

CONTENTS

P. Di Vecchia: Covariant Quantization of the Bosonic String: Free Theory	1
I.A. Batalin and E.S. Fradkin: Operatorial Quantization of Dynamical Systems with Irreducible First and Second Class Constraints	11
M.J. Duff: Kaluza-Klein Approach to Superstrings	19
I. Moss: Non Linear Effects in Quantum Gravity	41
K. Maeda: Our Universe as an Attractor in a Superstring Model	51
J. Audretsch: Mutually Interacting Quantum Fields in Curved Space-Times	68
B. Allen: Gravitons in De Sitter Space	82
D.D. Harari: Effects of Graviton Production in Inflationary Cosmology	97
R.S. Ward: Multi-Dimensional Integrable Systems	106
N.J. Hitchin: Monopole and Vortex Scattering	117
J. Isenberg: The Ambitwistor Program	125
J. Lukierski: Supersymmetric Extension of Twistor Formalism	137
E. D'Hoker and L. Vinet: Supersymmetries of the Dyon	156
M.A. Semenov-Tian-Shansky: Classical r -Matrices, Lax Equations, Poisson Lie Groups and Dressing Transformations	174
M. Karowski: On Monte Carlo Simulations of Random Loops and Surfaces	215
A.M. Nemirovsky: Field Theoretic Methods in Critical Phenomena with Boundaries	229
