

Table of Contents

Chapter I. Fractional Linear Transformations	1
I.A. Basic Concepts	1
I.B. Classification of Fractional Linear Transformations.....	4
I.C. Isometric Circles.....	8
I.D. Commutators.....	11
I.E. Fractional Reflections.....	12
I.F. Exercises	13
Chapter II. Discontinuous Groups in the Plane	15
II.A. Discontinuous Groups	15
II.B. Area, Diameter, and Convergence	16
II.C. Inequalities for Discrete Groups	18
II.D. The Limit Set	21
II.E. The Partition of $\hat{\mathbb{C}}$	23
II.F. Riemann Surfaces	25
II.G. Fundamental Domains	29
II.H. The Ford Region	32
II.I. Precisely Invariant Sets	35
II.J. Isomorphisms	36
II.K. Exercises	37
II.L. Notes.....	39
Chapter III. Covering Spaces	41
III.A. Coverings	41
III.B. Regular Coverings	42
III.C. Lifting Loops and Regions	45
III.D. Lifting Mappings.....	46
III.E. Pairs of Regular Coverings	48
III.F. Branched Regular Coverings	49
III.G. Exercises	51

Chapter IV. Groups of Isometries.....	53
IV.A. The Basic Spaces and their Groups	53
IV.B. Hyperbolic Geometry	59
IV.C. Classification of Elements of $\mathbb{L}^n$	62
IV.D. Convex Sets.....	65
IV.E. Discrete Groups of Isometries	66
IV.F. Fundamental Polyhedrons.....	68
IV.G. The Dirichlet and Ford Regions.....	70
IV.H. Poincaré's Polyhedron Theorem.....	73
IV.I. Special Cases	78
IV.J. Exercises	80
IV.K. Notes.....	83
Chapter V. The Geometric Basic Groups.....	84
V.A. Basic Signatures	84
V.B. Half-Turns.....	85
V.C. The Finite Groups.....	87
V.D. The Euclidean Groups	91
V.E. Applications to Non-Elementary Groups.....	95
V.F. Groups with Two Limit Points.....	99
V.G. Fuchsian Groups	103
V.H. Isomorphisms	109
V.I. Exercises	111
V.J. Notes.....	114
Chapter VI. Geometrically Finite Groups	115
VI.A. The Boundary at Infinity of a Fundamental Polyhedron	115
VI.B. Points of Approximation	122
VI.C. Action near the Limit Set	124
VI.D. Essentially Compact 3-Manifolds	128
VI.E. Applications	131
VI.F. Exercises	132
VI.G. Notes.....	134
Chapter VII. Combination Theorems.....	135
VII.A. Combinatorial Group Theory – I	135
VII.B. Blocks and Spanning Discs	139
VII.C. The First Combination Theorem.....	149
VII.D. Combinatorial Group Theory – II	156
VII.E. The Second Combination Theorem	160
VII.F. Exercises	168
VII.G. Notes.....	170

Chapter VIII. A Trip to the Zoo	171
VIII.A. The Circle Packing Trick	171
VIII.B. Simultaneous Uniformization	175
VIII.C. Elliptic Cyclic Constructions	177
VIII.D. Fuchsian Groups of the Second Kind.....	185
VIII.E. Loxodromic Cyclic Constructions.....	188
VIII.F. Strings of Beads	200
VIII.G. Miscellaneous Examples	205
VIII.H. Exercises	210
VIII.I. Notes.....	212
Chapter IX. <i>B</i> -Groups.....	214
IX.A. An Inequality.....	214
IX.B. Similarities.....	216
IX.C. Rigidity of Triangle Groups	217
IX.D. <i>B</i> -Group Basics.....	220
IX.E. An Isomorphism Theorem.....	226
IX.F. Quasifuchsian Groups	232
IX.G. Degenerate Groups.....	236
IX.H. Groups with Accidental Parabolic Transformations	243
IX.I. Exercises	246
IX.J. Notes.....	248
Chapter X. Function Groups.....	249
X.A. The Planarity Theorem	249
X.B. Panels Defined by Simple Loops	255
X.C. Structure Subgroups	258
X.D. Signatures.....	271
X.E. Decomposition	282
X.F. Existence.....	291
X.G. Similarities and Deformations.....	299
X.H. Schottky Groups	311
X.I. Fuchsian Groups Revisited	314
X.J. Exercises	316
X.K. Notes.....	318
Bibliography	319
Special Symbols.....	323
Index	324
