Preface — V

About the editors — XI

Part I: Hydrogen production

Sujeet Kesharvani, Sakshi Sarathe, Anjali Agrawal, Gaurav Dwivedi, Prashant Malik

Chapter 1

Green hydrogen production using biomass — 3

Sushma Balanagu, Srikanth Allamsetty, Ambrish Devanshu

Chapter 2

Hydrogen production using nonthermal plasma technology — 25

Jatinderpal Singh, Devyani Thapliyal, Anurag Kumar Tiwari, Raj Kumar Arya

Chapter 3

Technologies to synthesize hydrogen from renewable and environment-friendly sources: past scenarios and current trends — 43

Ashish Kumar, Venkataraman Vishwanathan, Mamta Belwal, Devyani Thapliyal, Raj Kumar Arya, Leela Manohar Aeshala

Chapter 4

Thermochemical processes for hydrogen — 63

Surajit Ghosh, Juvairia Shajahan, Raj Kumar Arya, Sujoy Bepari

Chapter 5

Synthesis of hydrogen through reforming processes and its utilization to value-added products — 107

Sahaya Michael Hayden R., Mohamed Arshath S., Anand Kumar P., Karthikeyan C., Faheem Arakkal

Chapter 6

Producing green hydrogen from of sugarcane bagasse using ASPEN PLUS simulation — 129

Pragati Shukla, Nidhi Garg, Raj Kumar Arya, S. Manivannan

Chapter 7

Hydrogen production technologies: state-of-the-art and future possibilities — 143

Vishal Tuli

Chapter 8

Hydrogen production technologies: challenges and opportunity — 173

Part II: Hydrogen storage

Swati Awasthi, Saurabh Kango, Nitin Sharma

Chapter 9

Reliable, economic, and eco-friendly methods for hydrogen storage — 199

Isha Arora, Ashok N. Bhaskarwar

Chapter 10

Metal hydrides: a safe and effective solid-state hydrogen storage system — 211

Shirisha Jatothu, Leela Manohar Aeshala, Raj Kumar Arya

Chapter 11

Porous metal-organic frameworks (MOFs) for hydrogen storage — 251

Part III: Hydrogen applications and utilization

A.V. Raghavendra Rao, Rompicherla Srividya, V. Sravani Sameera, Bhaskar Bethi, K.S.N.V. Prasad, Thangallapalli Srinivas, B. Ganesh, B.V.S. Praveen

Chapter 12

Safety first: managing hydrogen in production, handling, and applications — 275

Kulsoom Koser, Sajjad Haider, Athar Adil Hashmi

Chapter 13

Sustainable hydrogen energy: production, storage, and transportation – transportation of hydrogen and hydrogen-based fuels — 305

Prashant Malik, Santosh Kumar Saraswat, Rajesh Vanshpati, Gautam Raina,
Shubham Sharma, Sujeet Kesharvani, Renu Bansal, Anurag Kumar Tiwari

Chapter 14

**Hydrogen-integrated renewable systems for power generation: an overview
of technologies and applications — 319**

Mohamed Arshath S., Praveenkumar V., Karthikeyan C., Tamilselvi K.,
Mohammed Basith A.B., Anand Kumar P.

Chapter 15

Hydrogen burners for effective utilization of hydrogen as the future fuel — 347

Part IV: Hydrogen technology and analysis

Jaspinder Kaur, Raj Kumar Arya, Roderick Melnik, Anurag Kumar Tiwari

Chapter 16

**Numerical analysis of PEM water electrolyzer for hydrogen production:
critical parameters — 363**

Vivek A, Siddharth Modi, Surendar Varadharajan, Vraj Patel

Chapter 17

**Probabilistic risk assessment of liquid hydrogen storage system using fault
tree and Bayesian network — 379**

Vandana Meena, Rinku Kumar, Jaideep Malik

Chapter 18

**Layered perovskites for hydrogen generation via solar-driven water
splitting — 405**

Part V: Hydrogen future and prospects

Jeevitha G. C., Aanchal Mittal

Chapter 19

Prospects and sustainable approach for biohydrogen — 435

Snehil Rana, Rituja Rana, Devyani Thapliyal, Sarojini Verma, Anshi Mehra,
Chitresh Kumar Bhargava, Kshitij Tewari, George D. Verros, Raj Kumar Arya

Chapter 20

Green hydrogen: challenges and future prospects — 449

X — Contents

Sabir Hussain, Kamthong T., Nazish Fathima, Anil Kumar Adimulapu

Chapter 21

Hydrogen: the future fuel — 487

Index — 503
