Preface.....	III
List of contributors and participants.....	V
Peveling, E.: Lichenology and Lichenologists in Westphalia.....	1

Developmental Morphology and Ultrastructure

Jahns, H.M.: New trends in developmental morphology of the thallus	17
Poelt, J.: On reductions of morphological structures in lichens.....	35
Ahmadjian, V. & Jacobs, J.B.: Studies on the development of synthetic lichens.....	47
Honegger, R.: Questions about pattern formation in the algal layer of lichens with stratified (heteromerous) thalli.....	59
Gärtner, G. & Ingolic, E.: Additional observations on cytology and reproduction processes of the lichen alga <i>Trebouxia</i>	73
Steffens, A.: The occurrence of epiphytes on <i>Picea excelsa</i> (CV) in the area of Münster (Westfalen).....	77
Ott, S.: Reproductive strategies in lichens.....	81
Friedl, T.: Aspects of thallus development in the parasitic lichen <i>Diploschistes muscorum</i>	95
Clerc, P.: On the morphology of soralia in the genus <i>Usnea</i>	99
Henssen, A. & Dobelmann, A.: Development of the spongiostratum in <i>Anzia</i> and <i>Pannoparmelia</i>	103
Boissière, M.C.: Ultrastructural evidence for polyglucosidic reserves in <i>Nostoc</i> cells in <i>Peltigera</i> and <i>Collema</i> and the effect of thallus hydration.....	109
Boissière, J.C.: Ultrastructural relationship between the composition and the structure of the cell wall of the mycobiont of two lichens..	117
Schlarman, G.: Cytochemical investigations in cell walls of two ascomycetous mycobionts.....	133
Bellemère, A. & Letrouit-Galinou, M.-A.: Differentiation of lichen asci including dehiscence and sporogenesis: an ultrastructural survey.....	137
Yamamoto, Y., Yoshimura, I. & Yamada, Y.: Cultures of <i>Usneaceae</i> species and growth factors in their cultured tissues.....	163
Ascaso, C., Rapsch, S. & Brown, D.H.: Effect of fixation solutions on the ultrastructure of lichen symbionts.....	167

Biology and Taxonomy of Genera and Specific Groups

Kärnefelt, I. & Mattsson, J.-E.: Morphological characteristics and affinities of the genus <i>Cornicularia</i>	171
Yoshimura, I.: Taxonomy and speciation of <i>Anzia</i> and <i>Pannoparmelia</i>	185
Ruoss, E.: Species differentiation in a group of reindeer lichens (<i>Cladonia</i> subg. <i>Cladina</i>).....	197
Mattsson, J.-E.: Zeorin in <i>Cetraria pinastri</i> from an unusual habitat. .	207
Büdel, B.: Taxonomy and biology of the lichen genus <i>Peltula</i> Nyl....	209
Hertel, H.: Progress and problems in taxonomy of Antarctic saxicolous lecideoid lichens.....	219
Timdal, E.: Problems of generic delimitation among squamiform members of the Lecideaceae.....	243
Aguirre, B. & Hawksworth, D.L.: The circumscription, biology, and relationships of the genus <i>Leptorhaphis</i> Körber.....	249
Henssen, A.: <i>Lichenothelia</i> , a genus of microfungi on rocks.....	257

Ecophysiology

Kappen, L., Bölter, M. & Kühn, A.: Photosynthetic activities of lichens in natural habitats in the maritime Antarctic.....	297
Nash III, T.H., Kappen, L., Lösch, R., Matthes-Sears, U. & Larson, D.W.: Cold resistance of lichens.....	313
Feige, G.B. & Jensen, M.: Photosynthetic properties of lichens stored at -25°C for several years.....	319
Jensen, M. & Feige, G.B.: The effect of desiccation and light on the 77 K chlorophyll fluorescence properties of the lichen <i>Peltigera aphthosa</i>	325
Velly, P. & Leclerc, J.-C.: Variations in photosynthetic parameters and fluorescence patterns in <i>Peltigera praetextata</i> and <i>Peltigera canina</i> . .	331
von Arb, C.: Photosynthesis and chlorophyll content of the lichen <i>Parmelia sulcata</i> Taylor from locations with different levels of air pollution.....	343
Wirth, V.: The influence of water relations on lichen SO ₂ -resistance..	347
Larson, D.W.: The absorption and release of water by lichens.....	351
Brown, D.H.: The location of mineral elements in lichens; implications for metabolism.....	361

Ecology and Distribution

Krog, H.: Altitudinal zonation of tropical lichens.....	379
Galloway, D.J.: Austral lichen genera: some biogeographical problems.....	385
Almborn, O.: Lichens at high altitude in Southern Africa.....	401

Ahti, T.: Endemism among Cladoniaceae in the Table Mountains of the Guayana Highland, Venezuela.	419
Stenroos, S.: Studies on the genus <i>Cladonia</i> sect. <i>Cocciferae</i> in Papua New Guinea and the adjacent regions.	421
Vitikainen, O.: Distribution patterns of European <i>Peltigera</i>	423
Fröberg, L.: A floristic study of calcicolous lichens on the Great Alvar of Öland, Sweden.	427
Oksanen, J.: Ecology of the taxa of <i>Cladonia chlorophaea</i> aggr. on the south coast of Finland.	429
Manrique, E. & Sancho, L.G.: Ecological discrimination of <i>Hypogymnia atrofusca</i> and <i>H. intestiniformis</i> in Sistema Central (Spain)	433

Chemotaxonomy

Kilius, H.: Protein characters as a taxonomic tool in lichen systematics.	445
Huovinen, K.: A standard HPLC method for the analyses of aromatic lichen compounds.	457
Geyer, M. & Feige, G.B.: Analysis of depsides, depsidones, and other lichen specific aromatics by high performance liquid chromatography.	467
Titze, A.: Sekikaic acid methyl ester found in <i>Protousnea</i> (Mot.) Krog.	469
Tabacchi, R. & Tsoupras, G.: The chemical composition of <i>Letharia vulpina</i> (L.) Hue.	475
Subject index.	481
Taxonomic index.	486
