

# Contents

## A. Fundamentals of Radiation Physics, Picture Formation and Radiation Protection

<b>General Principles</b> .....	3
Radiographs and Photographs .....	3
The Physical Nature of X-Rays .....	7
<b>Formation of the Radiograph</b> .....	9
The Path of Rays .....	9
The Production of X-Rays .....	9
The Radiation Relief (on Picture) as a Preliminary Stage of the X-Ray Picture .....	11
Attenuation of the Primary Ray Beam .....	12
Origin and Elimination of Scattered Radiation .....	12
Influencing the Radiation Relief through Absorption Differences .....	16
Heterogeneous Radiation and the Radiation Relief .....	17
The Conversion of the Radiation Relief into a Visible Picture .....	18
X-Ray Photographs with Intensifying Screens .....	18
Fluorescent Screen and Picture-Intensifier Television Chain .....	20
Example of a Quantitative X-Ray Procedure .....	20
<b>Central Projection in X-Ray Technique</b> .....	21
The Law of Distances .....	21
Magnification .....	22
Distortion .....	23
Free Projection through Parallax .....	24
Summary .....	25
<b>Lack of Resolution and Recognizability of Detail</b> .....	25
<b>General Principles of Radiation Protection in X-Ray Diagnostic</b> .....	27
<b>The New Radiologic Units: Gray and Becquerel</b> .....	28

## B. Radiographic View of the Normal Adult Skeleton

<b>I. The Skull</b> .....	31
<b>Radiographic Anatomy and Radiographs of the Skull, Including Exposure Techniques</b> .....	32
The Skull as a Whole .....	32
Paranasal Sinuses .....	37
Optic Canal .....	42
Foramen Ovale .....	43
Jugular Foramen .....	44
Eyeball .....	44
Nasal Bone .....	45
Nasolacrimal Canal .....	46
Base of the Skull .....	47
Zygomatic Arches .....	49
Skull, Lateral and Semiaxial .....	53
Temporal Bone according to <i>E. G. Mayer</i> .....	56
Petrous Bone according to <i>Stenvers</i> and <i>Chaussee</i> .....	58
Petrous Bone of the Infant .....	60

Contents

Mastoid Process according to *Schüller* and *Sonnenkalb* ..... 61

Jaws ..... 62

Sella Turcica ..... 64

Variants and Forms of Sella Turcica ..... 65

**Tomography of the Head** ..... 67

Tomographic Examination of the Petrous Bone ..... 67

Tomographic Examination of the Skull in Comparison to Anatomical Saw-Cut Bone Sections . 75

**Variants and Sources of Diagnostic Error of the Skull and Neck** ..... 108

**II. Vertebral Column, Thoracic Cage and Pelvis** ..... 129

**Radiographic Anatomy and Radiographs of the Cervical Spine** ..... 130

Functional Radiographs of the Atlantoaxial Articulations ..... 133

Larynx ..... 135

Functional Radiographs of the Cervical Spine ..... 137

**Variants and Sources of Diagnostic Error of the Cervical Spine** ..... 140

**Radiographic Anatomy and Radiographs of the Thoracic Spine, Ribs and Sternum** ..... 148

Thoracic Spine ..... 148

Sternum ..... 153

Ribs ..... 157

**Variants and Sources of Diagnostic Error of the Thoracic Spine, Ribs and Sternum** ..... 161

**Radiographic Anatomy and Radiographs of the Lumbar Spine, Pelvis and Hip Joint, Including Exposure Techniques** ..... 176

Lumbar Spine ..... 176

Pelvis ..... 182

Coccyx ..... 184

Sacrum ..... 186

Sacroiliac Joint ..... 188

Pubis ..... 189

Hip Joint ..... 190

**Variants and Sources of Diagnostic Error of the Lumbar Spine, Pelvis and Hip Joint** ..... 198

Variants of the Bony Surroundings of the Obturator Foramen ..... 218

**III. Upper Extremities, Including the Shoulder Girdle** ..... 221

**Radiographic Anatomy and Radiographs of the Clavicle and Shoulder Joint** ..... 223

Clavicle ..... 223

Scapula ..... 227

Shoulder Joint ..... 229

**Variants and Sources of Diagnostic Error of the Shoulder Girdle, Including the Upper Thoracic Region** ..... 232

**Radiographic Anatomy and Radiographs of the Elbow and Forearm, Including Exposure Techniques** ..... 245

Elbow Joint ..... 245

Olecranon ..... 249

Forearm ..... 250

**Variants and Sources of Diagnostic Error of the Elbow and Forearm** ..... 251

**Radiographic Anatomy and Radiographs of the Wrist, Metacarpus and Fingers, Including Exposure Techniques** ..... 258

Wrist .....	258
Carpus .....	264
Metacarpus .....	266
Fingers .....	267
<b>Variants and Sources of Diagnostic of the Wrist, Metacarpus and Fingers .....</b>	<b>270</b>
 <b>IV. Lower Extremities .....</b>	 <b>287</b>
<b>Radiographic Anatomy and Radiographs of the Knee Joint and Calf, Including Exposure Techniques .....</b>	<b>288</b>
Tibiofibular Joint .....	288
Knee Joint .....	289
Patella .....	289
Arthrography of the Knee .....	292
Serial Meniscography .....	297
<b>Variants and Sources of Diagnostic Error of the Knee Joint and Calf .....</b>	<b>298</b>
<b>Radiographic Anatomy and Radiographs of the Talocrural Articulation, Malleoli, Tarsus and Toes, Including Exposure Techniques .....</b>	<b>316</b>
Talocrural Joint .....	318
Foot, Lateral .....	324
Calcaneus .....	325
Metatarsus .....	327
Foot, Dorsoplantar .....	328
Foot, Plantodorsal .....	330
Toes .....	333
<b>Variants and Sources of Diagnostic Error of the Talocrural Joint, the Ankle, Tarsus and Toes ..</b>	<b>334</b>
 <b>V. Idiopathic Scolioses .....</b>	 <b>351</b>
 <b>C. Radiographic View of the Normal Infant and Adolescent Skeleton</b>	
<b>I. General Introduction .....</b>	<b>355</b>
Acceleration of Development .....	356
Tables: Development of Bony Nuclei and Synostosing .....	364
 <b>II. The Skull .....</b>	 <b>369</b>
Fontanels .....	370
Synchondroses .....	371
Cranial Sutures .....	371
Constant Cranial Sutures .....	372
Digital Impressions and Cerebral Juga, Diploic Veins and Vascular Canals .....	373
Paranasal Sinuses .....	374
Sella Turcica .....	375
Petrous Part (Tympanic Cavity, Tympanic Antrum and Semicircular Canals) .....	376
A Series of Radiographs of the Development of the Paranasal Sinuses and the Maxilla Denture from Infancy to Age 20 .....	381
A Series fo Radiographs of the Development of the Sella Turcica and the Sphenoidal Sinus from Infancy to Age 17 .....	387
A Series of Radiographs of the Development of Pneumatization of the Petrous Bone and Papillary Process form Infancy to Age 14 .....	389

## Contents

A Series of Radiographs of the Development of the Skull and its Sutures, Digital Impressions and Denture from Infancy to Age 16 .....	394
Development of the Teeth .....	412
Deciduous Teeth .....	412
Permanent Teeth .....	412
 III. Spine, Ribs and Sternum .....	 413
Spine .....	414
Ribs .....	417
Sternum .....	417
A Series of Radiographs of the Development of the Spinal Column from Infancy to Age 19 ....	419
A Series of Radiographs of the Development of the Sternum from Infancy to Age 25 .....	432
 IV. Shoulder Girdle and Upper Extremities .....	 437
Prenatal Development .....	438
Postnatal Development .....	438
Shoulder Girdle .....	438
A Series of Radiographs of the Development of the Shoulder Articulation Region from Infancy to Age 18 .....	443
A Series of Radiographs of the Development of the Scapula between Ages 5 to 18 .....	451
Elbow Region .....	455
A Series of Radiographs of the Development of the Elbow Region and its Articulations from Infancy to Age 18 .....	458
Hand .....	464
A Series of Radiographs of the Development of the Hand and Hand Root from Infancy to Age 18 .....	469
 V. Pelvis – Hip Articulation and Lower Extremities .....	 485
Prenatal Development .....	486
Postnatal Development .....	486
Hip Bone with Hip Articulation and Thigh .....	486
A Series of Radiographs of the Development of the Pelvis and Hip Articulation from Infancy to Puberty .....	491
Congenital Hip Luxations .....	505
Knee Area .....	504
A Series of Radiographs of the Development of the Knee Articulation from Infancy to Age 25 ..	509
Foot with Ankle Articulation .....	518
A Series of Radiographs of the Development of the Tibia and Foot from Infancy to Age 17 ....	532
 VI. Key Aseptic Bone Necroses .....	 536
References .....	537
Index .....	553

This book uses Parisian nomenclature (PNA) exclusively. However, it has not been possible to be altogether consistent, since there are still differences in the various editions of the PNA. In addition, anatomic and roentgenologic handbooks, atlases and encyclopedias have until recently also been using Jenaer and Basel nomenclature and this tradition has been carried on by showing these terms in brackets wherever the author thought necessary.
