

C O N T E N T S

PREFACE	V
CHAPTER I – MATRIX FREDHOLM OPERATORS	1
1. Conditions for invertibility of matrices with entries in a ring	1
2. Properties of matrix Φ -operators	8
3. The index of matrix Φ -operators	14
CHAPTER II – EXACT CONSTANTS IN BOUNDEDNESS THEOREMS FOR SINGULAR INTEGRAL OPERATORS	21
4. Some estimates of norms and quotient norms of singular integral operators	21
5. Exact constants in the theorems of Hardy-Littlewood, Babenko, and Khvedelidze on boundedness of singular integral operators	36
6. The quotient norm of operators of local type	44
7. The norm of the operator of singular integration along an open contour	57
8. Analogues for spaces of vector-valued functions	63
CHAPTER III – SINGULAR INTEGRAL OPERATORS WITH MATRIX COEFFICIENTS	67
9. Some information on singular integral operators	67
10. Singular integral operators with piecewise-continuous matrix coefficients	71
11. Sufficient conditions for singular integral operators with bounded measurable coefficients to be Fredholm operators	80
12. Necessary conditions for Fredholmness	86
CHAPTER IV – BANACH ALGEBRAS WITH SYMBOL	91
13. Sufficient families of multiplicative functionals	91
14. Symbols	101

15. A local principle	107
16. The algebra generated by the Toeplitz operators with piecewise-continuous coefficients	109
CHAPTER V – BANACH ALGEBRAS GENERATED BY SINGULAR INTEGRAL OPERATORS WITH PIECEWISE-CONTINUOUS COEFFICIENTS	
17. Matrix symbols on algebras of singular integral operators	121
18. Extension of presymbols	126
19. An algebra of singular integral operators with Carleman shift	138
CHAPTER VI – SUFFICIENT FAMILIES OF n -DIMENSIONAL REPRESENTATIONS OF BANACH ALGEBRAS	
20. The standard identity on $\mathbb{C}^{n \times n}$	145
21. A matrix analogue of Gelfand's transformation	151
22. Sufficient families of n -dimensional representations	155
23. A method for constructing sufficient families of representations	158
24. Local conditions	166
25. A topology on the set of maximal ideals of Banach PI-algebras	174
CHAPTER VII – MATRIX SYMBOLS	
26. Conditions for the existence of matrix symbols	181
27. Matrix symbols on algebras that contain non-Carleman shifts	187
28. Nonexistence of a matrix symbol on the algebra of multidimensional Wiener-Hopf operators	189
29. Open problems	194
BRIEF COMMENTS ON THE LITERATURE	197
REFERENCES	199
