

Contents Volume I

G.E. Hinton <i>Learning translation invariant recognition in massively parallel networks.....</i>	1
M. Rem <i>Trace theory and systolic computations.....</i>	14
E.H.L. Aarts and J.H.M. Korst <i>Boltzmann machines and their applications.....</i>	34
P. Anderson, C. Hankin, P. Kelly, P. Osmon and M. Shute <i>COBWEB-2: Structured specification of a wafer-scale supercomputer.....</i>	51
J.K. Annot and R.A.H. van Twist <i>A novel deadlock free and starvation free packet switching communication processor.....</i>	68
P.G. Bosco, E. Giachin, G. Giandonato, G. Martinengo and C. Rullent <i>A parallel architecture for signal understanding through inference on uncertain data.....</i>	86
W. Damm and G. Döhmen <i>An axiomatic approach to the specification of distributed computer architectures.....</i>	103
F. Dehne, J.-R. Sack and N. Santoro <i>Computing on a systolic screen: hulls, contours and applications.....</i>	121
J.L. Gaudiot and L.T. Lee <i>Multiprocessor systems programming in a high-level data-flow language.....</i>	134
P.A.J. Hilbers, M.R.J. Koopman and J.L.A. van de Snepscheut <i>The twisted cube.....</i>	152
C.-H. Huang and C. Lengauer <i>An implemented method for incremental systolic design.....</i>	160
J.K. Iliffe <i>The use of parallel functions in system design.....</i>	178

A. Kaldewaij <i>The translation of processes into circuits.....</i>	195
O. Krämer and H. Mühlenbein <i>Mapping strategies in message based multiprocessor systems.....</i>	213
S.H. Lavington, M. Standring, Y.J. Jiang, C.J. Wang and M.E. Waite <i>Hardware memory management for large knowledge bases.....</i>	226
D.L. McBurney and M.R. Sleep <i>Transputer-based experiments with the ZAPP architecture.....</i>	242
C. Mongenet and G.-R. Perrin <i>Synthesis of systolic arrays for inductive problems.....</i>	260
D.J. Pritchard, C.R. Askew, D.B. Carpenter, I. Glendinning, A.J.G. Hey and D.A. Nicole <i>Practical parallelism using transputer arrays.....</i>	278
S.V. Rajopadhye and R.M. Fujimoto <i>Systolic array synthesis by static analysis of program dependencies.....</i>	295
P. Schaefer and Ph. Schnoebelen <i>Specification of a pipelined event driven simulator using FP2.....</i>	311
P. Stenström and L. Philipson <i>A layered emulator for design evaluation of MIMD multiprocessors with shared memory.....</i>	329
J.A. Test, M. Myszewski and R.C. Swift <i>The Alliant FX/series: A language driven architecture for parallel processing of dusty deck Fortran.....</i>	345
P.H. Welch <i>Emulating digital logic using transputer networks (very high parallelism = simplicity = performance).....</i>	357
M. Bellia, P.G. Bosco, E. Giovannetti, G. Levi, C. Moiso and C. Palamidessi, <i>A two-level approach to logic plus functional programming integration.....</i>	374
D.I. Bevan, G.L. Burn and R.J. Karia <i>Overview of a Parallel Reduction Machine Project.....</i>	394

R. Gonzalez-Rubio, J. Rohmer and A. Bradier <i>An overview of DDC: Delta Driven Computer</i>	414
Ph. Jorrand <i>Design and implementation of a parallel inference machine for first order logic: an overview</i>	434
P. Mehring and E. Aposporidis <i>Multi-Level simulator for VLSI - an overview</i>	446
E.A.M. Odijk <i>The DOOM system and its applications: A survey of ESPRIT 415 subproject A, Philips Research Laboratories</i>	461
Authors index volume I.....	480

Contents Volume II

Arvind and R.S. Nikhil <i>Executing a program on the MIT tagged-token dataflow architecture....</i>	II	1
K.L. Clark <i>PARLOG: the language and its applications.....</i>	II	30
D. Turner <i>Functional programming and communicating processes.....</i>	II	54
L. Augusteijn <i>Garbage collection in a distributed environment.....</i>	II	75
J.C.M. Baeten, J.A. Bergstra and J.W. Klop <i>Decidability of bisimulation equivalence for processes generating context-free languages.....</i>	II	94
D.A. Bailey and J.E. C��ny <i>An approach to programming process interconnection structures: Aggregate rewriting graph grammars.....</i>	II	112
M.R. Barbacci and J.M. Wing <i>Specifying functional and timing behavior for real-time applications.....</i>	II	124
H.P. Barendregt, M.C.J.D. Eekelen, J.R.W. Glauert, J.R. Kennaway, M.J. Plasmeijer and M.R. Sleep <i>Term graph rewriting.....</i>	II	141
H.P. Barendregt, M.C.J.D. Eekelen, J.R.W. Glauert, J.R. Kennaway, M.J. Plasmeijer and M.R. Sleep <i>Towards an intermediate language based on graph rewriting.....</i>	II	159
D.I. Bevan <i>Distributed garbage collection using reference counting.....</i>	II	176
U. Gamwell Dawids and H.H. L��vengreen <i>Rigorous development of a distributed calendar system.....</i>	II	188
M. Felleisen and D.P. Friedman <i>A reduction semantics for imperative higher-order languages.....</i>	II	206

R. van Glabbeek and F. Vaandrager <i>Petri net models for algebraic theories of concurrency</i>	II 224
J.I. Glasgow and G.H. MacEwen <i>A computational model for distributed systems using operator nets</i>	II 243
E.P. Gribomont <i>Design and proof of communicating sequential processes</i>	II 261
R. Hale and B. Moszkowski <i>Parallel programming in temporal logic</i>	II 277
D. Harrison <i>RUTH: A functional language for real-time programming</i>	II 297
J. Hooman <i>A compositional proof theory for real-time distributed message passing</i> ..	II 315
C. Delgado Kloos <i>STREAM: a scheme language for formally describing digital circuits</i>	II 333
J.N. Kok <i>A fully abstract semantics for data flow nets</i>	II 351
A.R. Martin and J.V. Tucker <i>The concurrent assignment representation of synchronous systems</i>	II 369
S. Ramesh <i>A new and efficient implementation of multiprocess synchronization</i>	II 387
Ph. Schnoebelen <i>Rewriting techniques for the temporal analysis of communicating processes</i>	II 402
H. Tebra <i>Optimistic and-parallelism in Prolog</i>	II 420
P. Watson and I. Watson <i>An efficient garbage collection scheme for parallel computer architectures</i>	II 432
D.C. Luckham, D.P. Helmbold, D.L. Bryan and M.A. Haberler <i>Task sequencing language for specifying distributed Ada systems</i>	II 444
Authors index volume II.....	II 464
