

## CONTENTS

<b>CHAPTER 1</b>	<b>GENERAL INTRODUCTION</b>	
1-1	Numerical Methods	1
1-2	Domain Methods	2
1-3	Boundary Element Method	3
1-4	The Main Procedures and Features of BEM	5
1-5	The Subject of this Work	7
1-6	Contents of the Present Work	9
1-7	The Cartesian Tensor Notation	11
<b>CHAPTER 2</b>	<b>POTENTIAL PROBLEMS</b>	
2-1	Introduction	12
2-2	The Boundary Integral Formulation for Potential Problems	13
2-3	The Boundary Element Method for Potential Problems	22
2-4	Motivation and General Ideas	27
2-5	Fourier Analysis	30
2-6	Basic Formulations for Transforming the Domain Integrals into the Boundary for 2-D Problems	35
2-7	Numerical Approaches	42
2-8	Numerical Accuracy of the Transformation Formula	46
2-9	Some Further Discussions	68
2-10	Examples	73
2-11	The Transformation Formula for 3-D Poisson's Equation	90
2-12	Applications in Time-dependent Problems	95
2-13	Application in Non-linear Problems	99

	Page
<b>CHAPTER 3      LINEAR ELASTOSTATICS</b>	
3-1   Introduction	101
3-2   Basic Relationships of Elasticity	102
3-3   Fundamental Solution for Elastostatics	105
3-4   Somigliana Identity	108
3-5   The Boundary Integral Equations of Elastostatics	112
3-6   The Boundary Element Method in Elasticity	116
3-7   Basic Formulations for Transforming 2-D Elasticity Domain Integrals to the Boundary	117
3-8   Numerical Implementation	132
3-9   Results of Numerical Experiments	140
<b>CHAPTER 4      APPLICATIONS IN ELASTICITY AND ELASTO-                   PLASTICITY</b>	
4-1   Introduction	158
4-2   An Example of Gravitational Loading	160
4-3   An Example with a More General Type of Distributed Loading	166
4-4   Relationship between Plastic Stresses and Plastic Strains	169
4-5   The Governing Equations for Elasto- Plasticity	177
4-6   Numerical Analysis using Finite Fourier Series	181
4-7   Application to Elasto-plastic Problems	185
<b>CHAPTER 5      PROGRAMMING</b>	
5-1   Potential Problems	194
5-2   Elasticity Problems	196
5-3   Elasto-Plasticity Problems	198
<b>CHAPTER 6      GENERAL DISCUSSION AND CONCLUSIONS</b>	201
<b>REFERENCES</b>	204
