

Contents

Part I	Introduction	
Survey of "Intrinsically Conducting Organic Materials"		
By H. Naarmann	3
Part II	Theory	
The Metallic State of Heavily Doped Trans-Polyacetylene		
By S. Stafström (With 3 Figures)	11
On the Semiconductor-Metal Transition in Conducting Polymers		
By D. Baeriswyl and E. Jeckelmann	16
III-Aligned Polymer Chains		
By M. Wolf and K. Fesser (With 1 Figure)	21
Competing Electron-Electron/Electron-Phonon Interactions and Polyacetylene		
By J.T. Gammel, D.K. Campbell, and E.Y. Loh, Jr.	25
Electronic Properties of Lattice Solutions for the Continuum Model of Conducting Polymers		
By H.W. Streitwolf and H. Puff (With 3 Figures)	32
Polaron and Soliton Lattices Within One-Particle Models of Conducting Polymers with a Degenerate Ground State		
By S.L. Drechsler, J. Malek, and M. Springborg	38
Solitons, Twistons, and Crystallinity on Conducting Polymers		
By S. Brazovskii and N. Kirova (With 2 Figures)	43
Correlation Effects in the Spectra of Soliton Containing Polyenes		
By J. Fagerström and S. Stafström (With 2 Figures)	50
Interpretation of the Photoinduced Infrared Spectra of Oriented Polyacetylene and Triblock Copolymers		
By E. Mulazzi, A. Ripamonti, and S. Lefrant (With 2 Figures)	54
Excitons in Chains of Thiophene Rings		
By J.-L. Fave (With 2 Figures)	60
		VII

Electronic Properties of Nonconjugated Polymers:

1,4-Polybutadiene and 1,4-Polyisoprene

By Z. Shuai and J.L. Brédas (With 1 Figure) 63

Optical Transitions and Photoconductivity

in Oriented Trans-Polyacetylene

By D. Comoretto, G. Dellepiane, G.F. Musso, R. Tubino, A. Walser,
R. Dorsinville, and R.R. Alfano (With 1 Figure) 68

Bound States and Non-Monotonic Relaxation Rate in M-X Chains

By C.L. Wang, G.L. Gu, Z.B. Su, and L. Yu (With 5 Figures) 72

Part III Transport

High- σ and low- σ Polyacetylene: A Comparison

By Th. Schimmel, M. Schwoerer, and H. Naarmann (With 1 Figure) 81

A Microscopic Picture for Very High Conductivities in Polymers

By A.B. Kaiser (With 2 Figures) 86

Percolation in Conducting Polymers - Well and Alive!

By J. Voit, N. Coustel, P. Bernier, and J.E. Fischer (With 3 Figures) 90

Implications of the Linear Thermopower of New Polyacetylene

By A.B. Kaiser (With 2 Figures) 98

The General Temperature Dependence of the Fluctuation-Induced Tunnelling Current.

Application to Naarmann-Polyacetylene

By G. Paasch, R. Zuzok, W. Pukacki, and S. Roth 102

Charge Transport and Its Anisotropy of Pristine and Segmented New (CH)_x

By W. Pukacki, R. Zuzok, and S. Roth (With 2 Figures) 106

DC Electrical Anisotropy of Stretchoriented Polyacetylene:

Doping and Temperature Dependence

By M.T. Ahmed, S. Roth, and M.D. Migahed (With 3 Figures) 112

Discontinuity and Anisotropy of Conducting Phase in Heterogeneous Systems

as Seen by Alternating Current Measurements

By J. Ulanski, M. Kryszewski, G. Boiteux, G. Seytre, J. Pecherz,
H.W. Helberg, and G. Lupke (With 3 Figures) 117

Small Polarons in Polymeric Tetrathiafulvalenes (PTTF)

By J. Patzsch and H. Gruber (With 3 Figures) 121

Microwave Properties of Conductive Polymer Composites

By P. Hourquebie, L. Olmedo, and Ch. Deleuze (With 2 Figures) 125

In Situ Conductivity Measurements on p-Sexiphenylene and Polyphenylene	
By K. Meerholz and J. Heinze (With 2 Figures)	130

Part IV	Raman and Optical Spectroscopy
----------------	---------------------------------------

Raman Characterization of Polarons and Bipolarons in Conducting Polymers	
By Y. Furukawa (With 4 Figures)	137
The Bond Alternation Linear Chain in Resonance Raman Scattering	
By J. Kürti and H. Kuzmany (With 3 Figures)	144
Correlation of Electronic Properties and Raman Spectra Within a Series of Polymethine Dyes	
By M. Pfeiffer, W. Werncke, A. Lau, and W. Freyer (With 2 Figures)	150
Triplet States in Polydiacetylenes:	
T-ADMR in Zero Field Between 1.2 and 230 K	
By B. Bilger, J. Frick, and J.U. von Schütz (With 4 Figures)	157
Femtosecond Optical Absorption in Conjugated Polymers	
By I.D.W. Samuel, F. Raksi, K.E. Meyer, O.M. Gelsen, D.D.C. Bradley, R.H. Friend, P.L. Burn, and A.B. Holmes (With 5 Figures)	162
Photoinduced Bipolaron Bands and Vibrational Modes in Poly(isothianaphtene)	
By J. Poplawski, E. Ehrenfreund, and T. Danno (With 3 Figures) . . .	167
Fast Processes in Polyphenylene Vinylene: PS-Absorption Studies and Computer Simulation	
By S. Rentsch (With 2 Figures)	172
In Situ Spectroscopic Studies on Viologen Functionalized Poly(3-Alkylthiophenes) During Electrochemical Redox Processes	
By N.S. Sariciftci, H. Neugebauer, K.-U. Gaudl, P. Bäuerle, A. Grupp, and M. Mehring (With 3 Figures)	176

Part V	Nonlinear Optics
---------------	-------------------------

Nonlinear Optical Properties of Conjugated Polymers	
By W.J. Blau (With 4 Figures)	183
Macromolecular Interactions and Their Influence on the Nonlinear Optical Susceptibility	
By H.J. Byrne and W.J. Blau (With 4 Figures)	190

Step Potential Model for Nonlinear Optics Properties of Polyenes By Ch. Kuhn (With 5 Figures)	196
Nonlinear Optics with Oriented Conjugated Polymer Thin Films By F. Kajzar, J. Le Moigne, and A. Thierry (With 4 Figures)	202
Second Harmonic Generation from Langmuir-Blodgett Films of Donor Acceptor Carotinoids By E. Walsh, M. Cavanagh, Z.R. Tang, W.J. Blau, J. McGilp, Th. Wagner, S. Hagen, and S. Roth (With 4 Figures)	209
Quantitative Determination of the $\chi^{(3)}$ -Dispersion of Conjugated Polymers by Resonance CARS Line Shape Analysis By W. Werncke, M. Pfeiffer, A. Lau, and T. Hasche (With 3 Figures)	213
Time Resolved CARS Spectroscopy of the Series of Bisdimethylaminomethine Photoisomers By W. Werncke, M. Pfeiffer, A. Lau, L. Holz, and T. Hasche (With 2 Figures)	217
Electro-Modulation Spectroscopy of Poly(2,5-Thienylene Vinylene) By O.M. Gelsen, D.D.C. Bradley, H. Murata, N. Takada, T. Tsutsui, S. Saito, and G. Leising (With 3 Figures)	221

Part VI	Polyacetylene
----------------	----------------------

EPR Studies of Segmented Polyacetylene By A. Bartl, R. Zuzok, and S. Roth (With 5 Figures)	227
Well Defined Polyacetylene-block-Poly(1,3-cyclopentylene Vinylene) Diblock Copolymers, Synthesis and Characterization By F. Stelzer, W. Fischer, G. Leising, and Ch. Heller (With 7 Figures)	231
Optical and Electronic Properties of a Highly Disordered Form of Polyacetylene - Distinguishing Between Localized Defects and Conformational Disorder By K. Pichler, O.M. Gelsen, D.D.C. Bradley, R.H. Friend, D. Parker, and W.J. Feast (With 3 Figures)	238
Optical Properties and Conjugation-Length-Effects of Polyacetylenes and Copolymers By G. Leising, C. Heller, K. Pressl, W. Graupner, W. Fischer, F. Stelzer, Ch. Godon, and S. Lefrant (With 4 Figures)	242
Electron Energy-Loss Spectroscopy on Doped and Undoped β -Carotene By E. Sohmen, E. Pellegrin, S.L. Drechsler, and J. Fink (With 4 Figures)	248

Part VII Polyaniline

Properties of Solution Cast Films of Polyaniline and the Effects of Orientation By A.P. Monkman, F. Hampson, and A.J. Milton (With 4 Figures) . . .	255
Transport Dimensionality in Conducting Polymers: The Case of Polyaniline By J.P. Travers, M. Nechtschein, and K. Mizoguchi (With 4 Figures) .	262
Low Temperature Transitions in Polyanilines By J.K. Avlyanov and A. Mavlyanov (With 2 Figures)	268
Vibrational Analysis of the Reduced Form of Polyaniline By S. Quillard, G. Louarn, J.P. Buisson, S. Lefrant, J. Masters, and A.G. MacDiarmid (With 3 Figures)	271
In Situ FTIR-ATR-Spectroscopy of Polyaniline in Aqueous Solutions By A. Moser, H. Neugebauer, K. Maurer, J. Theiner, and A. Neckel (With 3 Figures)	276
Ellipsometric Analysis of the Conversion Processes in Thin Polyaniline Films By B.K. Grodzicka and K. Brudzewski (With 4 Figures)	280
Slow Relaxation in Conducting Polymers By C. Odin and M. Nechtschein (With 2 Figures)	285

Part VIII Polyphenylenevinylene, Polypyrrole

Control of Electronic and Physical Structure Through Modification of the Synthesis and Processing in Precursor-Route Poly(arylene vinylene) Polymers By P.L. Burn, D.D.C. Bradley, A.R. Brown, R.H. Friend, D.A. Halliday, A.B. Holmes, A. Kraft, and J.H.F. Martens (With 3 Figures)	293
Studies of the Vibrational Properties of Poly(arylene vinylenes) By G. Louarn, J.Y. Mevellec, J.P. Buisson, S. Lefrant, and H. Eckhardt (With 1 Figure)	298
Electro-Optic Properties of Precursor Route Poly(arylene vinylene) Polymers By D.D.C. Bradley, A.R. Brown, P.L. Burn, R.H. Friend, A.B. Holmes, and A. Kraft (With 3 Figures)	304
Polyparaphenylene Vinylene: SSH-Hamiltonian Description of the Electronic and Vibrational Properties By Z. Shuai and J.L. Brédas (With 3 Figures)	310

Mössbauer, EPR and Susceptibility Studies of Polypyrrole Doped with FeCl ₃ By Z. Kucharski, H. Winkler, A.X. Trautwein, and C. Budrowski (With 3 Figures)	315
---	-----

Differential Pulse Polarography - A Versatile Tool in the Redox Chemistry of Conjugated Polymers By M. Helbing and H.-H. Hörhold (With 5 Figures)	321
---	-----

Part IX	Polythiophene
----------------	----------------------

Anisotropy of Structure and Transport in Oriented Poly(3-alkylthiophene) By G. Gustafsson, O. Inganäs, and P. Dyreklev (With 4 Figures) . . .	329
Determination of the Optical Constants of a Polythiophene Thin Film By R. Schwarz, W.A. Goedel, N. Somanathan, C. Bubeck, U. Scheunemann, W. Hickel, and G. Wegner (With 4 Figures)	337
Electrochemical Synthesis of Poly(dithieno thiophene) By M. Siekierski, J. Plochanski, M. Catellani, and S. Destri (With 4 Figures)	341
NMR Studies of Poly(3-alkylthiophenes) By P.C. Stein, A. Bolognesi, M. Catellani, S. Destri, and L. Zetta (With 3 Figures)	346
Modelling the Al/Polythiophene Interface: A Semiempirical Quantum Chemical Approach By S. Stafström, W.R. Salaneck, R. Lazzaroni, and J.L. Brédas (With 3 Figures)	351
Impedance Studies of Poly(4,4'-dialkyl-2,2'-bithiophenes) By M. Zagórska, I. Kulszewicz-Bajer, A. Pron, and J. Tanguy (With 3 Figures)	356
Influence of Polymerization Irregularities on the Electronic Properties of Polythiophene By D.A. dos Santos and J.L. Brédas (With 2 Figures)	360
Luminescence Quenching in Poly(3-hexylthiophene) by Charge Injection in a Field Effect Transistor By P. Dyreklev, O. Inganäs, J. Paloheimo, and H. Stubb (With 2 Figures)	365
A Solid State ¹ H NMR Study of Motion in Polythiophenes By A.C. Kolbert, N.S. Sariciftci, K.-U. Gaudl, P. Bäuerle, and M. Mehring (With 3 Figures)	369

Resonance Raman Scattering and Optical Absorption from Neutral and Doped Oriented Poly(alkylthiophene) Films By T. Danno, J. Kuerti, and H. Kuzmany (With 2 Figures)	373
Characterization of the Polythiophene Surface by Scanning Tunnelling Microscopy By G. Bar, S.N. Magonov, H.-J. Cantow, T. Greczmiel, and G. Kossmehl (With 1 Figure)	379
Polythiophenes Functionalized with Redoxactive Groups By P. Bäuerle, K.-U. Gaudl, and G. Götz (With 2 Figures)	384
Photoinduced Absorption Spectroscopy of Poly-3-alkylthiophenes By C. Botta, S. Luzzati, S. Destri, R. Tubino, and G. Lanzani (With 4 Figures)	390

Part X	New Materials
---------------	----------------------

Structural Criteria for Conjugated Polymer Design By M. Kertesz and C.X. Cui	397
Polyarenemethylenes: A New Class of Low Gap Polymers By M. Hanack, G. Hieber, G. Dewald, K.-M. Mangold, H. Ritter, and U. Röhrig (With 1 Figure)	401
Synthetic Approach to Extended π -Systems By K. Blatter, A. Godt, T. Vogel, and A.-D. Schlüter	408
Preparation, Conductivity and Electrochemistry of Polyperinaphthalene - A Prototype of Two-Dimensional Conjugated Systems By L. Wuckel, D. Elefant, J. Fröhner, M. Schwarzenberg, and G. Lehmann (With 4 Figures)	413
Permanent Conductivity in Laser Converted Poly(Bis-Ethylthioacetylene) Using an Excimer and Ar ⁺ -Laser By M. Schrödner, R. Baumann, U. Kulisch, H.-K. Roth, and J. Bargon (With 6 Figures)	419
Electronic Properties of Electrochemical Polymeric Carbon By L. Kavan (With 1 Figure)	424
Preparation and Electrical Properties of Plasma Polymer Metal Composite Films By A. Heilmann and C. Hamann (With 3 Figures)	429

Part XI	Nearer and Further Future Applications
----------------	---

Molecular Scale Electronics: Science Fiction or Science Fact? By D. Bloor (With 1 Figure)	437
--	-----

Langmuir-Blodgett-Films of Polyenes By Th. Wagner, H. Schier, S. Hagen, S. Roth, S. Akari, and K. Dransfeld (With 6 Figures)	443
Extended Thiophene Oligomers: New Polyenes for Molecular Electronics By D. Fichou, G. Horowitz, and F. Garnier (With 4 Figures)	452
Semiconducting Properties of Organic Materials. Critical Analysis of Field-Effect Transistors By F. Garnier, G. Horowitz, and D. Fichou (With 1 Figure)	458
Trap-Controlled Mobility in Organic-Based Thin-Film Transistors By Ph. Delannoy and G. Horowitz (With 2 Figures)	466
Optical Spectroscopy of Field-Induced Excitations in MIS Devices with the Durham "Photoisomer" Polyacetylene as the Active Semiconductor By K. Pichler, K.E. Ziemelis, R.H. Friend, D. Parker, and W.J. Feast (With 4 Figures)	471
Catalytic Activity of Heteropolyanions Doped Conjugated Polymers By I. Kulszewicz-Bajer, M. Zagórska, M. Hasik, A. Pron, J. Pozniczek, and A. Bielanski	475
Electrolytic Capacitors with a Conducting Polymer By B. Geffroy and J. Tanguy (With 3 Figures)	480
Processing of Electrically Conductive Polymers and Compounds - Tools for Exploring and Using Structures and Properties By B. Wessling (With 9 Figures)	486
Index of Contributors	497
