Preface — V

1 Overview and introduction to industrial inorganic processes — 1

Bibliography — 2

2 Sulfuric acid production, uses, derivatives — 3

- 2.1 Introduction — 3
- 2.2 Sulfur sourcing — 3
- 2.3 Sulfuric acid, methods of production — 4
- 2.4 Sulfuric acid, annual volume of production — 5
- 2.5 Sulfuric acid uses — 5
- 2.6 Derivatives — 6
 - 2.6.1 Sulfur dioxide — 6
 - 2.6.2 Sulfur trioxide — 6
 - 2.6.3 Hydrogen sulfide gas — 6
 - 2.6.4 Sodium sulfide — 7
 - 2.6.5 Carbon disulfide — 7
 - 2.6.6 Sulfur chlorides — 8
 - 2.6.7 Thionyl chloride — 8
 - 2.6.8 Sulfuryl chloride — 9
 - 2.6.9 Chlorosulfonic acid (or, chlorosulfuric acid) — 9
 - 2.6.10 Sodium thiosulfate — 10
 - 2.6.11 Ammonium thiosulfate — 10
 - 2.6.12 Sodium dithionite — 11
 - 2.6.13 Sodium hydroxymethylsulfinate — 11
 - 2.6.14 Sodium hydrosulfide — 12
- 2.7 Recycling — 12
- Bibliography — 12

3 Industrial gases, isolation, and uses — 15

- 3.1 Introduction — 15
- 3.2 Uses — 15
 - 3.2.1 Oxygen — 15
 - 3.2.2 Nitrogen — 16
 - 3.2.3 Argon — 17
 - 3.2.4 Carbon dioxide — 17
 - 3.2.5 Hydrogen — 18
 - 3.2.6 Helium — 19
 - 3.2.7 Neon — 20
 - 3.2.8 Krypton — 20

3.2.9	Xenon —	20
3.3	Recycling —	21
	Bibliography —	21
4	Nitrogen-based inorganic compounds —	23
4.1	Introduction —	23
4.2	Ammonia —	23
4.3	Ammonium nitrate —	24
4.4	Nitric acid —	25
4.5	Urea —	26
4.6	Ammonium sulfate —	27
4.7	Hydrazine —	28
4.8	Nitrogen pollution —	28
4.9	Recycling —	29
	Bibliography —	29
5	Fertilizers —	31
5.1	Introduction —	31
5.2	Nitrogen based —	32
5.3	Phosphorus based —	32
5.4	Potassium-containing —	33
5.5	Mixed fertilizers and the NPK rating system —	34
5.6	Recycling and re-use —	35
	Bibliography —	35
6	Calcium and limestone-based products —	37
6.1	Introduction —	37
6.2	Lime —	38
6.2.1	Lime production —	38
6.2.2	Lime uses —	39
6.3	Sodium carbonate (or: soda ash) —	39
6.4	Calcium chloride —	41
6.5	Limestone-based construction materials —	41
6.6	Recycling —	42
	Bibliography —	42
7	Sodium chloride —	43
7.1	Introduction —	43
7.2	Sodium chloride recovery and production —	43
7.2.1	Production and recovery methods —	43
7.2.2	Direct uses for salt —	44
7.3	Major chemicals produced from salt —	45

- 7.3.1 Sodium hydroxide — 45
- 7.3.2 Sodium metal and chlorine — 47
- 7.3.3 Hydrochloric acid — 47
- 7.3.4 Titanium dioxide — 50
- 7.3.5 Sodium chlorate — 50
- 7.3.6 Sodium silicate — 51
- 7.4 Recycling and re-use — 52
- Bibliography — 52

8 Fluorine, fluoride, and fluorine-based materials — 53

- 8.1 Introduction — 53
- 8.2 Calcium fluoride production — 54
- 8.3 Fluorine isolation — 55
- 8.4 Metspar and acidspar — 56
- 8.5 Hydrofluoric acid — 56
- 8.6 Teflon — 57
- 8.7 Perfluorooctanoic acid — 58
- 8.8 Fluorine-containing fibers — 59
- 8.9 Teflon and fluorine-containing fiber uses — 59
- 8.10 Recycling and re-use — 60
- Bibliography — 60

9 Borderline inorganics-organics — 61

- 9.1 Introduction — 61
- 9.2 Carbon black (or: channel black, colloidal black, furnace black, and thermal black) — 61
 - 9.2.1 Carbon black production — 61
 - 9.2.2 Carbon black uses — 62
 - 9.2.3 Carbon black, recycling, and re-use — 62
- 9.3 Sodium tri-poly-phosphate — 63
 - 9.3.1 STPP production — 63
 - 9.3.2 STPP uses — 64
 - 9.3.3 STPP recycling and re-use — 65
- 9.4 Borax and borates — 65
 - 9.4.1 Borax production — 65
 - 9.4.2 Borax uses — 66
 - 9.4.3 Borax re-use and recycling — 66
- 9.5 Asphalt — 66
 - 9.5.1 Asphalt source materials, formulas, and production — 67
 - 9.5.2 Asphalt uses — 67
 - 9.5.3 Asphalt re-use and recycling — 67
- Bibliography — 68

10 Water — 69

- 10.1 Introduction and sources — **69**
- 10.2 Purification — **69**
 - 10.2.1 Desalination — **69**
 - 10.2.2 Sewage treatment — **73**
 - 10.2.3 Water conservation — **74**
- 10.3 High purity, uses — **74**
- 10.4 Uses, residential — **75**
- 10.5 Uses, industrial — **75**
- 10.6 Recycling — **75**
Bibliography — **76**

11 Iron and steel — 77

- 11.1 Introduction — **77**
- 11.2 Ore sources — **77**
- 11.3 Current iron production — **78**
- 11.4 Steel production — **81**
- 11.5 Uses of iron and steel — **81**
- 11.6 By-product production — **83**
- 11.7 Recycling — **84**
Bibliography — **85**

12 Aluminum — 87

- 12.1 Introduction and history — **87**
- 12.2 Bauxite sources — **87**
- 12.3 Aluminum production methods — **88**
 - 12.3.1 Alumina production — **88**
 - 12.3.2 Aluminum refining — **89**
- 12.4 Major industrial uses — **90**
- 12.5 Lightweight alloys — **91**
- 12.6 By-products — **92**
- 12.7 Recycling — **92**
Bibliography — **92**

13 Copper — 95

- 13.1 Introduction — **95**
- 13.2 Ore sources — **96**
- 13.3 Production methods — **97**
- 13.4 Major industrial uses — **99**
 - 13.4.1 Wiring — **99**
 - 13.4.2 Piping — **99**
 - 13.4.3 Coinage — **100**

13.5	Brass —	101
13.6	Bronze —	102
13.7	Other copper alloys —	103
13.8	By-products —	103
13.9	Recycling and re-use —	103
	Bibliography —	104
14	Other major metals for industrial use —	105
14.1	Titanium —	105
14.1.1	Sources —	105
14.1.2	Titanium dioxide production —	106
14.1.3	Uses —	107
14.1.4	Recycling —	107
14.2	Chromium —	108
14.2.1	Chromium sources —	108
14.2.2	Uses of chromium —	108
14.2.3	Recycling —	110
14.3	Mercury —	110
14.3.1	Sources of mercury —	110
14.3.2	Uses of mercury —	111
14.3.3	Recycling of mercury —	111
14.4	Gold —	112
14.4.1	Sources of gold —	112
14.4.2	Uses of gold —	115
14.4.3	Recycling —	117
14.5	Silver —	117
14.5.1	Silver production —	118
14.5.2	Silver uses —	119
14.5.3	Recycling —	120
14.6	Lead —	121
14.6.1	Lead sources —	121
14.6.2	Lead extraction chemistry —	121
14.6.3	Lead uses —	123
14.6.4	Lead recycling —	123
14.7	Tin —	123
14.7.1	Tin sources —	124
14.7.2	Tin production —	125
14.7.3	Tin uses —	125
14.7.4	Tin recycling —	126
14.8	Platinum group metals (PGM) —	126
14.8.1	PGM sources —	126
14.8.2	PGM production —	127

14.8.3	PGM uses —	128
14.8.4	PGM recycling —	130
14.9	Technetium —	130
14.9.1	Technetium sources and production —	130
14.9.2	Technetium uses —	130
14.9.3	Technetium recycling and re-use —	131
14.10	Tantalum and niobium —	131
14.10.1	Tantalum and niobium sources —	131
14.10.2	Tantalum and niobium production —	133
14.10.3	Tantalum and niobium uses —	134
14.10.4	Tantalum and niobium recycling —	135
14.11	Amalgams —	135
	Bibliography —	136
15	Rare earth elements —	139
15.1	Introduction —	139
15.2	Isolation and production —	139
15.3	Rare earth element purification —	141
15.3.1	Yttrium isolation —	144
15.3.2	Isolation of rare earth elemental metals —	145
15.4	Rare earth element uses —	145
15.4.1	Alloys —	146
15.4.2	Magnets —	146
15.4.3	Batteries —	147
15.4.4	Catalysts —	147
15.4.5	Petroleum refining —	147
15.4.6	Polishing materials —	147
15.4.7	Glasses and glass mixes —	148
15.4.8	Ceramics —	148
15.5	Recycling —	148
	Bibliography —	148
16	Uranium and thorium —	151
16.1	Introduction —	151
16.2	Sources —	151
16.3	Purification —	153
16.3.1	Uranium purification —	153
16.3.2	Thorium purification —	154
16.4	Uranium and thorium uses —	155
16.4.1	Uranium uses —	155
16.4.2	Thorium uses —	155
16.5	By-products —	156

16.6	Recycling and re-use — 157
	Bibliography — 157
17	Silicon — 159
17.1	Introduction — 159
17.2	Sources — 159
17.3	Purification — 160
17.3.1	Metallurgical grade silicon — 160
17.3.2	Semiconductor grade silicon — 161
17.3.3	Single crystal high-purity silicon — 161
17.4	Uses — 162
17.5	Silicones and organo-silicon materials — 163
17.5.1	Silicone production — 164
17.5.2	Silicone uses — 164
17.6	Silanes — 165
17.7	Semiconductors — 166
17.8	Recycling — 166
	Bibliography — 167
18	Lightweight materials — 169
18.1	Introduction — 169
18.2	Lightweight alloys — 169
18.2.1	Aluminum alloys — 169
18.2.2	Metal foams — 171
18.2.3	Titanium alloys — 171
18.2.4	Magnesium alloys — 172
18.2.5	Beryllium and beryllium alloys — 174
18.3	Aerogels — 176
18.3.1	Silica-based aerogels — 176
18.3.2	Zirconia-based aerogels — 177
18.3.3	Titania-based aerogels — 177
18.3.4	Aerogel uses — 177
18.4	Metal-organic frameworks (MOFs) — 177
18.4.1	Synthesis of MOFs — 178
18.4.2	Uses of MOFs — 178
18.5	Zeolites — 178
18.6	Fullerenes — 180
18.6.1	Fullerene synthesis — 180
18.6.2	Fullerene uses — 181
18.7	Recycling and re-use — 181
	Bibliography — 182

19 Ceramics — 183

- 19.1 Introduction — **183**
- 19.2 Production — **184**
- 19.2.1 Syntheses — **184**
- 19.2.2 Tailoring properties of ceramics — **185**
- 19.3 Applications and end uses — **186**
- 19.4 Recycling and re-use — **187**
 Bibliography — **187**

20 Hard materials — 189

- 20.1 Introduction — **189**
- 20.2 Diamond — **189**
- 20.2.1 Introduction — **189**
- 20.2.2 Diamond synthesis — **190**
- 20.3 Silicon carbide — **190**
- 20.4 Boron and carbon nitrides — **191**
- 20.5 Metal borides — **192**
- 20.6 Recycling — **192**
 Bibliography — **193**

Index — 195
