Preface	XI
-------------------	----

Chapter 1. Production, Characteristics and Methods of Examining Retinal Detachment

Pathogenesis	3
Formation of Retinal Holes	3
Genesis of Detachment	3
Formation and Spread of Subretinal Fluid	5
Natural History	8
Predisposing Factors	8
Rhegmatogenous Retinal Detachment	10
Classical Symptoms	10
Other Symptoms	12
Examination Techniques	13
Indirect Ophthalmoscopy	13
Direct Ophthalmoscopy	16
Visual Fields	16
Normal Details of the Posterior Segment	16
Other Investigations	19
References	20

Chapter 2. Preoperative Examination

Initial Slit-lamp Examination	25
Indirect Ophthalmoscopy of the Posterior Segment	28
Details of Retinal Detachment	29
Peripheral Retinal Degenerations	39
Benign Peripheral Lesions	39
Lesions that may Predispose to Retinal Detachment	43
Retinoschisis	44
Three-Mirror Examination	47
The Vitreous	47
Characteristics of Types of Retinal Detachment	57

Differential Diagnosis of a Rhegmatogenous Retinal Detachment	64
Retinoschisis and Retinal Detachment	64
Exudative Retinal Detachment	65
References	66

Chapter 3. Preoperative Management and Planning of Operation

Preoperative Management	73
Medical Treatment	75
Preparative Surgical Treatment	76
Selection of Operative Procedure	76
Method of Adhesion	76
Scleral Buckle	77
Local Buckling Procedures	80
Encirclement Procedure	83
Non-drainage Operation	84
Indication for Drainage of Subretinal Fluid	86
Intraocular Injections	89
Selection of Operation in Special Cases	91
Rhegmatogenous Detachment Without Apparent Holes	91
Retinoschisis Complicated by Detachment	92
Macular Holes	92
Giant Tears: Principles of Treatment	94
Detachments Associated with Uveal Colobomas	96
Detachments Associated with Intraocular Fibrosis	97
Prophylactic Surgery	99
Other Indications for Prophylaxis	103
References	103

Chapter 4. Surgical Details

Initial Dissection	111
Cryotherapy	113
Operative Complications	114
Localisation of Retinal Holes	116
Buckle Sutures	118
Placement of Buckle Sutures	118
Drainage of Subretinal Fluid	123
Technique of Drainage	124
Tightening the Buckle Sutures	127
Special Surgical Procedures	130

Intraocular Injection	130
Closure of the Wound	133
Methods of Prophylactic Treatment	133
Complications of Prophylaxis	135
References	135

Chapter 5. Postoperative Management and Complications

General Management	139
Recovery of Vision	139
Behaviour of Subretinal Fluid	141
Early Complications	142
Sudden Blindness	142
Infection	142
Anterior Segment Ischaemia	143
Clinical Syndromes	143
Sterile Uveitis	145
Glaucoma	147
Choroidal Detachment	148
Vitreous Haemorrhage	150
Exudative Retinal Detachment	150
Late Complications	150
Implant Extrusion and Infection	150
Intraocular Erosion of Implants	152
Choroidal Folds	152
Postoperative Pain	153
Postoperative Diplopia	153
Refractive Changes	153
Macular Changes	154
Periretinal Membrane Changes	156
Failure in Retinal Detachment Surgery	158
Surgery of Failed Cases	160
Selection of Operation	161
Follow-up of Patients	162
References	162
Subject Index	165
