

Table of Contents

Part I: Non-linear Field Transformations in 4 Dimensions	1
D. Maison: Renormalization Theory, a Short Account of Results and Problems	3
R. Sénéor: Some Remarks for the Construction of Yang-Mills Field Theories	22
K. Sibold: Non-linear Field Transformations: Simple Examples, General Remarks	32
O. Piguet: Superspace Renormalization of $N = 1, d = 4$ Supersymmetric Gauge Theories	45
P. Breitenlohner: $N = 2$ Supersymmetric Yang-Mills Theories in the Wess-Zumino Gauge	64
R. Collina: Radiative Mass Generation in Scale Invariant Systems with Spontaneous Symmetry Breakdown	81
Discussion Session on Part I	93
Part II: Non-linear σ-Models	95
C. Becchi: The Non-linear σ -Model	97
A. Blasi: BRS Renormalization of $O(n + 1)$ Non-linear σ -Model	109
G. Bonneau: Renormalization of Bosonic Non-linear σ -Models Built on Compact Homogeneous Manifolds	120
K. Stelle: Non-linear Field Renormalizations in the Background Field Method	130

G. Bonneau: Kähler Geometry and Supersymmetric Non-linear σ-Models:	
An Introduction	144
D. Olivier, G. Valent: Methods in Hyperkähler σ-Models Building	151
C. Pope: Sigma Model β-Functions at all Loop Orders	160
R. Flume: The $d = 2$ Conformally Invariant $SU(2)$ σ-Model with	
Wess-Zumino Term and Related Critical Theories	170
P. Mitter: The Two-Dimensional $O(n)$ Non-linear σ-Model from a	
Wilson Renormalization Group Viewpoint	179
H. Dorn: Non-linear σ-Models with Boundary and Open Strings	197
Discussion Session on Part II	209
 Part III: Cohomological and Geometrical Methods, Relation	
to String Theory	213
 R. Stora: Remarks on Slavnov Symmetries	215
L. Bonora, M. Bregola, K. Lechner, P. Pasti, M. Tonin:	
Supersymmetric Properties of Field Theories in 10-D	220
L. Bonora, P. Cotta-Ramusino, M. Rinaldi:	
Generalized Wess-Zumino Terms	232
