1. <i>Introduction</i> . By A. Weber	1
References	4
2. <i>High-Resolution Rotation-Vibrational Raman Spectroscopy</i> By S. Brodersen (With 19 Figures)	7
2.1 Theory	8
2.1.1 Intensity Expressions	8
2.1.2 Selection Rules	11
2.1.3 The Vibrational Matrix Element	13
2.1.4 Linear Molecules	14
2.1.5 Symmetric Top Molecules	17
2.1.6 Asymmetric Top Molecules	24
2.1.7 Spherical Top Molecules	27
2.1.8 Comparison with the Theory of Infrared Spectra	30
2.2 Experimental Technique	30
2.2.1 General Features of Instrumentation and Technique	31
2.2.2 Details of Present Instruments	34
2.2.3 Comparison to Infrared Experimental Techniques	39
2.3 Results	39
2.3.1 General Remarks	39
2.3.2 Linear Molecules	40
2.3.3 C_{3v} Molecules	47
2.3.4 Other Symmetric Top Molecules	54
2.3.5 Asymmetric Top Molecules	56
2.3.6 Spherical Top Molecules	62
2.3.7 Conclusion	66
References	67
3. <i>High-Resolution Rotational Raman Spectra of Gases</i> By A. Weber (With 19 Figures)	71
3.1 Instrumentation and Techniques	72

3.1.1	The Raman Source Unit	72
a)	The Laser System	72
b)	The Scattering Cell	73
c)	The Illuminating Optics	76
d)	The Transfer Optics	77
3.1.2	Filters	77
3.1.3	The Spectrograph	78
3.1.4	Recording Materials	80
3.1.5	Wavelength Standards	82
3.1.6	Determination of Raman Shifts	82
3.1.7	Photoelectric Spectrometers	84
3.1.8	Interferometric Techniques	84
3.2	Observed Rotational Spectra	85
3.2.1	Diatomic Molecules	85
3.2.2	Linear Polyatomic Molecules	92
3.2.3	Symmetric Top Molecules	96
3.2.4	Asymmetric Top Molecules	106
3.2.5	"Forbidden" Pure Rotational Spectra	114
a)	Spherical Top Molecules — T_d Symmetry	114
b)	Symmetric Top Molecules — C_{3v} Symmetry	115
3.3	Summary	115
	References	117
4.	<i>Raman Scattering Cross Sections in Gases and Liquids</i>	
	By H.W. Schrötter and H.W. Klöckner (With 14 Figures)	123
4.1	Raman Scattering Cross Sections in Gases	124
4.1.1	Theoretical Considerations	124
4.1.2	Determination of the Absolute Scattering Cross Section of Nitrogen	127
4.1.3	Measurement of Relative Scattering Cross Sections	130
a)	Experimental Procedure	132
b)	Results	135
c)	Influence of the Resonance Raman Effect	154
4.2	Raman Scattering Cross Sections in Liquids	156
4.2.1	Internal Field Effect and Intermolecular Interactions	156
4.2.2	Absolute Scattering Cross Sections	157
4.2.3	Relative Scattering Coefficients	159
4.3	Ratio of the Raman Scattering Cross Section in the Liquid and in the Gaseous State	160
4.4	Conclusion	163
	References	164

5. <i>Intermolecular Forces Revealed by Raman Scattering</i>	
By R.P. Srivastava and H.R. Zaidi (With 4 Figures)	167
5.1 Introductory Remarks	167
5.2 Spectral Function for Raman Scattering	169
5.3 Impact Theory	174
5.4 Isolated Lines	177
5.4.1 Calculation of Line Widths and Shifts	177
a) Non-Perturbative Approaches	178
b) Perturbative Approaches	179
c) Line Shift	184
5.4.2 Comparison of Theory with Experiment and Information Obtained about Intermolecular Potentials	185
5.5 Overlapping Lines and Band Shapes	189
5.6 Statistical Theories	192
5.7 Liquids	193
5.8 Conclusion	197
References	197
6. <i>The Resonance Raman Effect</i>	
By D.L. Rousseau, J.M. Friedman, and P.F. Williams (With 26 Figures)	203
6.1 Resonance Raman Scattering	204
6.2 Diatomic Molecules	210
6.2.1 Discrete Resonance Raman Scattering	212
6.2.2 Continuum Resonance Raman Scattering	218
6.2.3 Perturbed Diatomic Molecules	224
6.3 Polyatomic Molecules	230
6.4 Porphyrin Compounds	233
6.4.1 Porphyrin Absorption Spectrum	234
6.4.2 Helpful Diagrams	237
6.4.3 Scattering from Q_0 , Q_1 , and B	239
6.4.4 Anomalous Polarization	242
6.4.5 Interference Effects	244
6.4.6 Non-Adiabatic Effects	245
6.4.7 Influence of Jahn-Teller Distortion	249
6.5 Concluding Remarks	249
References	250
7. <i>Coherent Anti-Stokes Raman Spectroscopy</i>	
By J.W. Nibler and G.V. Knighten (With 21 Figures)	253
7.1 Theory	255
7.1.1 Maxwell's Equations for Macroscopic Samples	255

7.1.2	Symmetry Properties of $\chi^{(3)}$	258
7.1.3	CARS Amplitudes	260
7.1.4	Raman Amplitudes	263
7.1.5	Microscopic Third-Order Susceptibilities	265
7.2	Comparison of CARS and Raman Spectroscopy	268
7.2.1	Signal Strengths	268
7.2.2	Lineshapes and Maxima	269
7.2.3	Selection Rules	272
7.2.4	Orientation Averaging and Polarization Behavior	273
7.3	Experimental Aspects of CARS	276
7.4	Survey of CARS Experimental Results	281
7.4.1	Solids	281
7.4.2	Liquids	282
7.4.3	Gases	283
	a) Combustion and Gas Diagnostics	283
	b) Plasma Diagnostics	284
	c) Photochemical, Kinetic and Excited State Studies	286
	d) High-Resolution Spectroscopy	287
7.4.4	Solutions	289
7.4.5	Background Suppression in CARS	291
7.5	Summary	294
	References	295
	<i>Additional References with Titles</i>	301
	<i>Subject Index</i>	307
