

Contents

List of Contributors and Active Participants	IX
H. Bickel: Rationale of Neonatal Screening for Inborn Errors of Metabolism	1
Screening for Hereditary Metabolic Disorders	
A.M.O. Veale: Screening for Phenylketonuria	7
E.W. Naylor: Newborn Screening for Maple Syrup Urine Disease (Branched-Chain Ketoaciduria)	19
D.H.H. Pullon: Homocystinuria and Other Methioninemias	29
S. Halvorsen: Screening for Disorders of Tyrosine Metabolism	45
O. Thalhammer: Neonatal Screening for Histidinemia	59
R. Gitzelmann: Newborn Screening for Inherited Disorders of Galactose Metabolism	67
U. Stephan: Neonatal Screening for Cystic Fibrosis	81
H.L. Levy, J.T. Coulombe, and V.E. Shih: Newborn Urine Screening	89

Contents

R.W.E. Watts: Neonatal Screening for Organic Acidurias	105
D. Seidel and H. Wieland: Significance and Need of Screening for Hyperlipidemia in Childhood	123
C. Kattamis: Screening for Hemoglobinopathies (Thalassemias and Other Abnormal Hemoglobins)	133
W. Schröter: Screening for Glucose-6-Phosphate Dehydrogenase Deficiency and Other Erythrocyte Enzyme Defects	149
R. Beckmann, J.M. Robert, H. Zellweger, L. Beubl, C. Dellamonica, and G. Scheuerbrandt: Neonatal Screening for Muscular Dystrophy	155
 Neonatal Screening for Congenital Hypothyroidism	
J.H. Dussault, J. Letarte and H. Guyda: Screening for Congenital Hypothyroidism: 4 Years of Experience	167
R. Illig: Neonatal Screening for Hypothyroidism by TSH Determination in Dried Blood	179
T.P. Foley, Jr., A.H. Klein, B. Foley, A.V. Augustin, H.M. MacDonald, N.J. Hopwood and D.C. Postellon: Experience with Primary Thyrotropin (TSH) Screening for Congenital Hypothyroidism in Pittsburgh (Pa.)	191
F. Delange, P. Bourdoux, and A.-M. Ermans: Neonatal Screening for Hypothyroidism in Brussels	199
P.G. Walfish, J. Ginsberg and N.J. Howard: Results of the Toronto Regionalized Screening Program for Detecting Neonatal Hypothyroidism	207
P.G. Walfish and E. Gera: Experience with the Application of a Dried Blood Thyrotropin (TSH) Method for Neonatal Hypothyroidism Screening: Comparative Studies Between Double-Antibody and Solid Phase Radioimmunoassays	219

P.G. Walfish, E. Gera, and M.M. Wood: Methodologic Limitations on the Measurement of Thyroxine from Small Dried Blood Discs: Comparison of Double-Antibody and Solid Phase Radioimmunoas- says	229
R. Miyahira: Summary of the Northwest Regional Hypothyroidism Screening Program . . .	241
M. Irie and H. Naruse: Mass Screening for Neonatal Hypothyroidism in Japan	247
D. Schönberg: Addendum	253
 Neonatal Screening Programs: Organization, Legislation, Methodologic Pitfalls, and Quality Control	
J.P. Colombo: Introductory Remarks	257
R. Guthrie: Organization of a Regional Newborn Screening Laboratory	259
R. Koch: Medical Backup Needed for Newborn Metabolic Screening Programs	271
G.R. Brandon: Regionalization of Metabolic Screening Laboratories	275
G.M. Komrower: Structure of the System Required to Handle Problems in the European Community Related to Inborn Errors of Metabolism	281
H.L. Vis: Organization and Legislative of Screening in Belgium	285
S.F. Cahalane: Organization of Screening Laboratories	287
P. Lutz: Pitfalls in the Microbiologic Assay of Amino Acids in Screening Laboratories .	289
C. Bachmann and J.P. Colombo: Quality Control Trial in a Screening Laboratory	295

Contents

H. Naruse: System of Neonatal Screening for Inborn Errors of Metabolism in Japan	299
J. Morissette: Organization of Screening Data on Computer	307
A.M.O. Veale: Use of a Computer in a Screening Program	311
 Recommendations for and Future Aspects of Screening	
J.P. Colombo, G. Hammersen, and H. Bickel: Recommendations for Newborn Screening	315
C.R. Scriver: Predictive Medicine: a Goal for Genetic Screening	317
 Subject Index	 335
