Preface — V

List of authors — IX

Chandu S. Madankar, Priscilla Agnel

1 Eco-friendly processing routes for the production of biolubricants — 1

Sergio Nogales-Delgado, Juan Félix González, José María Encinar

2 Biolubricants based on vegetable oils as a suitable replacement for petrol-based lubricants — 25

Lokesh Kumar, Anupama, Dheeraj Ahuja

3 A short review of renewable castor oil-based polyurethane (PU) — 47

Sheetal Monga, Dheeraj Ahuja, Lokesh Kumar, Anupama Kaushik

4 Polylactide-based shape-memory biodegradable polyurethanes and their potential applications — 59

J. Prabhakaran, Amit Kumar, Mohd. Mujtaba Ahmed, Harveer Singh Pali

5 Prospects of biolubricants from nonedible Indian native feedstocks — 87

Priyanka Singh, Nathi Ram Chauhan

6 Indian scenario of various advanced alternative fuels in internal combustion engines — 105

J. P. Yadav, Pratyush, Devendra Singh

7 Activated biochar and its applications in the field of agriculture and environment — 123

Ajay Kumar Sharma, Devendra Singh, Shubham Mishra

8 An experimental analysis on double-slope single-basin solar still using phase change materials — 137

Rakesh Pant, Khushi Sah, Nirmal Patrick, Amit Gupta

9 Role of biomass, agriculture waste, and municipal waste in production of bio-based lubricants — 153

VIII — Contents

Anil Dhanola

10 Feedstocks for biolubricant production: toward a sustainable future — 169

Chandra Mohan, Jenifer Robinson

11 Life cycle analysis of bio-based lubricants — 185

Rekha Goswami, Barkha Kama, Abhilasha Mishra

12 Nanotechnology for enhancement of bio-based lubricant production — 193

Index — 219
