

Contents

Jordan Algebras Versus C^* - Algebras	1
Erling Størmer	
Decomposition of Families of Unbounded Operators.....	15
H.J. Borchers	
Structure of (real-time) $P(\phi)_2$ Green's Functions.....	47
J. Dimock	
Asymptotic Perturbation Expansion for the S-matrix in $P(\phi)_2$ Quantum Field Theory Models.....	59
Jean-Pierre Eckmann	
Time Ordered Operator Products and the Scattering Matrix in $P(\phi)_2$ Models	69
Konrad Osterwalder	
Recent Progress on the Yukawa $_2$ Quantum Field Theory.....	87
Oliver A. McBryan	
The Cluster Expansion for Y_2	103
R. Sénéor	
External Field Dependence of Magnetization and Long Range Order in Quantum Field Theory.....	125
Francesco Guerra	
Critical Exponents and Renormalization in the ϕ^4 Scaling Limit.....	147
J. Glimm	
A. Jaffe	

VIII

An Asymptotic Perturbation Expansion for Multiphase ϕ^4_2167

Arthur Jaffe

James Glimm

Thomas Spencer

Renormalization Problem in Massless $(\phi^4)_{4+\epsilon}$ Theory177
K. Symanzik

Challenging Problems in Singular Dynamical Systems185
John R. Klauder

Thermodynamic Limit of the Free Energy and Correlation
Functions of Spin Systems.....201
Joel L. Lebowitz

The Lorenz Attractor and the Problem of Turbulence.....221
David Ruelle
