

CONTENTS

KLAUDER, J.R., Classical Concepts in Quantum Contexts.....	1
JEHLE, H., Topology of Magnetic Fields in Particle Physics, Implications on the Quark Model.....	63
BIALYNICKI-BIRULA, I., Classical Limit of Quantum Electrodynamics.....	111
MÜLLER, B., GREINER, W., The Physics of Strong Fields in Quantum Electrodynamics and General Relativity.....	153
GERVAIS, J.L., Solitons and Instantons in Quantum Field Theory.....	385
SCHLINDWEIN, M., The Scattering of Quantized Solitons in the Non-Linear Schrödinger Theory.....	429
GARBACZEWSKI, P., Boson-Fermion Correspondence in Quantum Theory and Quantization of Spinor Fields.....	445
RAYSKI, J., Unitary Spin, Colour and Unified Theory....	463
KEHR, K.W., Methods of Nonrelativistic Quantum Field Theory.....	471
WAGNER, H., Renormalization Group Approach to Critical Phenomena.....	543
MEISSNER, G., MAIS, H., Critical Behaviour and Non- linear Effects in Uniaxial Ferroelectrics.....	567
JONA LASINIO, G., Probabilistic Ideas in Field Theory and Statistical Mechanics.....	589
BACKENSTOSS, G., Particle Physics and Exotic Atoms.....	593
SCHECK, F., Particle Physics and Exotic Atoms.....	629

WEISE, W., Medium Energy Meson Physics.....	677
ALBERI, G., Interactions of Hadrons With Nuclei at High Energy.....	727
BÖRNER, G., Cosmic Gamma Radiation.....	789
HÁJÍČEK, P., "Splendeurs et Misères" of Hawking's Effect.....	835
RUMPF, H., Covariant Treatment of Particle Creation in External Fields.....	873
BECKER, J.D., CASTELL, L., Photon Condensation in an Einstein Universe.....	885
