Detection and Recognition of Vowels in Continuous Speech</i>	143
J. L. ELOHIM (Mexico)	<i>Towards a Scientific Theory of Pedagogy</i>	145
W. GOFFMAN and M. L. PAO (U.S.A.)	<i>An Automatic Information System for Self-Learning</i>	146
T. C. HELVEY (U.S.A.)	<i>Psycho-Cybernetics of Human Behaviour with Special Reference to Learning Deficiency in Children</i>	147
A. İRTEM (Turkey)	<i>Simulation of Free Will</i>	148
K. LOWE (U.K.)	<i>A Cybernetic Teaching System for Undergraduate Engineers</i>	150
B. MICHAEL JAMES (U.K.)	<i>Some Systems Concepts and Educational Systems Development</i>	151
C. MUSÈS (U.S.A.)	<i>Psycho-Cultural Cybernetics: The Psycho-Dynamic Cybernetics of Acculturation</i>	154
A. NIGRO (Italy)	<i>Learning as Decoding</i>	156
C. NIZNIK-WALTER (U.S.A.)	<i>Modelling of Computer Communication Networks via Probabilistic Automata</i>	157
S. ODOBLEJA (Romania)	<i>Diversity and Unity in Cybernetics</i>	158

		Page
T. RADECKI (Poland)	<i>A Model of a Document Retrieval System Based on the Conception of Semantic Disjunctive Normal Form</i>	159
N. P. REDDY (U.S.A.)	<i>Information, Entropy and Knowledge</i>	161
G. H. R. REISIG (U.S.A.)	<i>Analysis of Nonstationary Data-Sets by Information-Filtering</i>	163
B. H. RUDALL (U.K.)	<i>A Cybernetic Approach to the Specification and Interfacing of Software Modules</i>	164
A. M. SANDI (Romania)	<i>Learning Through New Information—A changing Structure Oriented Approach</i>	165
N. A. SCHMAJUK and E. T. SEGURA (Argentina)	<i>Cybernetic Approach to Escape Learning in Toads</i>	166
D. R. STEG and R. SCHULMAN (U.S.A.)	<i>Universally Shared Attributes of Human Behaviour</i>	169
G. E. VERESS, T. BLICKLE, I. ISASZEGI-VASS, E. PUNGOR and K. SEITZ (Hungary)	<i>Application of the Structure Theory in Learning Systems</i>	170

SECTION 5—NEURO AND BIO-CYBERNETICS

E. BERNARD-WEIL, P. NELSON, S. SELLAM, P. CURTZ and Y. CHERRUAULT (France)	<i>A Model for the Regulation of Agonistic-Antagonistic Couple in the Field of Medical Therapeutics, Mathematical Study and Other Applications</i>	175
G. CHAUVET and P. SIX (France)	<i>Theoretical Analysis of Bronchial Elasticity and Regional Inequalities in the Ventilation Mechanism</i>	176
Y. CHERRUAULT and A. GUILLEZ (France)	<i>Analytical Solution of a Respiration Model</i>	178
CHUN CHIANG (Taiwan)	<i>Cybernetic Elucidation of the Nerve Action Potential</i>	179
J. T. CORLETT, T. W. CALVERT and E. W. BANISTER (Canada)	<i>The Cybernetics of Human Physical Performance</i>	180
V. DROZEN (Czechoslovakia)	<i>Combinatory Spaces and Memory</i>	183
W. DÜCHTING (F.R.G.)	<i>Simulation of Disturbed Cell Renewal Systems by Means of a Microprocessor System</i>	184
M. DUPUY (France)	<i>Operating Model of the Nephron</i>	186
T. B. FOWLER (U.S.A.)	<i>A Thermodynamic Definition of the Computer and Its Application to Biological Systems</i>	187
B. K. GILBERT, L. M. KRUEGER, E. R. SWARTZLANDER JR., D. E. ATKINS, A. CHU and E. L. RITMAN (U.S.A.)	<i>Application of Optimized Parallel Processing Digital Computers and Numerical Approximation Methods to the Ultra-High Speed Three Dimensional Reconstruction of the Intact Thorax</i>	189
B. JAMES (U.K.)	<i>The Cybernetics of Musical Appreciation</i>	192
M. KLJAJIĆ, A. TRNKOCZY and U. STANIČ (Yugoslavia)	<i>Energy-Information Performance Criteria of Walking</i>	194
E. KOHEN, C. KOHEN, J. G. HIRSCHBERG, A. W. WOUTERS and P. BARTICK (U.S.A.)	<i>Multichannel Analysis of Intracellular Control and Intercellular Transfer of Molecules</i>	195
K. V. LEUNG, H. D. MIDDENDORF and K. S. O'MARA (Canada)	<i>On the Development of a Twin Exponential Model Fitting Process</i>	197
M. D. LEVINE and Y. M. YOUSSEF (Canada)	<i>An Automatic Picture Processing Method for Tracking and Quantifying the Dynamics of Blood Cell Motion</i>	199
J. P. MAINGUY (France)	<i>Optimal Control of Haemodynamical Parameters in Heart Disease</i>	200
G. C. MANGIAMELI (Italy)	<i>Bio- and Neurocybernetic Models of the Living Being</i>	201
R. MORENO-DÍAZ, E. RUBIO and F. RUBIO ROYO (Spain)	<i>A Generalized Model for Non-Linear Retinal Processing</i>	202
R. MORENO-DÍAZ and O. SANTANA (Spain)	<i>A Program Framework for Experimenting with Retinal Models</i>	204
T. G. MORRIS (U.S.A.)	<i>The Use of the Medical Record as Feedback Control For Medical Information Centers</i>	205
J. S. NICOLIS, E. N. PROTONARIOS and M. THEOLOGOU (Greece)	<i>Communication Between Two Self-Organising Systems Modelled by Controlled Markov Chains</i>	207
H. POLAND, A. GIEBLER and R. WOŁOSZCZAK (F.R.G.)	<i>A Program Library for Computing the Parameters of Linear Compartment Models in Pharmacokinetics</i>	208
J. F. SCHUH-MORENO (Spain)	<i>Variable Random Nerve Nets</i>	210
G. D. SWANSON (U.S.A.)	<i>Input Stimulus Design for Model Discrimination in Human Respiratory Control</i>	211
F. TABARY, P. NELSON, G. LAVERGNAT, M. LANDAU, G. GEDEON and E. VALENTINI (France)	<i>Study of the Nervous Command During Walking</i>	213
W. WOLF, G. HAUSKE and U. LUPP (F.R.G.)	<i>Adaptive Filters and Eye Movements in Perception</i>	214

SECTION 6—SOCIAL SYSTEMS

K. BALKUS and W. T. OLSEN (U.S.A.)	<i>Achievement as an Analysis Unit for Studying Socio-cultural Systems</i>	219
B. H. BANATHY (U.S.A.)	<i>A System Model of Energy-Focused Environmental Education</i>	221
T. BAUMGARTNER (Belgium)	<i>A Systems Model for the Analysis of Industrial Democracy Reforms</i>	222
H. A. BECKER (The Netherlands)	<i>Computer-Simulation of Social Systems: A Survey</i>	224
J. R. BENIGER (U.S.A.)	<i>Control Theory and Social Change: Toward a Synthesis of the System and Action Approaches</i>	225
T. BISH and J. RHEINFRANK (U.S.A.)	<i>The Technological Environment and Organisation Boundary Conditions: A Theoretical Discussion of Opening and Closing Phenomena with Design Implications</i>	227
D. M. M. BOOKER (U.S.A.)	<i>Are Societies Turing Machines? Some Implications of the Cyclical Majority Problem, An N.P. Complete Problem for Cybernetic Models of Social Systems</i>	228
M. BOOT (The Netherlands)	<i>Redundancy in Natural Language Processing</i>	230
G. R. BOYNTON (U.S.A.)	<i>Political Attention and Government Stimulation of the Economy</i>	231
T. R. BURNS (Norway)	<i>Actors, Games and Systems: The Dialectics of Social Action and System Structuring</i>	232
D. T. BURTON (U.S.A.)	<i>Methodology and Epistemology for Second Order Cybernetics</i>	233
A. CORNELIS (The Netherlands)	<i>A Semiotic Model of Society as a Learning Process</i>	234
C. R. DECHERT (U.S.A.)	<i>Central Decision-Making in Pluralistic Systems</i>	237
W. DIJKSTRA and J. VAN DER ZOUWEN (The Netherlands)	<i>Toward a Theory of Artifacts in the Survey-Interview</i>	238
G. DIJKHUIS (The Netherlands)	<i>A Formalization of the Cognitive Dissonance Theory</i>	239
W. DREGER (Germany)	<i>Simulation and Its Application to the Behaviour of Social Systems</i>	240
J. L. ELOHIM (Mexico)	<i>The Verification of the Systems Theory by Philosophy</i>	242
R. F. ERLANDSON (U.S.A.)	<i>The Participant-Observer Reviewed</i>	243
M. L. ESTEP (U.S.A.)	<i>A Siggs Information Theoretic Characterization of Qualitative Knowing: Cybernetic and Siggs Theory Models</i>	245
A. L. GOUDSMIT (The Netherlands)	<i>A Systems-Formalism for Human Attributions</i>	246
R. HARMSSEN and L. PEPPARD (New Guinea)	<i>Boom-Town Bust-Town: A Systems Model for Societal Exploitation</i>	247
R. L. HENSHEL (Canada)	<i>Disciplinary Prestige and the Accuracy of Social Predictions as a Deviation-Amplifying Feedback</i>	248
P. VAN DER HUIDEN (The Netherlands)	<i>The Method of Interactive Simulation</i>	249
S. C. IVERSON (Eire)	<i>Nutrition Planning for Aid to the Poor: An Application of the Policy Delphi Methodology</i>	251
S. T. JUTILA (U.S.A.)	<i>Social Gaming and Control by Dislocations</i>	252
A. KATSENELINBOIGEN (U.S.A.)	<i>Labile and Invariable Valuations</i>	253
A. G. KEFALAS and A. W. SMITH (U.S.A.)	<i>The State Goals Groups and the Private Enterprise: A Conceptual Framework</i>	255
W. J. M. KICKERT (The Netherlands)	<i>A Structural Model of Organizational Decision-Making</i>	256
H. KOPPELAAR (The Netherlands)	<i>A Model of Oligarchization</i>	258
J. VAN KUILENBURG, M. C. V.D. LINDT and H. F. L. OTTENS (The Netherlands)	<i>The System-Dynamics Approach for Urban Models in the Western European Context</i>	261
D. McL. LAMBERTON (Australia)	<i>Information-Intensive Social Systems: Some Research Developments and Policy Implications</i>	262
L. LANGMAN (U.S.A.)	<i>Social Structure, Personality and Affect: A Systems Approach</i>	263
G. E. LASKER (Canada)	<i>Cybernetic Model of Man</i>	265
N. LUHMANN (F.R.G.)	<i>Temporalization of Complexity</i>	267
S. MAKRIDAKIS and C. FAUCHEAUX (France)	<i>Morphogenesis and Management: Some Implications</i>	268
B. MALDÉ (U.K.)	<i>The Public Use of Computers—The Way Ahead</i>	269
D. MALIĆ (Yugoslavia)	<i>Social Systems, "Social Order" and "Entropy Reserves" in Society</i>	270
A. J. MATEJKO (Canada)	<i>The Structural Criteria of Social System Maturity</i>	271
M. MAZUR (Poland)	<i>Cybernetic Theorems of Feedback in Social Processes</i>	273
R. MERTENS (Belgium)	<i>From Ecology to an Extension of Systems-Analysis</i>	276

		Page
J. G. MILLER and B. J. JONES (U.S.A.)	<i>Alteration of Information in Channels: A Cross-Level Analysis</i>	277
S. MIYAMOTO, H. IHARA, K. HARUNA and S. KARIYA (Japan)	<i>Steps—A Planning and Designing Support System for Urban Transit Systems</i>	278
C. A. MUSÈS (U.S.A.)	<i>Psycho-Cultural Cybernetics: The Psycho-Dynamic Cybernetics of Acculturation</i>	279
G. P. NOORDZIJ (The Netherlands)	<i>System and Policy</i>	281
M. NOWAKOWSKA (Poland)	<i>A Model of Voice Allocation During Discussion</i>	282
M. NOWAKOWSKA (Poland)	<i>Foundations of a Formal Theory of Social Change</i>	283
M. POLIAKINE (Israel)	<i>Elements of Discontinuity Within Long-Term Architectural Projects</i>	284
D. PONIŽ (Yugoslavia)	<i>Automatic System of Classification of the Data from Social Subsystems and Its Compatible Use</i>	285
J. M. SCANDURA (U.S.A.)	<i>Human Problem-Solving: A Systems Cybernetic View from the Top</i>	286
I. SILVERMAN (U.S.A.)	<i>The Social Order and Prophetic Practice</i>	289
I. SOTEROPOULOU (France)	<i>The Entropy Law and the Subject-Object Problematic</i>	290
D. STEG and R. SCHULMAN (U.S.A.)	<i>Universally Shared Attributes of Human Behavior</i>	292
J. W. SUTHERLAND (U.S.A.)	<i>Bounding the Relevance of System Dynamics: A Contextual Analysis</i>	293
J. K. DE VREE (The Netherlands)	<i>The Conditions for Social and Political Equilibria</i>	294
I. WALLIMAN (U.S.A.)	<i>The Dialectical Method and Its Compatibility with Modern Systems Theory</i>	296
M. A. P. WILLMER (U.K.)	<i>An Information-Theoretic Approach to the Organization of Police Forces</i>	298
M. ZWICK (U.S.A.)	<i>Dialectics and Catastrophe</i>	299

SECTION 7—SYSTEMS AND MODELS INCLUDING ENVIRONMENTAL PROBLEMS

P. A. WEISS (U.S.A.)	<i>Introductory Paper to Section—Analytical Research has Proved the Systems Character of all Nature</i>	303
A. J. BAHM (U.S.A.)	<i>Cybernetics as a Systems Philosophy</i>	305
M. J. BALAS (U.S.A.)	<i>Feedback Control of Linear Diffusion Processes</i>	306
T. BLICKLE (Hungary)	<i>Technical Chemical Systems as Conservation Systems</i>	307
C. BOGDANSKI (France)	<i>Introduction to a General Theory of Spontaneous Self-Regulating Entities</i>	309
M. R. BRETT-CROWTHER (U.K.)	<i>The Cybernetics of Environmental Decision-Making</i>	310
T. R. BURNS (Sweden)	<i>Self-Altering Systems</i>	311
R. M. CAPOCELLI and L. M. RICCIARDI (Italy)	<i>A Cybernetic Approach to Population Dynamics Modeling</i>	313
C. CARLSSON (Finland)	<i>A System of Problems and How to Deal With It</i>	314
M. CHATTERJI (U.S.A.)	<i>A Socio-Econometric Model of Health Care Systems in U.S.A.</i>	316
J. L. ELOHIM (Mexico)	<i>Vers Une Theorie Vraiment Scientifique des Systemes</i>	317
J. L. ELOHIM (Mexico)	<i>Technology is a Reflection of Natural Systems</i>	319
F. FELDBRUGGE (The Netherlands)	<i>Systems Science: Chaos or Harmony</i>	320
J. P. IGNIZIO (U.S.A.)	<i>Goal Programming: The Methodology and Its Application to the Pennsylvania Coal Model</i>	321
J. JARON (Poland)	<i>A Categorical Approach to the Equilibrium and Stability Problems in General System Theory</i>	322
P. JEDRZEJOWICZ (Poland)	<i>Reliability of an Organisation</i>	323
T. JELENIEWSKI (Poland)	<i>Some Theoretical Problems of the Layout and Connection Tasks in the Design of Technical Systems</i>	326
M. KOKAR (Poland)	<i>A System Approach to a Search of Laws of Empirical Theories</i>	328
B. LAKATOS (Hungary)	<i>Balance Equations of Technical Chemical Systems</i>	330
C. G. D. MAARSCHALK (The Netherlands)	<i>How General can the Systems Theory be for the Reduction in Social and Natural Sciences</i>	332
C. G. D. MAARSCHALK (The Netherlands)	<i>A Systems Model of Human Behaviour</i>	332
A. J. MAYNE (U.K.)	<i>A Cybernetic Approach to Systems Modelling</i>	333
K. MORI, A. TSUBOI and H. IHARA (Japan)	<i>Decentralized Man-Man Computer-Aided Communication System for Train Regulation</i>	334
E. NAGY (Hungary)	<i>Studies on Conservation Systems</i>	335
J. BARRINGTON NEVITT (Canada)	<i>Ecological Rationality Beyond Cybernetics</i>	337
H. T. PRANEVITCHIUS (U.S.S.R.)	<i>Numerical-Analytical Simulation of Markov Systems</i>	338
T. L. REGULINSKI (U.S.A.)	<i>Markovian Formulation of Computer Network Performance</i>	340

J. R. SAMPSON and M. DUBREUIL (Canada)	<i>A Computer Simulation System for Modeling Spatial Dynamics in Community Ecology</i>	Page 341
J. P. SCHELLHORN (Switzerland)	<i>Some Simple Multi-Level Models</i>	343
H. EL SHISHINY and J. C. ONILLON (France)	<i>Modelling and Control of a Population of Greenhouse Aleurodes</i>	344
C. L. SIMIONESCU (Romania)	<i>Notes on a Mathematical Model in Plasma Physics</i>	346
J. SZÉPVÖLGYI (Hungary)	<i>Studies of an Operational Unit System Family</i>	348
A. M. TJOA and R. R. WAGNER (Austria)	<i>A Mathematical Systems-Theory of Database Systems</i>	349
P. M. TRUSSELL (U.S.A.)	<i>Cycles and Systems with Living Parts</i>	350
N. S. TZANNES and T. AVGERIS (Greece)	<i>A New Approach to the Estimation of Continuous Spectra</i>	351
Cl. VALLET, H. LE GUYADER, Th. MOULIN, A. BOUHOUE and L. LAFRENIERE (France)	<i>Integration of their Environment</i>	352
Y. J. VANBEVEREN (Belgium)	<i>On Distributed Computing for Large Systems Identification</i>	354
H. E. WILLIAMS (U.K.)	<i>Selecting Techniques for Environmental Evaluation: A Systems Approach</i>	357

SECTION 8—FUZZY SYSTEMS

J. M. ADAMO and M. KARSKY (France)	<i>Application of Fuzzy Logic to the Design of a Behavioural Model in an Industrial Environment</i>	361
S. GOTTWALD (D.D.R.)	<i>Universes of Fuzzy Sets, Closed Under Fuzzification</i>	365
J. KACPRZYK (Poland)	<i>Branch-and-Bound Algorithms for Decision-Making in a Fuzzy Environment</i>	367
J. KACPRZYK (Poland)	<i>Fuzzy Termination Time in Decision-Making in a Fuzzy Environment</i>	368
W. J. M. KICKERT (The Netherlands)	<i>Towards an Analysis of Linguistic Modelling</i>	369
M. MIZUMOTO and K. TANAKA (Japan)	<i>Some Properties of Fuzzy Sets under Various Operations</i>	371
C. V. NEGOIȚA (Romania)	<i>On Fuzzy Systems</i>	372
M. NOWAKOWSKA (Poland)	<i>Fuzzy Reasoning and Dialogues</i>	374
S. A. ORLOVSKY (U.S.S.R.)	<i>Decision-Making with a Fuzzy Preference Relation in a Fuzzy Set of Alternatives</i>	375
D. S. RALESCU (U.S.A.)	<i>Ordering, Preferences and Fuzzy Optimization</i>	377
D. I. SHAPIRO and J. I. TORGOV (U.S.S.R.)	<i>Fuzzy Integral Games</i>	379
G. SOMMER (F.R.G.)	<i>On Fuzzy Information Retrieval</i>	380
A. TAŞNADI (Romania)	<i>Fuzzy Systems and Learning Models</i>	382
R. M. TONG (U.K.)	<i>An Analysis of Fuzzy Models and a Discussion of Their Limitations</i>	384
F. WENSTØP (Norway)	<i>Verbal Formulation of Fuzzy Dynamic Systems</i>	386
S. T. WIERZCHOŃ and J. ZALEWSKI (Poland)	<i>On Some Equivalence Between Control Theory and Decision-Making Theory</i>	388
R. R. YAGER (U.S.A.)	<i>On the Need for Membership Grades in Fuzzy Sets</i>	389
M. ZELENY (U.S.A.)	<i>Membership Functions and Their Assessment</i>	391

OPEN FORUM—"SCIENCE AND SOCIETY"

Chairman: Professor H. G. B. CASIMIR, President Royal Dutch Academy of Sciences

U. S. VON EULER (Sweden)	<i>Science in Relation to Society</i>	395
J. KATES (Canada)	<i>Science and Technology: Routes to Global Interdependence</i>	396
F. E. WICKMAN (Sweden)	<i>How to Get Society to Appreciate the Economic Value of Science and Mathematics</i>	397
B. D. JOSEPHSON (U.K.)	<i>Introduction to Discussion</i>	397

SPECIAL PRE-CONGRESS MEETING—"BENEFITS OF CONCEPTUAL UNIFICATION"

M. R. MANTZ (The Netherlands)	<i>Why Conceptual Unification?</i>	401
