

CONTENTS

I. FUNCTION OF BRUSH BORDER MEMBRANE

Hydrolysis of Neuropeptides by Pig Kidney Microvillar Peptidases: The Key Role of Endopeptidase-24.11	
S.L. Stephenson, A.J. Kenny	3
Identification of Components of Na^+ -D-Glucose Cotransport Proteins in Brush-Border Membranes from Renal Cortex	
H. Koepsell, M. Neeb, K. Korn, U. Kunz, E. Zoubek	13
Renal Transport and Metabolism of Carnosine in the Rat	
S. Silbernagl, K. Völker	21
Modulation of Renal Apical Membrane Fluidity and Na^+ -Dependent D-Glucose Transport by Fatty Acids in vitro	
S. Wagner, H. Ebel	27
Renal Metabolism of C-Peptide in Man	
G. Deferrari, I. Zavaroni, G. Garibotto, C. Robaudo, R. Lugari, A. Tizianello	33

II. TRANSPORT ATPASES AND METABOLITE TRANSPORTING SYSTEMS

Biochemical Properties of the Proton Translocating ATPase in Rat Kidney Cortex Brush Border Membranes: Effect of Inhibitors, pH Profile and Molecular Weight	
E. Kinne-Saffran, R. Kinne, E.L. Sattler, G. Döll	43
Aldosterone-Independent Effects of Dietary Potassium on N-Ethylmaleimide-Sensitive ATPase in Distal Nephron Segments of Adrenalectomized Rabbits	
L.C. Garg, N. Narang	51
Electrogenic H^+ -ATPase and Anion Conductance in Pig Renal Cortical Endocytotic Vesicles	
G. Burckhardt, B. Moewes, I. Sabolić	57
Interaction between Triiodothyronine and Aldosterone in Control of Kidney Na^+ -K-ATPase	
C. Barlet, A. Doucet	63
Structural Basis for Regulation of Active NaCl Transport in Thick Ascending Limb of Henle's Loop	
P.L. Jørgensen, D.A. Klaerke	71

Evidence for a Reabsorptive K ⁺ Pump in Kidneys of Potassium-Depleted Rats A.I. Katz, M. Hayashi	77
Affinity Labels as Substrates for the Anion Transport Systems at the Con- traluminal Cell Side of the Renal Proximal Tubule K.J. Ullrich, G. Rumrich, H. Fasold, L. Zaki	85
A Rapid Method for the Reconstitution of Neutral Amino Acid Transport Systems from Ox Kidney Brush Border Membranes J.D. McGivan, A. Lynch	91
Kinetics of Inhibition of Transmembrane Glucose Transport and of Insulin Binding by a Peptide Isolated from Uremic Plasma S. Milutinović, I. Samaržija, D. Breyer, V. Molnar, V. Spustova, R. Džurik	97
Mediated Transport of Long Chain Fatty Acids by Rat Renal Basolateral Membranes and Evidence for its Regulation M.E. Trimble	103
Maintenance of Differentiated Function of Thick Ascending Loop of Henle (TALH) Cells Following Transfection with "Early Region DNA" of SV 40 Virus D.M. Scott, R. Kinne, C. MacDonald, H. Brzeski	109
NMR Studies on a Renal Epithelial Cell Line: LLC-PK ₁ /Cl 4 A.W.H. Jans, E. Kellenbach, J. Luig, P. Raniewski, B. Griewel, R. Kinne ..	115
Respiration of Nephron Segments of the Dog: Effect of Ouabain and DCCD P. Vinay, C. Manillier, A. Tejedor, J. Noël, Y. Boulanger, A. Gougoux	121

III. CELL MEMBRANE POTENTIAL AND TRANSPORT PROCESSES

Electrophysiology of Cell Volume Regulation F. Lang, M. Paulmichl, H. Voelkl, E. Gstrein, F. Friedrich	133
Effects of A 23187, Verapamil, and Quinidine on Electrical Properties of Madin-Darby-Canine-Kidney and Mouse Straight Proximal Tubule Cells M. Defregger, H. Voelkl, M. Paulmichl, F. Lang	141
Effect of Bradykinin and Epinephrine on Electrical Properties of Madin- Darby-Canine-Kidney Cells M. Paulmichl, M. Defregger, F. Friedrich, F. Lang	149
Intracellular Na ⁺ and K ⁺ Activities in Sodium Maleate Treated Frog Kidney Proximal Tubular Cells D.A. Čemerikič, D.M. Filipović	157

Peritubular Membrane Potential in Sodium Maleate-Treated Frog Kidney Proximal Tubular Cells	
D.M. Filipović, D.A. Čemerikić	163
Prostaglandin Action on Renal Proximal Tubule as Revealed by Electrical Studies of Na ⁺ -Glucose Cotransport	
I. Samaržija	171

IV. ACID BASE REGULATION

Failure of the Kidney to Oxidize Fatty Acids during Diabetic Ketoacidosis	
C. Lemieux, J. Berkofsky, G. Lemieux	179
A Role for Alanine Biosynthesis by the Kidney	
G. Lemieux, J. Berkofsky, C. Lemieux, A. Quenneville, M. Marsolais	185
Effect of Glucocorticoids and Metabolic Acidosis on the Level of Rat Renal Phosphoenolpyruvate Carboxykinase mRNA	
M. Gallo, R.A. Shapiro, N.P. Curthoys	191
Studies on the Role of γ -Glutamyltransferase in Glutamine Metabolism in Rat Proximal Tubules	
P.D. Dass, E. Bourke	199
Hippurate Synthesis in Rat Kidney Cortex Slices	
V. Spustová, M. Geryková, R. Dzúrik	207
Proliferation of the Endoplasmic Reticulum of the Proximal Nephron Cells during Chronic Metabolic Acidosis and after Treatment with Triamcinolone	
F. Berthelet, M. Beaudry-Lonergan, M. Bergeron	213
Liver and pH Homeostasis: Regulatory Mechanisms	
D. Häussinger	221
Role of Acid Base in the Regulation of Urea Synthesis	
M.L. Halperin, S. Cheema-Dhadli, R.L. Jungas	231
Importance of the Glutamate Dehydrogenase Pathway in Aldosterone Stimulated Ammoniogenesis	
R. Snart, D.R. Coates	237
Organ Specificity of Glutamine Hydrolysis and Oxidation	
Z. Kovačević, O. Brkljač	245
The Stimulation of the Respiration of Glutamine by Rat Renal Mitochondria in Chronic Metabolic Acidosis	
D.J. O'Donovan, R.B. Tobin, M.A. Horrum	251

How Hydrogen Ion Homeostasis Regulates Proximal Tubular Reabsorption in the Dog Kidney	
J. Østensen, H. Langberg, F. Kiil	257
Role of Renal Oxygen Consumption Rate in the Adaptive Ammoniogenesis of Acidosis	
H.G. Preuss, J. Areas, P. Schubert, M. Lenhart, D. Slemmer	263
Renal Adaptation to Lactic Acidosis in the Dog	
E. Junco, R. Pérez, R. Jofre, M. Rengel, S. Alonso, F. Valderrábano	269

V. ACTION OF DRUGS AND METABOLISM

Valproate does not Stimulate Renal Ammoniogenesis in the Dog in vivo	
M. Rengel, J.M. Lopez-Novoa, A. Gougoux, P. Vinay	277
Metabolic Effects of Valproate on Dog Thick Ascending Limbs	
A. Gougoux, P. Vinay	281
Acceleration of Ammoniogenesis in Isolated Rat Kidney Tubules by the Anti-epileptic Drug: Valproic Acid	
G. Martin, D. Durozard, G. Bavre!	287
Substrate-Dependent Effect of Gentamicin on Glucose Formation in Isolated Rabbit Kidney-Cortex Tubules	
M. Michalik, J. Bryła	293
Urinary Enzymes in Premature Infants: Relation to Gentamicin Therapy	
V. Marinković, M. Stanulović, S. Jovanović	299
Characterization of a Soluble 5'-Nucleotidase of Rat Kidney	
M. Le Hir, U.C. Dubach	305
Differences in Adenylate Metabolism in Renal Cortex and Medulla	
S. Angielski, T. Pawelczyk, D. Bizon, G. Piec, L. Wojnowski, J. Stepieński	311

VI. PATHOBIOCHEMICAL MODELS

Studies on the Role of Glycerophosphorylcholine and Sorbitol in Renal Osmoregulation	
G. Wirthensohn, S. Lefrank, W.G. Guder, F.X. Beck	321
Lipid Peroxidation, an Initial Event in Acute Renal Failure (ARF)	
W. Joannidis, W. Pfaller	329

Specific Fructose-1,6-Bisphosphatase Activities in Microdissected Proximal Tubules of Human Kidneys in Function and Dysfunction	
H. Schmid, A. Mall, H. Bockhorn	339
Intranephron Distribution and Properties of Xanthine Oxidase, Superoxide Dismutase and Guanase Activities in Control and Nephrotic Rats	
H. Endou, H. Yamada, T. Takahashi, K. Tamura, S. Ito	347
Contrasting Effects of Amino Acid Mixtures on Hypoxic Dysfunction in the Rat Kidney	
M. Mályusz, G. Gronow	353
11 β -Hydroxysteroid Dehydrogenase(11-HSD) - its Function in Renal Corticosteroid Metabolism	
W. Schulz, N. Kobayashi, H. Siebe, K. Hierholzer, I. Lichtenstein	361
Tamm-Horsfall Protein and Antibodies to Tamm-Horsfall Protein in the Study of Renal Diseases	
M. Radonić, D. Čvorišćec, A. Stavljenić, J. Sertić, G. Boršo	369
VII. RENAL KALLIKREIN-KININ-SYSTEM, DEVELOPMENTAL ASPECTS OF RENAL METABOLISM	
Studies on the Renal Kallikrein-Kinin-System	
W.G. Guder, J. Hallbach, G. Wirthensohn, R. Linke, E. Fink, W. Müller-Esterl	377
Relation between the Renal Angiotensin I Converting Enzyme (CE) and the Inactivation of Kinins by the Kidney	
J. Marchetti, F. Praddaude, S. Roseau, F. Morel	385
Hormonal Regulation of Postnatal Development of Renal Tubular Transport Processes	
H. Bräunlich	391
Regulation of Uric Acid Synthesis in Embryonic Liver and Kidney	
J. Wittmann, A. Mengi, S. Krauß	397
Role of Adrenal Steroids in the Maturation of Fetal Rat Kidney Na-K-ATPase	
D. Dobrovič-Jenik, S. Milković	403
LIST OF PARTICIPANTS	411
AUTHOR INDEX	415
SUBJECT INDEX	417
