

CONTENTS

URBAN, P., Opening Address.....	1
ROLLNIK, H., Photon hadron interaction in the resonance region.....	5
BARTL, A., Two-body and quasi-two-body electro- and photoproduction at high energies.....	89
ELLIS, J., e^+e^- annihilation, the new particles, and charm.....	143
SCHOPPER, H., Physics with e^+e^- -storage rings.....	233
GOURDIN, M., Phenomenology of weak currents.....	307
MITTER, H., Quantum electrodynamics in laser fields.....	397
CIULLI, S., POMPONI, C. and STEFANESCU, I. S., Analytic extrapolation techniques and stability problems in dispersion relation theory.....	469
SCHWINGER, J., Source theory viewpoints in deep inelastic scattering.....	471
DITTRICH, W., Vacuum polarization, source- and otherwise.....	489
RÖMER, H., Spontaneous mass generation, renormalization group and solvable $U(N)$ -symmetric models...	521
BIRITZ, H., A second look at relativistic wave equations.....	549
HAAG, R., Structural questions in quantum field theory..	567
KLAUDER, J. R., Stochastic processes and quantum theory..	581
THIRRING, W., Convexity properties of Coulomb systems...	631
RÜHL, W., Finite conformal transformations in local quantum field theory.....	643
PIETSCHMANN, H., Summary.....	667
