

# Contents

<b>Part I</b>	<b>Historical Perspective</b>	
<hr/>		
Nonlinearity: Historical and Technological View By R. Landauer (With 10 Figures) . . . . .		2
<hr/>		
<b>Part II</b>	<b>Low-Dimensional Magnetism</b>	
<hr/>		
Soliton Dynamics: Experiments on Magnetic Chains By J.P. Boucher, L.P. Regnault, and H. Benner (With 1 Figure) . .		24
Soliton Dynamics in One-Dimensional Antiferromagnets By K. Sasaki and K. Maki (With 1 Figure) . . . . .		37
One-Dimensional Easy-Plane Magnets: Classical Sine-Gordon Theory or a Quantum Model? By G.M. Wysin and A.R. Bishop (With 7 Figures) . . . . .		42
Towards a Quantitative Theory of Solitons in One-Dimensional Magnets: Quantum Effects, Out-of-Plane Fluctuations and the Specific Heat. By H.J. Mikeska and H. Frahm (With 2 Figures) . .		53
Quantum Corrections to the Specific Heat of the Easy-Plane Ferromagnetic Chain By H.C. Fogedby, K. Osano, and H.J. Jensen (With 2 Figures) . .		59
Monte Carlo Calculations of Quantum Systems By H. De Raedt, A. Lagendijk, and P. de Vries (With 8 Figures) . .		69
<hr/>		
<b>Part III</b>	<b>Conducting Polymers</b>	
<hr/>		
Photogeneration of Nonlinear Excitations in Semiconducting Polymers: Fast Response Nonlinear Optical Phenomena By A.J. Heeger, D. Moses, and M. Sinclair (With 7 Figures) . . . .		82

When Kinks are not Elementary Excitations By S. Mazumdar (With 6 Figures) . . . . .	94
Phonons and Soliton Diffusion in Polyacetylene By Y. Wada (With 3 Figures) . . . . .	106
Ground State Properties of Polyacetylene with Off-Diagonal Random Disorder By Bing-Chang Xu and S.E. Trullinger (With 3 Figures) . . . . .	111

---

<b>Part IV</b>	<b>Experimental Techniques</b>
----------------	--------------------------------

---

Neutron Scattering Studies of Non-Linear Systems By R. Pynn (With 6 Figures) . . . . .	118
Novel Experimental Techniques and Realizations of Quasi- Periodicity. By P.M. Chaikin, A. Behrooz, M.J. Burns, D. Levine, D. Ou-Yang, B. Whitehead, and X. Yan (With 6 Figures) . . . . .	130
Heavy-Electron Materials By Z. Fisk, H.R. Ott, and J.L. Smith (With 6 Figures) . . . . .	142
Magnetic Resonance as a Probe of Nonlinearity in Condensed Matter Physics. By W.G. Clark (With 3 Figures) . . . . .	151
High-Resolution He Beam Scattering as a Tool for the Investigation of the Structural and Dynamical Properties of Surface Soliton Dislocations By M. El-Batanouny and K.M. Martini (With 3 Figures) . . . . .	159

---

<b>Part V</b>	<b>Theoretical Techniques</b>
---------------	-------------------------------

---

Quantum Mechanics at the Macroscopic Level. By A.J. Leggett .	168
Soluble Models. By M. Fowler . . . . .	172
Variational Schemes for Many-Electron Systems By D. Baeriswyl . . . . .	183
Quantum Monte Carlo. By D.J. Scalapino (With 10 Figures) . . .	194
Quantum Spin Chains and Conformally Invariant Non-Linear $\sigma$ - Models. By I. Affleck . . . . .	203
Collective Coordinates and Linear Modes of the Double-Sine- Gordon Kink. By C.R. Willis, M. El-Batanouny, and P. Sodano .	211

A Collective Coordinate Method for Classical Dynamics of Nonlinear Klein-Gordon Kinks By R.J. Flesch, S.E. Trullinger, and B. Horovitz (With 3 Figures)	215
Quantum Coherence and the Nonlinear Schrödinger Equation By D.W. Brown, K. Lindenberg, and B.J. West	220
Energy Transfer, Self-Trapping, and Solitons on a Nonlinear Dimer By V.M. Kenkre, G.P. Tsironis, and D.K. Campbell (With 1 Figure)	226

---

## Part VI      **Structural Phase Transitions**

---

Microscopic Probing of BaTiO <sub>3</sub> Ferroelectric Phase Transitions by EPR. By K.A. Müller (With 4 Figures)	234
Structural Transformations in DNA. By S.M. Lindsay (With 6 Figures)	246
Phonon Anomalies, Structural Transformations, and Precursor Structure in the Martensitic Alloys TiNi(Fe) and Al <sub>1-x</sub> Ni <sub>x</sub> By J.A. Krumhansl	255
Temperature Dependence of the Soft Mode for Structural Phase Transitions in Highly Anisotropic Systems By A.R. Bishop and W.C. Kerr (With 3 Figures)	260
A Model for the B-Z Transition of DNA Involving Solitary Excitations. By Z. Zang and W. Olson (With 1 Figure)	265

---

## Part VII      **Spin-Glasses and Random Field Systems**

---

Recent Experimental Results in Spin-Glass Dynamics By N. Bontemps (With 5 Figures)	272
Spin Glasses: Recent Theoretical Developments. By A.P. Young	283
The Random Field Problem - Facts and Fiction By V. Jaccarino	290
Statics and Dynamics of the Random Field Ising Model (Theory) By R. Bruinsma (With 10 Figures)	291
A Driven Random Field System: CDW Dynamics By L. Mihaly and G. Grüner (With 6 Figures)	308

---

**Part VIII      Frustrated, Incommensurate, and Nonequilibrium  
Systems**

---

Topography and Diffusion of Kinks in Incommensurate Insulators: Relationship Between Phase Conjugation and Thermal Hysteresis in Incommensurate Phases, and a Physical Analog for Circadian Biorhythms. By J.F. Scott (With 10 Figures) . . . . .	320
Model of Icosahedral Order. By M. Widom (With 6 Figures) . . .	330
Systematics of Disorder in Quasiperiodic Material By P.M. Horn, W. Malzfeldt, D.P. Divincenzo, J. Toner, and R. Gambino . . . . .	338
Friction and Forced Flow: Collective Transport in Disordered Media. By D.S. Fisher . . . . .	339
Non-Equilibrium Behavior, Hysteresis and Condensate Quakes in the Pinned Charge Density Wave By N.P. Ong and Z.Z. Wang (With 8 Figures) . . . . .	350
Vortex Dynamics in Two-Dimensional Arrays of Superconducting Weak Links By P. Martinoli, Ch. Leemann, and Ph. Lerch (With 6 Figures) .	361
Interfacial Pattern Formation: A Progress Report By H. Levine (With 5 Figures) . . . . .	374
Intrinsic Defect States in Protein Assemblages By C.J. Ritz-Gold (With 2 Figures) . . . . .	386
Is Universality Valid on Hierarchical and Fractal Lattices? By Bambi Hu (With 3 Figures) . . . . .	390

---

**Part IX      Summary**

---

Lessons from the Past and Prospects for the Future? By G. Baym . . . . .	396
<b>Index of Contributors . . . . .</b>	<b>401</b>
